WELCOME

Welcome to FioniaVet's 15th Anniversary Catalogue

We proudly present the FioniaVet 15th Anniversary Catalogue. Since our humble beginnings in 2010, we have grown into a trusted name in veterinary-specific consumables, now supplying distributors in 65 countries from our warehouse in Denmark.

At FioniaVet, we are dedicated to developing, producing, and distributing high-quality products for veterinarians and vet nurses worldwide. Our commitment extends apart from quality that we strive to conduct responsible business, ensuring ethical labour practices in production and offering solutions that minimizes environmental impact.

Founded and led by Mr. Torben Bjerning and Dr. Martin Eberhardt, our company is built on expertise and experience. Dr. Martin Eberhardt, a veterinary surgeon with more than 30 years of experience, brings invaluable insight into product development for disposable veterinary items. Mr. Torben Bjerning, with 25+ years of experience in international sales of medical and veterinary consumables, ensures our global reach and customer satisfaction.

In this catalogue, you will find our comprehensive range of products, designed to meet the evolving needs of veterinary professionals. We invite you to explore our catalogue and discover innovative, reliable solutions tailored to your practice.

Thank you for being part of our journey—we look forward to serving you.

Dr. Martin Eberhardt

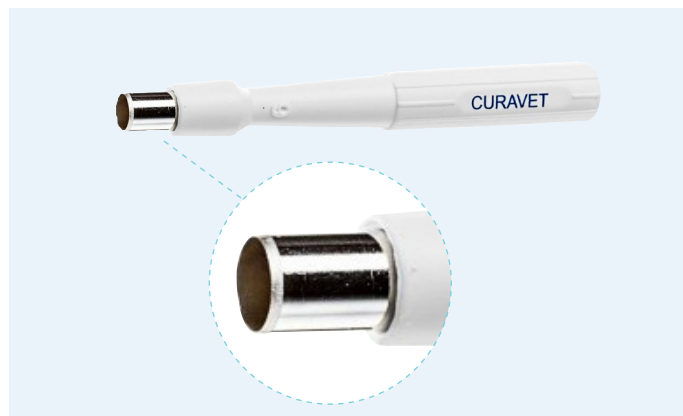

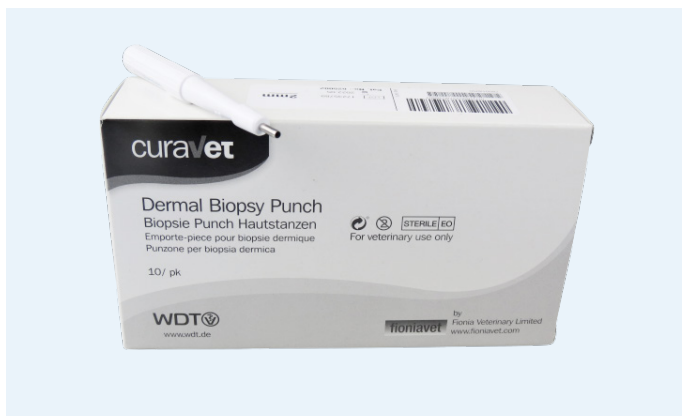

Torben Berning

FioniaVet Biopsy Punch

FioniaVet Dermal Biopsy Punch, with seamless razor-sharp stainless steel blade. This biopsy punch copes with the challenge of tough animal skin. Disposable, sterile and single packed.

Cat. No	Name	MOQ
625002	FioniaVet Dermal Biopsy Punch 2 mm, Sterile, 10/pk	10
625003	FioniaVet Dermal Biopsy Punch 3 mm, Sterile, 10/pk	10
625004	FioniaVet Dermal Biopsy Punch 4 mm, Sterile, 10/pk	10
625005	FioniaVet Dermal Biopsy Punch 5 mm, Sterile, 10/pk	10
625006	FioniaVet Dermal Biopsy Punch 6 mm, Sterile, 10/pk	10
625008	FioniaVet Dermal Biopsy Punch 8 mm, Sterile, 10/pk	10

True Cut Style Biopsy Needle

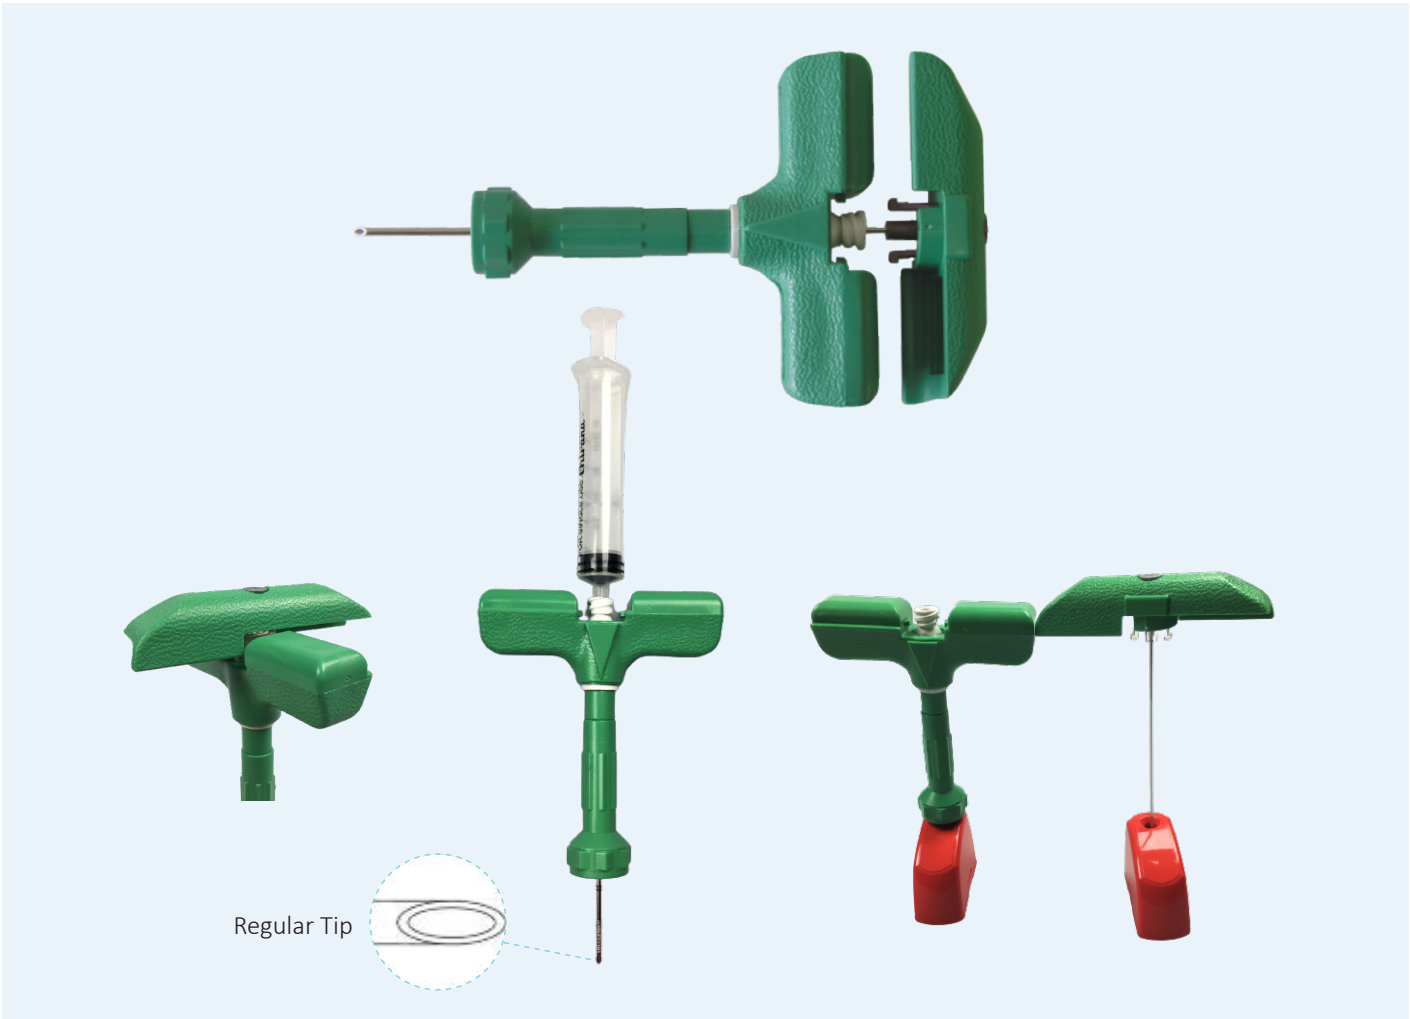

Soft Tissue
Sharp needle for accurate and clean-cut soft tissue biopsy.

Features:

- Graduated shaft
- Specimen chamber 1 x 20 mm
- Sterile, not autoclavable
- Packed in a bag and a box

Cat. No	Name	MOQ
118	Biopsy Needle 14G, Shaft 11 cm, Sterile, 1/pk	1

Bone Marrow Biopsy Device

This Jamshidi type bone marrow biopsy device is designed for a bone marrow biopsy by aspiration.

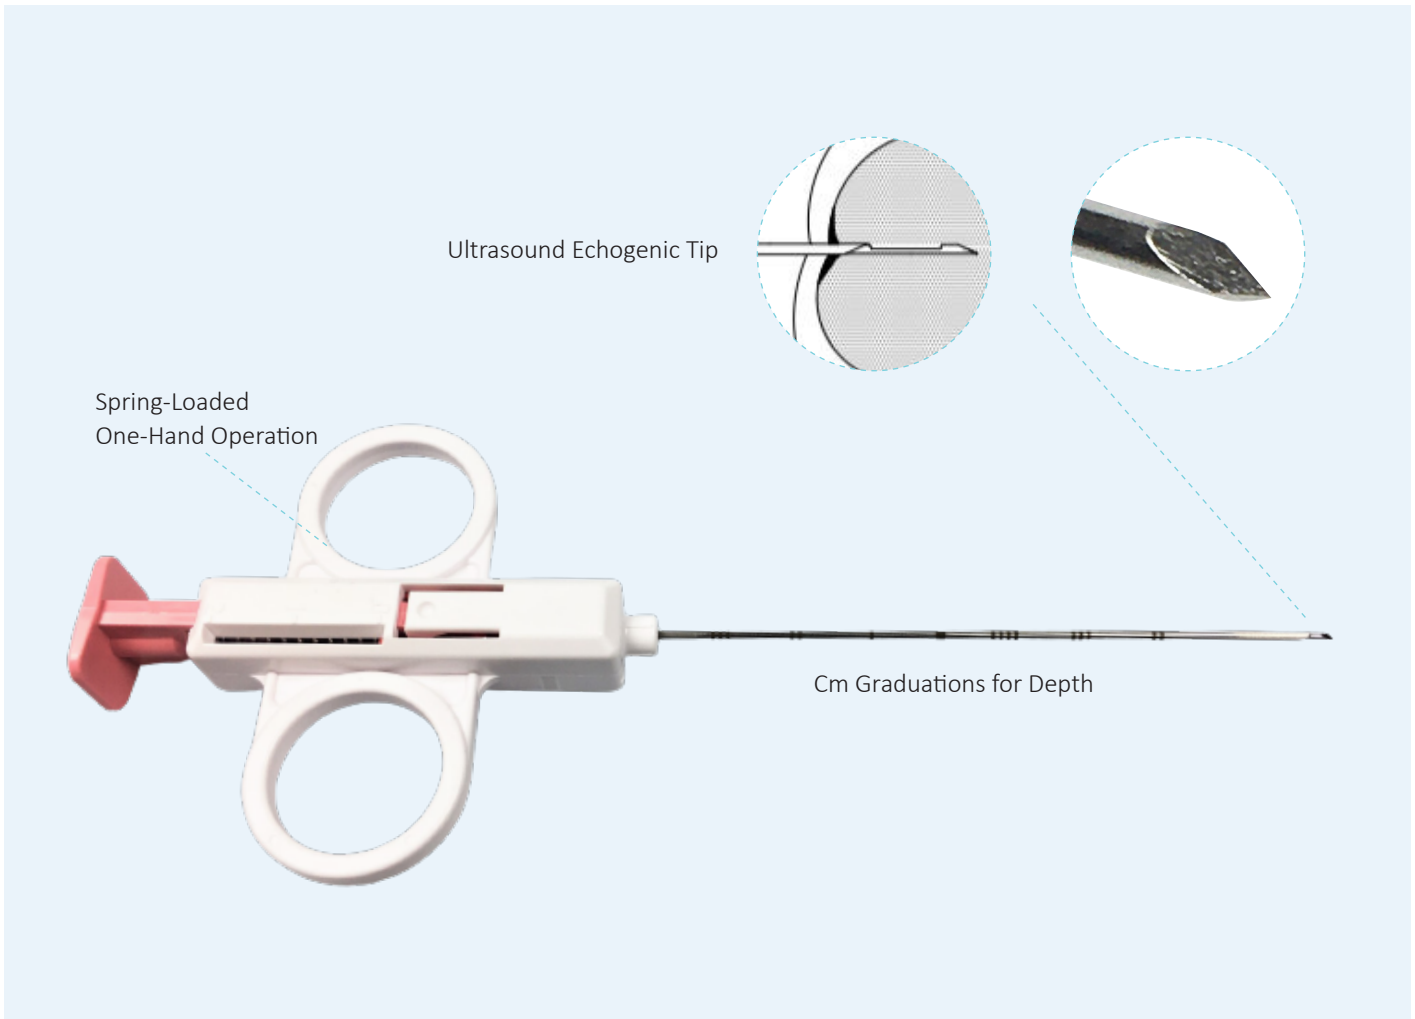

Features:

- 16G needle, regular tip and large hand grip for increased torque
- Adjustable depth stops: 0.95 to 4.75 cm
- Luer lock syringe attachment
- Suitable for intraosseous fluid administration
- Sterile, not autoclavable.
- Single use
- Packed sterile in a peel pack

Use:

- Adjust to the desired depth
- Insert the needle into the bone marrow
- Once in place, remove the stylet/obturator needle and its handle, place the sharp end in one of the red bases prior to disposal
- Connect a 6 ml syringe to the white Luer lock
- Move the syringe plunger back and forth, as this will pull small amount of marrow fluid/cells into the syringe
- Once the canula and handle are removed from the patient, place the sharp needle into the last red base prior to disposal

Cat. No	Name	MOQ
116T	Bone Marrow Biopsy Device 16G, Sterile, 1/pk	1

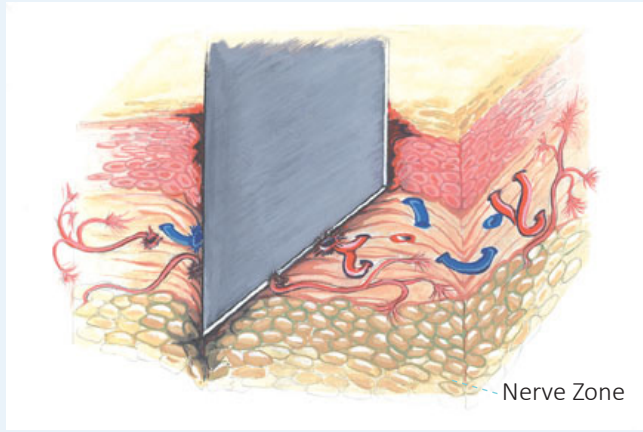

Super Core Biopsy Device

Semi-automatic one-hand operated biopsy instrument used to obtain soft tissue biopsies quick and easy, while the other hand leads a guiding device or ultrasound probe. Once the depth is chosen, the spring activated needle is fired, and its “guillotine” notch takes back the sample.

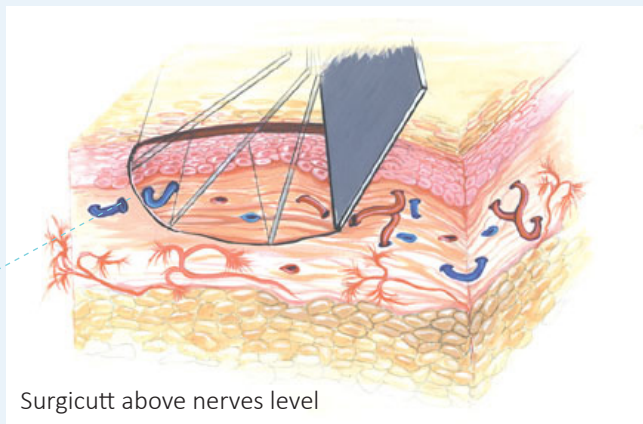

Features:

- Semi-automatic, spring activated
- Comfortable plastic handle, allowing a one hand operation
- Lightweight, adjustable
- Regular tip needle, numerically ordered centimeter markings to facilitate precise depth placement
- Echogenic tip for ultrasound visualization
- 20 mm specimen guillotine notch
- Sterile, not autoclavable.
- Single use
- Packed in a peel pouch

Cat. No	Name	MOQ
528C	Super Core Biopsy Device, 18G x 9 cm Needle, Sterile, 1/pk	1

Traditional Lancet

Surgicutt above nerves level

Surgicutt® Bleeding Time Device

Buccal mucosa bleeding time (BMBT) test

Fully automatic patented device for buccal mucosa bleeding time (BMBT) test in the gum, screening for primary hemostatic disorders of platelets and vessel wall dysfunction.

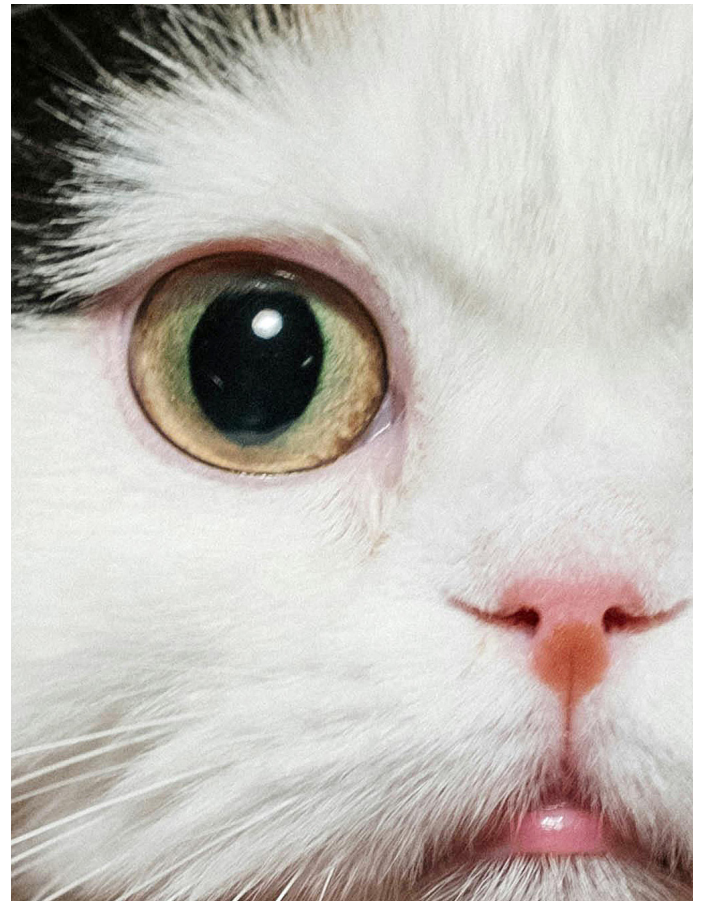

Procedure:

A tiny scalpel-like blade of a calculated depth is inside the plastic device. A push on the button fires the cutter at high speed and retracts it in the device. The calculated depth (1 mm) performs the cut above the nerves area, resulting in a quick and painless incision (unlike painful traditional lancets/scalpels). Result, normal bleeding time: Dogs 1.7 to 4 min., Cats: 1 to 2.5 min. It also allows to detect bleeding problems before surgery and before diagnostic works-ups on high-risk breeds (Doberman, Boxer, Rottweiler)

Features:

- Quick, safe and easy, all staff at clinic can perform the test
- Light and small 3 x 3 cm
- Minimally invasive procedure with mild or no sedation for dogs. Cats may need sedation.
- 522S for large dogs, 522J junior for small dogs and cats
- Single use, to be disposed in a sharp container
- Sterile single packed in a peel pouch and box

Cat. No	Name	MOQ
522S	Surgicutt® Bleeding Time Device, 5 mm Blade, Sterile, 5/pk	1
522J	Surgicutt® Bleeding Time Device, Junior, 3.5 mm narrow Blade, Sterile, 5/pk	1

FioniaVet Ophthalmic Test Strips

Schirmer - Blue Absorbent Indicator

The standard for measuring tear production for possible diagnosis of Keratoconjunctivitis Sicca (dry eye). Graduated absorbent paper with mm graduations is inserted at the lateral canthus between the eye and eyelid and absorbs tear film.

Features:

- No anesthesia necessary
- Blue absorbent indicator strip and now also pairs, left-right with notch
- Do not apply medication to, or manipulate the eye prior to test
- Examination room light should be dimmed
- Insert the rounded end into the lower temporal lid of the eye
- Wait 1-5 minutes, and record the moistured area
- Indicated at 5 mm, the blue absorbent ink moves up with the tear film level giving a clearer indication of tear film production
- Measurements should be:
 - Normal: 15-30 mm
 - Sub Normal: 10-15 mm
 - Mild Dryness: 6-10 mm
 - Moderate Dryness: 2-5 mm
 - Severe Dryness 0-1 mm
- Individually packed in sterile pouch 100 strips or 50 pairs per box

Cat. No	Name	MOQ
1195	FioniaVet Ophthalmic Test Strips, Schirmer, 100 strips, Sterile, 5/pk	1
1196	FioniaVet Ophthalmic Test Strips, Schirmer, 50 pairs, left-right with notch, Sterile, 5/pk	1

FioniaVet Ophthalmic Test Strips

Fluorescein Sodium
 Fluorescein Dye Strips. A great tool for detection of corneal injuries or defects. Every eye that shows signs of pain should be checked with fluorescein. Tear film will wash dye across cornea. The area of the cornea injury will glow fluorescent green.

Features:

- Each strip has orange-colored fluorescein dye in a sterile single package
- Sterile, single strips
- 1.0 mg fluorescein dye per strip
- 100/pk

Cat. No	Name	MOQ
1197	FioniaVet Ophthalmic Test Strips, Fluorescein Sodium, 100 strips, Sterile, 5/pk	1

FioniaVet Rose Bengal Eye Strips

FioniaVet's Rose Bengal eye test strips are simple, quick, and cost-effective diagnostic tools in veterinary ophthalmology. Unlike fluorescein eye strips, which detect corneal ulcers, Rose Bengal stains areas of cell degeneration and help detect early-stage eye conditions. These strips contain Rose Bengal dye, which stains areas of cell degeneration, making them useful for diagnosing and detecting early-stage ocular conditions. After dripping a drop of saline on the strip, the drop is gently applied to the lower conjunctiva. The eye is then examined under a light source, and areas where the dye has adhered indicate damage or disease. After testing the eye, the dye should be flushed out with sterile saline.

Features:

- Quick and cost-effective eye test
- Can detect early-stage eye-condition
- Sterile
- 100/pk

Cat. No	Name	MOQ
1198	FioniaVet Ophthalmic Test Strips, Rose Bengal, 100 strips, Sterile, 5/pk	1

Micro Hematocrit Tubes

With Sodium Heparin

Micro Hematocrit Tubes, w. Sodium Heparin.

Features:

- High quality conform to international standard ISO 12772
- Each glass tube contains at least 4-7 IU heparin as prescribed by the standard
- Inner Ø 1.15 mm, outer Ø 1.55 mm, length 75 mm, volume 75 microns
- Red color coded for easier identification
- 100/pk

Cat. No	Name	MOQ
161313	Micro Glass Hematocrit Tubes , w. Sodium Heparin, 100/pk	10

FioniaVet Dermatophyte Test

Dermatophytosis, often called “ringworm”, is a cutaneous infection caused by different genera of fungi collectively called “dermatophytes”, meaning “plants that live on the skin”. The main fungi responsible for dermatophytosis in domestic animals are Microsporum, Trichophyton and Epidermophyton. These pathogenic fungi are found worldwide and are the most frequent cause of cutaneous mycosis in companion animals, as well as in humans.

This kit is intended to use as part of a differential diagnosis of dermatological conditions in dogs, cats and horses.

Features:

- Incubation at 22-25.5°C for 14 days with daily control
- Positive test identified by colour change to red
- Storage at +2-8°C, stability 36 months
- Storage at room temperature, stability 20 months
- Box of 10 tubes, labels, workstation in carton

Cat. No	Name	MOQ
211050	FioniaVet Dermatophyte Test, 10/pk	1

Sealing Wax Plates

Capillary tubes

The natural wax plate intended use is to keep the capillary tubes in upright position and seal the tubes after the blood collection before they go into a centrifuge. Each single wax plate has 2 x 12 numbered positions, which makes it easy to have several tubes sealed and transported at the same time. Kit of 2 plates (12 tubes each) that can be separated.

Features:

- Plates with natural, non-toxic wax that does not affect the plastic material, if using plastic tubes
- 2 connected plates of 24 numbered positions each, can be easily separated for individual use

Cat. No	Name	MOQ
140013	Sealing Plates for Capillary Tubes, 5 x kit of 2 plates/pk	1

FioniaVet OvaDiagnost

FioniaVet fecal diagnostic kit for collecting a fecal sample in a hygienic way, taking it to the clinic for analysis of eggs from intestinal roundworms.

Procedure:

- Collect the fecal sample with the green device and place it in the container
- Take the closed container to the veterinary clinic
- At the clinic, the flotation solution (Cat. No 216050) is added
- Floating parasite eggs will show in the following microscopic examination
- Practical display box of 50/pk

Cat. No	Name	MOQ
211040	FioniaVet OvaDiagnost, 50/pk	6

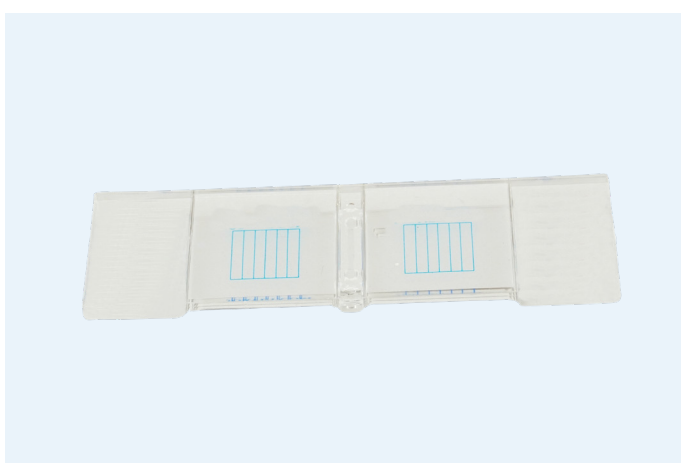

FioniaVet Flotation Solution

FioniaVet fecal flotation is used in combination with the OvaDiagnost collecting device (Cat. No 211040) in routine veterinary test for internal parasites or “worms”.

The test detects eggs of mature parasites that live inside the intestine and pass their eggs to the outside by shedding them into the host’s stool.

Cat. No	Name	MOQ
216050	FioniaVet Flotation Solution, 1 L, 1/pk	12

McMaster Egg Counting Chamber

The McMaster Egg Counting Chamber is a special microscopic slide with two etched chambers for quantitative analysis of feces or intestinal contents.

Features:

- Egg per gram sensitivity: 25 EPG
- Grid size: 1 x 1 cm
- Volume under grid: 0.15 ml
- Material: Acrylic
- Slide dimension: 2.3 x 7.6 cm
- Grid color: Blue

Cat. No	Name	MOQ
335M	McMaster Egg Counting Chamber, 1/pk	1

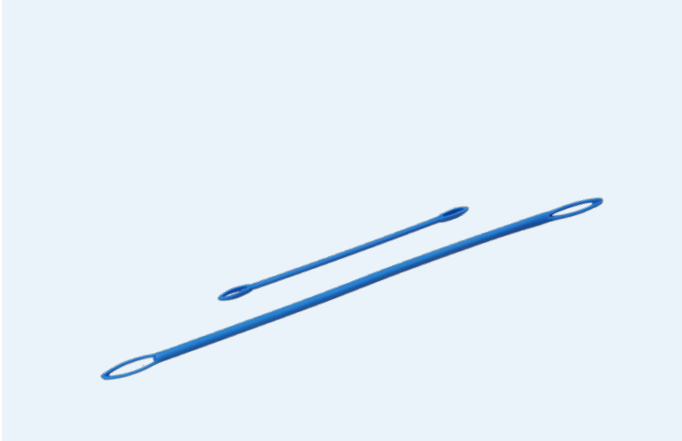

Immersion Oil, Type A, 120 ml

Immersion Oil is used to assist in microscopic examination at high power (100 x lens) by increasing the resolving power. Type A immersion oil has medium viscosity, reducing the tendency to trap air between the slides, which can cause image degradation.

Features:

- Easy to use
- Reduces trapped air
- Increases image quality

Cat. No	Name	MOQ
326A	Immersion Oil, Type A, 120 ml, 1/pk	1

Fecal Loop for fecal sample collection

The Fecal Loop is an inexpensive and reusable plastic loop with slotted ends for quick and easy fecal samples. The Loop is a small flexible rod with a loop at each end. The loop can easily be inserted into the rectum and a small amount of fecal material gets trapped in the loop.

- Features:
- Quick and easy to use
 - Reusable, clean by disinfection

Cat. No	Name	MOQ
147	Fecal Loop Standard, 22.9 x 0.6 cm, 1/pk	1
147PF	Fecal Loop Standard Puppy and Kitten, 11.4 x 0.6 cm, 5/pk	1

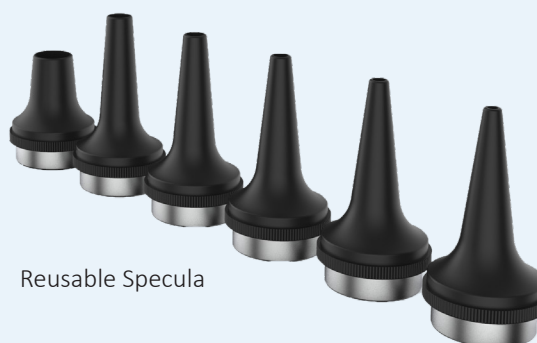

Urine Sediment Stain, 15 ml

Microscopic examination of urine sediment is a vital part of any urine analysis. This special stain allows visualization of casts, crystals and/or microorganisms. The urine sediment test is a quick in-house test, which can be used as a biomarker for presence of several kidney diseases such as UTI or kidney stones under microscopic examination. Dropper bottle for accurate placement of the drops

- Features:
- Dropper bottle
 - Used in in-house tests

Cat. No	Name	MOQ
326U	Urine Sediment Stain, 15 ml, 1/pk	1

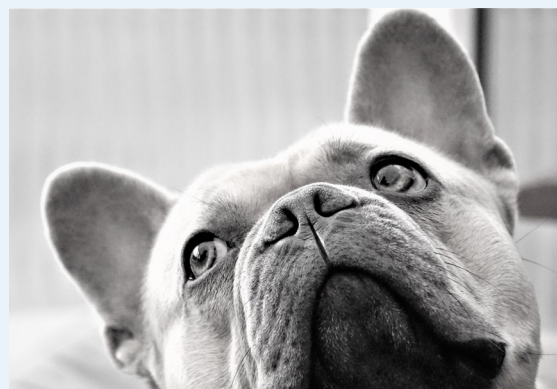

Reusable Specula

Single-Use Specula

FioniaVet Otoscope

The FioniaVet Mini Vet Otoscope is a quality economic device, standing out by being able to operate with both reusable as well as single use specula. Use 2 AA alkaline batteries.

Features:

- Fiber optic illumination, LED white, 18.5 Lumen
- Larger view window
- 3X magnification
- 6 specula included: mm 50 x 2.0-2.8-3.5-4.5-5.5-10.0
- Can also use single use specula (not included)
- 2 x AA battery (not included)

Cat. No	Name	MOQ
219050	FioniaVet Otoscope Mini Vet, Set with 6 x 50 mm Specula, 1/pk	1
219052	Bulb for Otoscope Mini, LED White, 5/pk	1
219057	FioniaVet Disposable Specula, 4.0 mm for Otoscope Mini Vet, 100/pk	1

FioniaVet Ophthalmoscope

The FioniaVet Ophthalmoscope is a quality device at an economic price. New LED technology.

Features:

- 5 different apertures
- Range of lenses: -20D- +20D
- Direct illumination
- Luminance 18.5 Lumen
- Bulb: LED 2.5V, 0.7A, Ø=4.8mm
- Operation: 10-35°C 30-75% humidity, 700-1060 hPa air pressure
- Storage/transport: -40-70°C, 10-90% humidity
- 2 x AA battery (not included)
- 1/pk

Cat. No	Name	MOQ
219070	FioniaVet Ophthalmoscope, 1/pk	1

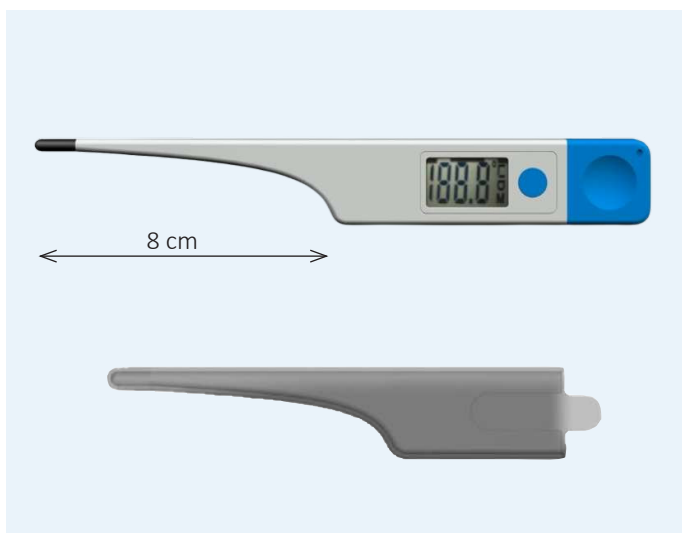

Digital Thermometer

High quality, reliable standard human digital thermometer, economic model.

Features:

- Measurement results in 60 seconds
- 3-digit display
- Waterproof IP22
- Measuring range: 32°C-42.9°C
- Accuracy: ±0.1°C to 35°C-39°C (±0,2°C)
- Resolution: 0.1°C
- Beep at the end of the measurement, 45 sec (measured in warm bath, 60-70 sec. in patient mouth)
- Storage of the last measured value
- Battery indicator
- LR41 battery
- Automatic shutdown after 9 minutes
- Supplied in a sturdy acrylic cover
- Folded instructions for use in D and GB languages
- Dimensions L 124 x W 19 x H 10 mm
- CE certified according to EU guidelines CE0197
- 25/pk

Cat. No	Name	MOQ
152008	Digital Thermometer, 25/pk	1

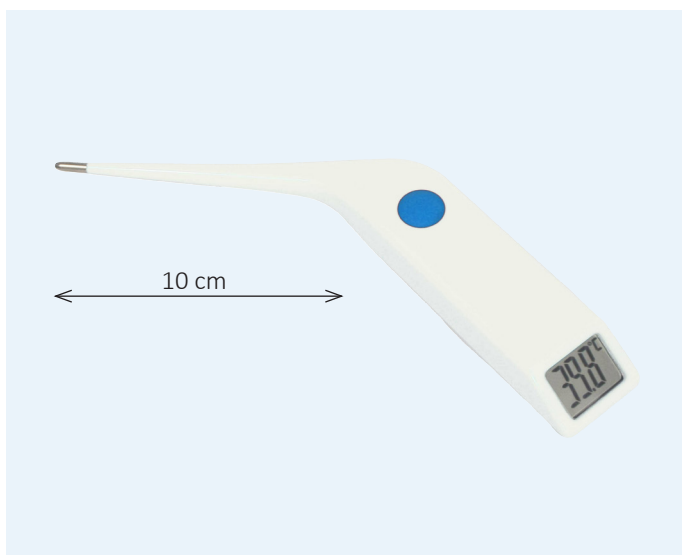

Veterinary Thermometer Vet 12

Small and large animals
Veterinary specific digital thermometer.

Features:

- Measurement results in 10 seconds
- Big LCD-Display with 3.5 digits
- Long sensor tip with 8 cm length for an exact temperature measurement in large animals
- Ergonomic design, easy handling and easy to read the display
- Measurement range 32°C–42.9°C
- Measurement accuracy 0.1°C between 35°C–40°C
- Switchable between °C/°F
- Beeps when a measurement is completed
- Waterproof IP67
- Measuring sensor is cold disinfectable
- Automatic switch-off around 9 min after the measurement is completed
- Battery LR 41, 1.5V
- Low battery indicator
- Multi language instruction manual on the standard range of the internal body temperature in cows, pigs, horses, sheep
- Thermometer size 188 x 26 x 11 mm, weight 23 g, display size 23 x 12 mm

Cat. No	Name	MOQ
Vet-12	Thermometer Veterinary Specific, Vet 12, 1/pk	10

Veterinary Thermometer Vet 112

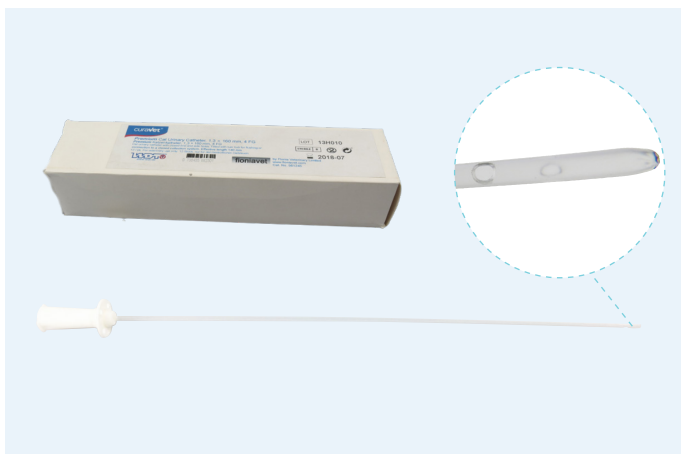

Small/Large Animals
Veterinary specific digital thermometer for large animals.

Features:

- Measurement results in about 10 seconds, 5 beeps when complete
- Big LCD-Display with 3.5 digits
- Measurement range 32°C - 42.9°C
- Measurement accuracy 0.1°C between 37°C - 41°C, in the remaining area 0.2°C
- The display shows "L", when the temperature drops below 32°C and "H" above 42.9 °C
- Long sensor tip with 10 cm length for an exact temperature measurement in large animals
- Ergonomic design, easy handling and easy to read the display
- Waterproof
- Measuring sensor is cold disinfectable
- Automatic switch-off around 2 min after the measurement is completed
- Battery LR 44, 1,5V
- Low battery indicator
- Instruction manual with information on the standard range of the internal body temperature in cows, pigs, horses, sheep
- Thermometer size L 200 x B 32 x H 18 mm, weight 45 g, display size 24 x 17 mm

Cat. No	Name	MOQ
152019	Thermometer, Veterinary, Small/Large animals, Vet 112, 1/pk	5

FioniaVet Tomcat Catheters

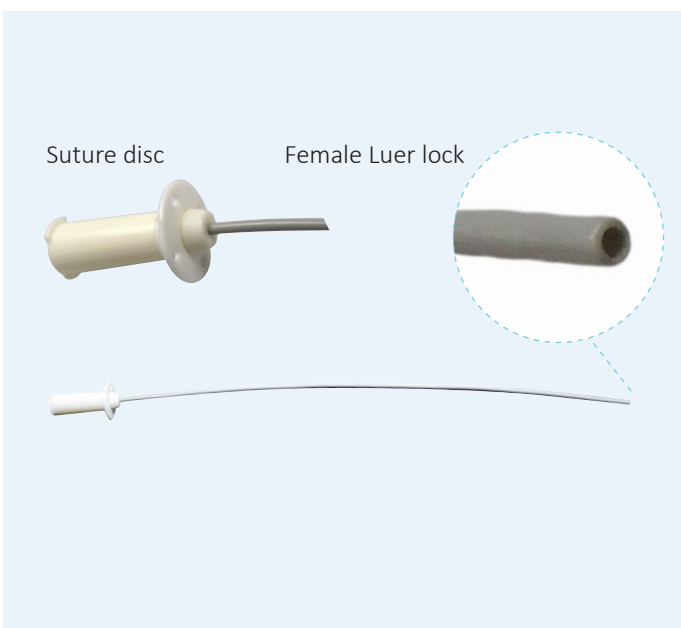

FioniaVet short-term, closed end cat urinary catheter with 2 atraumatic side holes and a rotating suture disc.

Features:

Available in 2 versions

- Stiff catheters for immediate bladder relief – without stylet
- Jackson catheters with stylet, soft tubing for longer indwelling use
- Medical grade plastic
- Single packed and sterile
- 12/pk

Cat. No	Name	MOQ
601230	FioniaVet Cat Urinary Catheter, 1.0 x 130 mm, 3 Fr, Sterile, 12/pk	10
601240	FioniaVet Cat Urinary Catheter, 1.3 x 130 mm, 4 Fr, Sterile, 12/pk	10
601245	FioniaVet Cat Urinary Catheter 1.3 x 160 mm, 4 Fr, Sterile, 12/pk	10
601250	FioniaVet Cat Urinary Catheter, w. Stylet, 1.0 x 130 mm, 3 Fr, Sterile, 12/pk	10
601260	FioniaVet Cat Urinary Catheter, w. Stylet, 1.3 x 130 mm, 4 Fr, Sterile, 12/pk	10
601265	FioniaVet Cat Urinary Catheter, w. Stylet, 1.3 x 160 mm, 4 Fr, Sterile, 12/pk	10

FioniaVet HP Tomcat Catheter

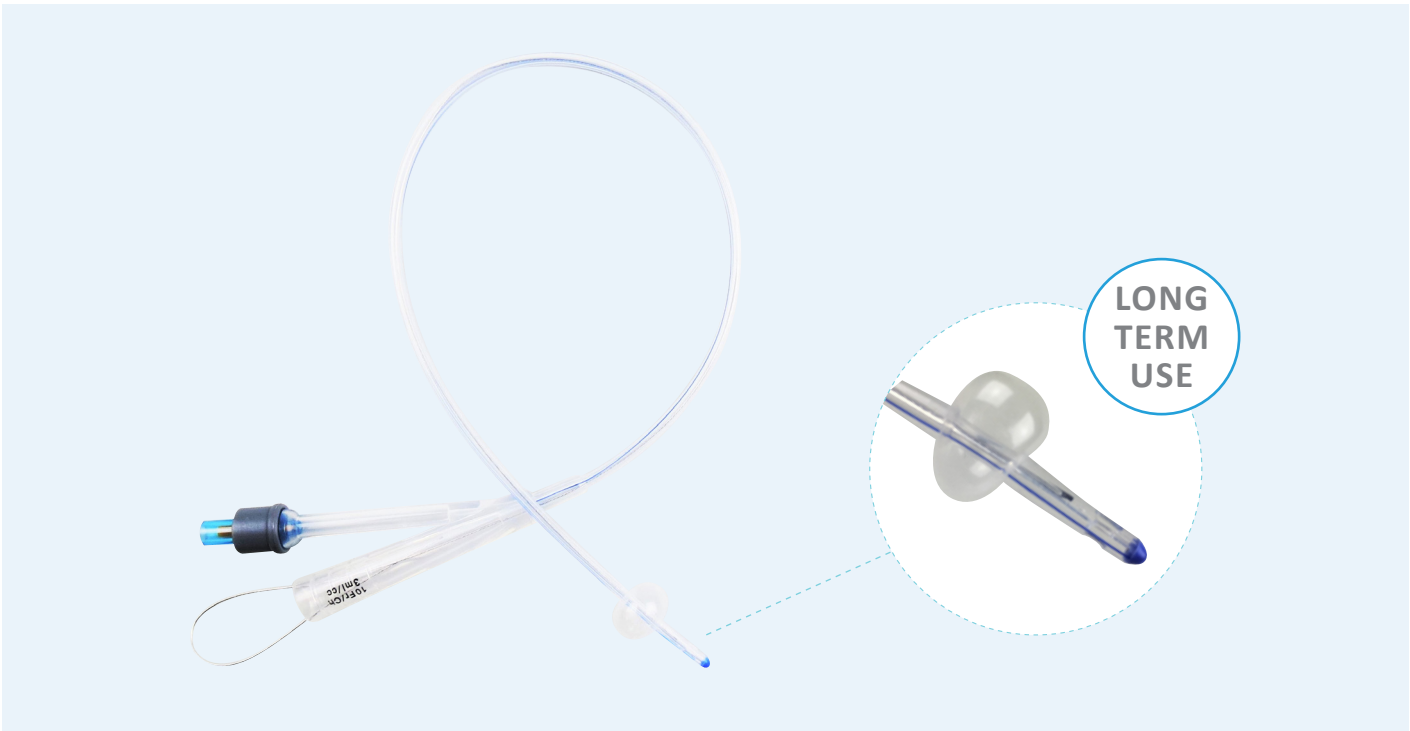

FioniaVet open ended urinary cat catheter for unblocking of the urethra of tomcats by hydro propulsion (HP).

Features:

- Tubing made of advanced medical grade PEBAX known for excellent flexibility, kink resistance, torque transfer, and low coefficient of friction
- Atraumatic tip
- Fitted with Luer hub for flushing or connection to a closed collection system
- Suture disc at hub allows securing of the catheter to the prepuce for short time indwelling use
- Single packed and sterile
- 10/pk

Cat. No	Name	MOQ
561001	FioniaVet HP Tomcat Urinary Catheter 1.25 x 140 mm, 3.5 Fr, Sterile, polybag of 10/pk	10

FioniaVet Urinary Silicone Foley Catheters

FioniaVet 100 % silicone urinary 2-way Foley catheters, for long-term use.

This silicone self-retaining Foley catheter is used in applications where long-term catheterization is required: (draining the bladder failing to empty, managing urinary incontinence). It is also used to irrigate the bladder or extract a sample of urine. Silicone material has a good biocompatibility. Compared to latex, silicone is non-allergenic and has superior resistance to kinking. Silicone is therefore suitable for long term placement (up to 7 days) and reduces the risk of urethritis.

Features:

- Smooth surface avoiding urethral irritation
- Smooth rounded tip and lateral, atraumatic eyes
- Balloon to be inflated, maintain the catheter in place
- Balloon volume: 0.8 ml for 3.5, 4.5, 5 Fr, 1.5 ml for 6 Fr, 2 ml for 8 Fr, 3 ml for 10 Fr
- Radiopaque line
- Stylet for introduction
- Urine drainage funnel
- Inflation connector with one-way valve
- Single packed sterile, polybag of 10/pk

Cat. No	Name	MOQ
561412	FioniaVet Silicone Foley Catheter, 2 Way, w/stylet, 3.5 Fr, 1.2 mm, 20 cm, Sterile, 10/pk	1
561414	FioniaVet Silicone Foley Catheter, 2 Way, w/stylet, 4.5 Fr, 1.5 mm, 34 cm, Sterile, 10/pk	1
561416	FioniaVet Silicone Foley Catheter, 2 Way, w/stylet, 5 Fr, 1.7 mm, 40 cm, Sterile, 10/pk	1
561418	FioniaVet Silicone Foley Catheter, 2-Way, w/Stylet, 6 Fr, 2 mm, 30 cm, Sterile, 10/pk	1
561420	FioniaVet Silicone Foley Catheter, 2-Way, w/Stylet, 6 Fr, 2 mm, 60 cm, Sterile, 10/pk	1
561422	FioniaVet Silicone Foley Catheter, 2-Way, w/Stylet, 8 Fr, 2.6 mm, 60 cm, Sterile, 10/pk	1
561424	FioniaVet Silicone Foley Catheter, 2-Way, w/Stylet, 8 Fr, 2.6 mm, 90 cm, Sterile, 10/pk	1
561426	FioniaVet Silicone Foley Catheter, 2-Way, w/Stylet, 10 Fr, 3.3 mm, 45 cm, Sterile, 10/pk	1
561425	FioniaVet Silicone Foley Catheter, 2-Way, w/Stylet, 10 Fr, 3.3 mm, 60 cm, Sterile, 10/pk	1
561428	FioniaVet Silicone Foley Catheter, 2-Way, w/Stylet, 10 Fr, 3.3 mm, 90 cm, Sterile, 10/pk	1
561430	FioniaVet Silicone Foley Catheter, 2-Way, w/Stylet, 12 Fr, 3.9 mm, 60 cm, Sterile, 10/pk	1

FioniaVet Dog Catheters

The classic urinary catheter for dogs.

Features:

- Rounded atraumatic end
- 2 lateral atraumatic side holes
- Luer fitting
- Single packed and sterile
- 12/pkg

Cat. No	Name	MOQ
561201F	FioniaVet Dog Urinary Catheter, 1.3 x 500 mm, 4 Fr, 1.3 mm, Sterile, 10/pkg	10
561202F	FioniaVet Dog Urinary Catheter, 2.0 x 500 mm, 6 Fr, 2 mm, Sterile, 10/pkg	10
561203F	FioniaVet Dog Urinary Catheter, 2.6 x 500 mm, 8 Fr, 2.6 mm, Sterile, 10/pkg	10
561204F	FioniaVet Dog Urinary Catheter, 3.3 x 500 mm, 10 Fr, 3.3 mm, Sterile, 10/pkg	10

FioniaVet Urine Bag 150 and 300 ml

200 cm Tube, Luer lock and Foley catheter connector

FioniaVet urine bags are expertly designed to provide efficient drainage for urine and other gravity-based applications.

Each bag has a short top outlet with a rotating male Luer lock, reducing the risk of catheter twisting or kinking. For patients using Foley catheters, the system includes an easy-to-attach Foley catheter connector, equipped with a secure cap to close the catheter when not in use.

A built-in non-return valve at the top of the bag prevents back-flow, ensuring proper drainage at all times. The bottom push/pull valve offers convenient, effortless emptying, contributing to the system's long-term cost-effectiveness.

The 2-meter spiral tube adds flexibility, making the system ideal for use in cages or kennels, allowing animals to move freely without the risk of catheter dislodgement. For added convenience, the bag includes two adjustable elastic straps, each 1 meter long, so animals can comfortably carry the bag as they move around.

Features:

- 150 ml and 300 ml version
- 200 cm tubing for kennel/cage use
- PP valve (Push/pull)
- 2 x Elastic straps, 1 m
- Foley Catheter Connector with closing cap
- Sterile
- 10/pkg

Cat. No	Name	MOQ
601420	FioniaVet Urine Bag 150 ml, 200 cm Tube, PP Valve, Foley Catheter Connector, 2 x Elastic Straps 1 m, Sterile, 10/pkg	1
601422	FioniaVet Urine Bag 300 ml, 200 cm Tube, PP Valve, Foley Catheter Connector, 2 x Elastic Straps 1 m, Sterile, 10/pkg	1

FioniaVet UriCollect

The FioniaVet UriCollect device is an easy and hygienic way for dog owners to collect a urine sample from their pet.

- Made of 2 parts: a 40 ml specimen container and collection aid
- After collection, the specimen container can be closed and brought to the vet for analysis
- Improved neck profile gives a better fixation on the container, allow air intake speeding up the flow when emptying
- Each set is single packed and sterile
- 25/pk

Cat. No	Name	MOQ
564060	FioniaVet UriCollect for dogs, 25/pk	20

FioniaVet Urine Test Strips 11

These test strips are specifically designed for veterinary use. Easy to use, cost-effective and they are designed for the diagnosis of various disease states.

The pallet of parameters includes:

- Occult Blood
- Bilirubin
- Urobilinogen
- Ketones
- Protein
- Nitrite
- Glucose
- pH
- Specific Gravity
- Leukocytes
- Ascorbic Acid

Cat. No	Name	MOQ
1188	FioniaVet Urine Test Strips, 100/pk	10

FioniaVet UriCatKit

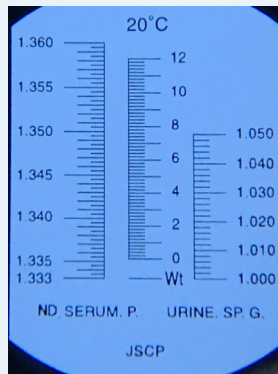

200 g and 400 g for collecting urine sample from cats at home. Multi-language user instructions follows

Features:

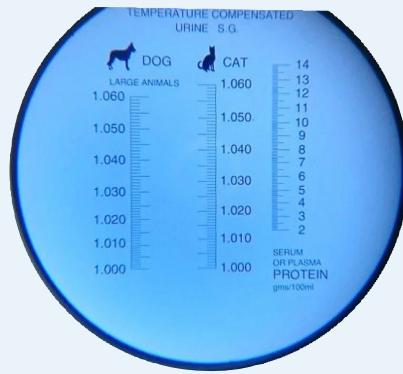

- Non-absorbent litter beads
- Available in 200 g and 400 g
- 1 pipette
- 1 test tube

Cat. No	Name	MOQ
29240F	FioniaVet UriCatKit, Non-Absorbent Cat Litter Beads, 200 g, 6/pk	20
29250	FioniaVet UriCatKit, Non-Absorbent Cat Litter Beads, 400 g, 4/pk	20

218020

218030

FioniaVet Clinical Refractometers

FioniaVet clinical refractometers designed for measuring serum proteins and specific gravity of urine. Automatic temperature compensation.

218020 FioniaVet Clinical Refractometer

	Measuring range	Resolution	Accuracy	Dimension
Serum Protein	0 – 12 g/dl	0.2 g/dl	+/- 0.2 g/dl	24.5 mm x 170 mm
Urine Specific Gravity	1000 – 1050 sg	0.005 sg	+/- 0.005 sg	24.5 mm x 170 mm

218030 FioniaVet Clinical Refractometer with dual specific gravity scale – Dog/Cat

Urine Specific Gravity: one scale for dogs, one for cats, why?

Scientific studies have shown that cat urine has a greater refraction index than dog urine. This special model has dog and cat scales and allows a more accurate result.

	Measuring range	Resolution	Accuracy	Dimension
Serum Protein	0 – 14 g/dl	0.2 g/dl	+/- 0.2 g/dl	24.5 mm x 200 mm
Urine Specific Gravity	1000 – 1060 sg	0.005 sg	+/- 0.005 sg	24.5 mm x 200 mm

FioniaVet High Flow Long-term PU IV Cannula Catheter

FioniaVet PU High Flow IV Catheter for long term use.

Features:

- Catheter of soft polyurethane
- Combined flashback chamber and handle
- Fitted with suture wings
- Single packed and sterile
- 10/pk

Cat. No	Name	Flow ml/min	MOQ
656015	FioniaVet HighFlow IV cannula, 16G x 80 mm, PU, 10/pk	180	5
656025	FioniaVet HighFlow IV cannula, 14G x 80 mm, PU, 10/pk	295	5
656035	FioniaVet HighFlow IV cannula, 14G x 133 mm, PU, 10/pk	260	5

FioniaVet Tourniquet

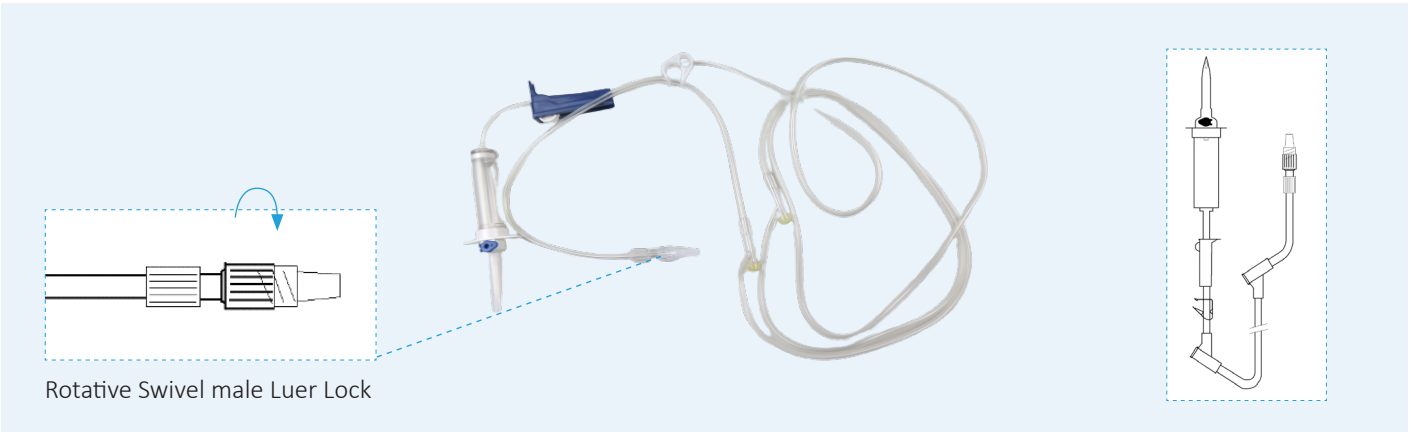

Quick Release

This quick release tourniquet is used in routine blood collection to apply pressure to the leg to make the veins more prominent and easier to feel and find.

Features:

- Easy to apply
- Quick release
- Packed in a polybag
- 5/pk

Cat. No	Name	MOQ
1525	FioniaVet Tourniquet, Quick Release, 5/pk	10

Rotative Swivel male Luer Lock

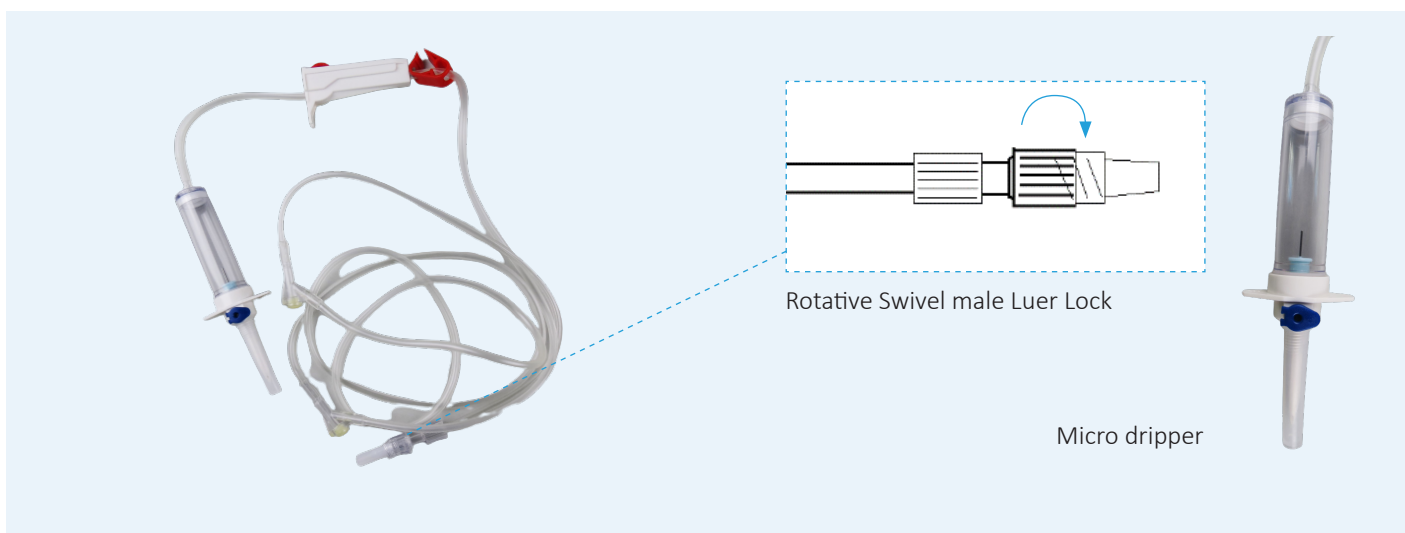

FioniaVet Small Animal IV Set, 20 drops/ml

FioniaVet IV set for gravity and open system infusion pumps, specially developed for animal use.

Features:

- Drip Chamber 20 dr/ml, with Airfilter 0.5 µm and Fluidfilter 15 µm
- Tubing: 240 cm, ID 2.9 mm, OD 4.05 mm
- Special tubing designed for use with infusion pumps with open system. Up to 96 hours material memory, resistance to compression inside the pump, resulting in higher flow rate accuracy, dosing accuracy
- For calibration consult your pump supplier
- Also suitable for gravity IV infusion
- Length of 240 cm suitable for kennel environment
- Lower Y-site at 32 cm from patient
- Top Y-injection site at 183 cm from the patient for medicine administration to animals in cages
- Rotative swivel male luer-lock for easy one hand fixing or
- Top Y-injection site at 183 cm from the patient for medicine administration to animals in cages
- Rotative swivel male luer-lock for easy one hand fixing or just push fit to cannula
- Latex free
- DEHP-free. Accumulation of DEHP, a toxic product to be found in standards IV sets, in the organism is suspected to affect patient health (e.g. reproductive system)

Cat. No	Name	MOQ
654025	FioniaVet IV set, 20 drop/ml, 240 cm, 2 x Y-Injection Sites, Gravity and Pump tubing, Sterile 25/pk	6

Rotative Swivel male Luer Lock

Micro dripper

FioniaVet Small Animal IV Set, 60 drops/ml

For gravity and open system infusion pumps

Features:

- Special tubing designed for use with infusion pumps with open system. Up to 96 hours material memory, resistance to compression inside the pump, resulting in higher flow rate accuracy, dosing accuracy
- For calibration consult your pump supplier
- Also suitable for gravity IV infusion
- Micro dripper 60 drops to 1 ml
- Length of 176 cm suitable for kennel environment
- Rotative Swivel male Luer Lock for easy one hand fixation or just push fit to cannula, without kinking the tubing
- Lower Y-site 45 cm from the patient, makes it easier to fix the line
- Top Y-injection site 125 cm from the patient, for medicine administration to animals in cages
- 15 µm fluid filter
- Latex free
- DEHP (phthalate) free.
- 25/pk

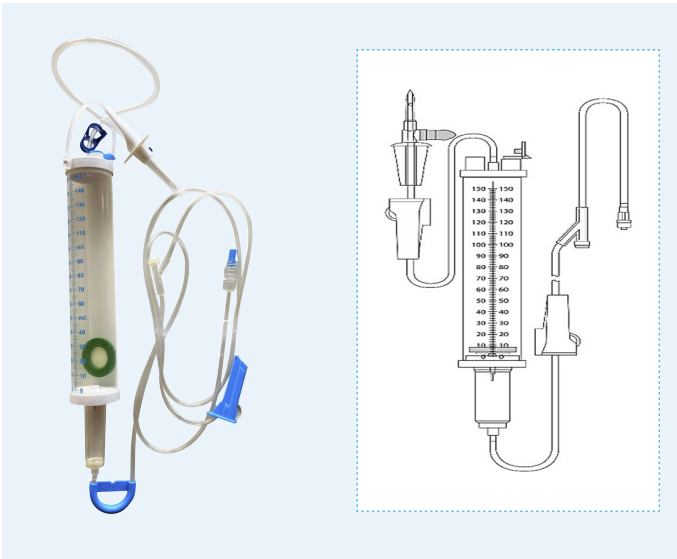

Cat. No	Name	MOQ
654027	FioniaVet IV set, 60 drop/ml, 176 cm, 2 x Y-Inj. site, Pump tubing, Sterile 25/pk	6

FioniaVet Antikink

Antikink, a simple medical device, which will help prevent a standard infusion/transfusion line from kinking/bending. It is easy to attach to the infusion line – just a click, and secures a steady flow.
10/pk

Cat. No	Name	MOQ
28116	FioniaVet Antikink Protector for Infusion Lines, 10/pk	50

FioniaVet IV Burette Set

Economic IV Burette set for fluid therapy by gravity, where a higher injection accuracy is required.

The 150 ml metered chamber is designed to limit the quantity of IV solution available, an injection port allows to add medication.

Features:

- 150 cm soft, kink resistant PVC tubing, ID: 3 mm, OD: 4.1 mm
- Calibrated 150 ml transparent chamber with marking scale
- 60 drops / ml
- Latex free
- Sharp vented spike with bacteria retentive air inlet
- 15 microns filter for particles
- Automatic shut off valve prevents entry of air once the chamber is empty
- 2 roller clamps for flow regulation
- Injection site
- Single packed sterile, 10/pk

Cat. No	Name	MOQ
654030	FioniaVet Burette IV Set, 150 ml, 150 cm, Sterile, 10/pk	10

Large Volume IV Bag, 6 L

Large volume bag for large animals needing a quick injection of large volume of nutritive solutions.

Features:

- Collapsible 6 L bag
- Large drip chamber
- For urgent and quick administration of high-volume IV solution
- Ideal for solutions like Ringer lactate
- Sterile, 1/pk

Cat. No	Name	MOQ
0400Q	Large Volume IV Bag, 6 L, Sterile, 1/pk	1

FioniaVet Protection Cap

Heparin cap with male Luer injection port

Features:

- Sterile/Single use
- Latex and DEHP-free
- Box of 200/pk

Cat. No	Name	MOQ
654040	FioniaVet Protection Cap, Sterile, 200/pk	1

FioniaVet T-Port Micro Bore Extension Set

Micro Bore tubing as extension and T-Port injection site

Features:

- Micro Bore, 15 cm, >0.3 mL priming
- 1. Cap
- 2. Female Luer Lock
- 3. 15 cm micro bore tubing, <0.3 mL priming
- 4. Slide clamp
- 5. T-Injection Site
- 6. Rotating Male Luer Lock with Cap
- Flow rate >1500 ml/10 min
- Pressure resistance 200 Kpa
- Lipid resistant
- Sterile/Single use
- Latex- and DEHP free
- Bag of 50/pk

Cat. No	Name	MOQ
654035	FioniaVet T-port Extension Set, with Injection Site, Micro Bore, 15 cm, Sterile, 50/pk	6

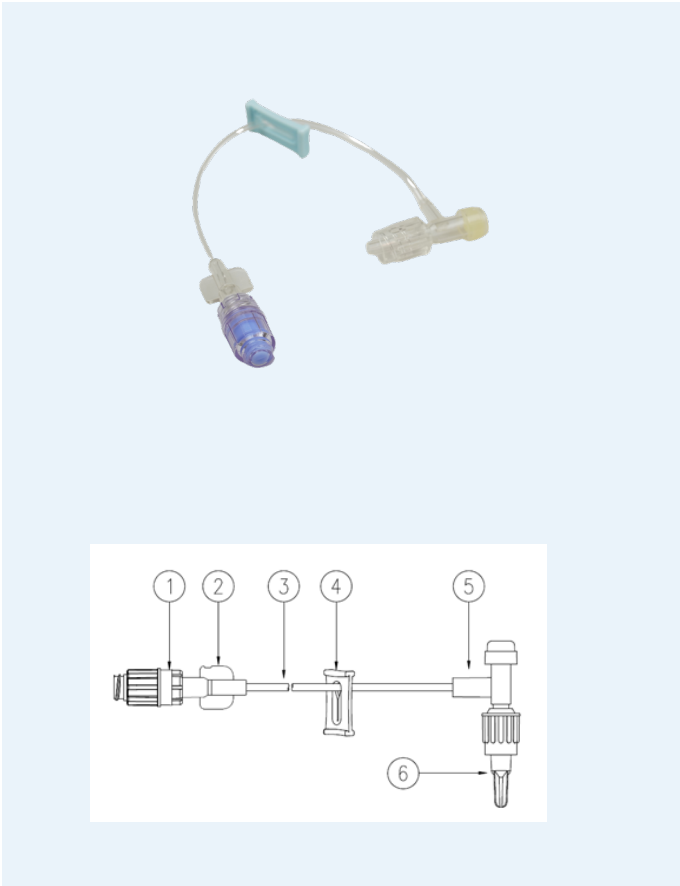

FioniaVet 3-way Stopcock, Sterile

3-way stopcock with rotating male Luer Lock and 3 caps

Features

- Click every 45°, blue handle
- 3 Luer Lock caps, one rotating male, and 2 female
- Flow rate > 16l/h
- Sterile/Single use
- Latex and DEHP-free
- Box of 75/pk

Cat. No	Name	MOQ
654038	FioniaVet 3-way Stopcock, Blue, Sterile, 75/pk	4

FioniaVet Safety T-Port Micro Bore Extension Set

With injection Site

Safety products help reduce needlestick injuries and infection risk, ensuring a safer working environment and the healthcare of the users.

Our safety needle free valve works with negative pressure, which means that it is possible to use the syringe without a needle.

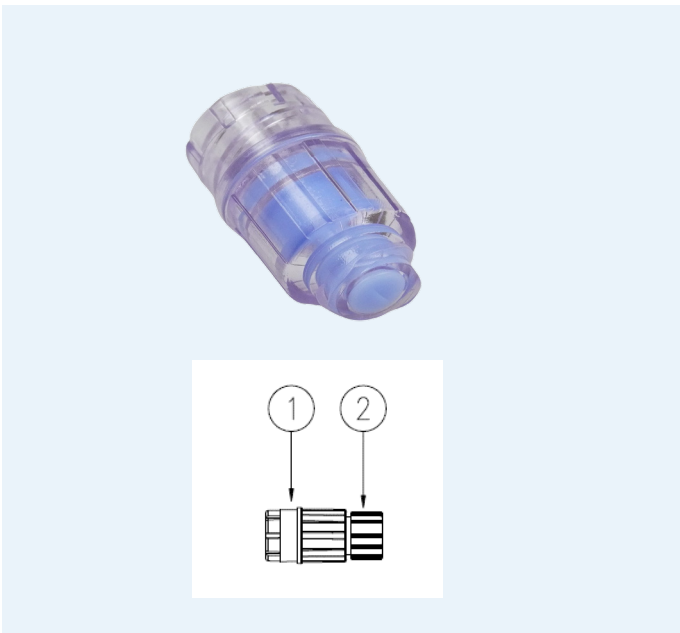

Micro Bore tubing as extension and T-Port injection site

1. Needle Free Safety Valve
2. Female Luer Lock
3. 15 cm micro bore tubing, <0.3 mL priming
4. Slide clamp
5. T-Injection Site
6. Rotating Male Luer Lock with Cap

Features

- Flow rate >1500 ml/10 min
- Pressure resistance 200 Kpa
- Lipid resistant
- Sterile/Single use
- Latex- and DEHP free

Cat. No	Name	MOQ
654050	FioniaVet Safety T-port Extension Set, with Injection Site, Micro Bore, 15 cm, Sterile, 50/pk	1

FioniaVet Safety Valve

With Protection Cap

Safety products help reduce needlestick injuries and infection risk, ensuring a safer working environment and the healthcare of the users.

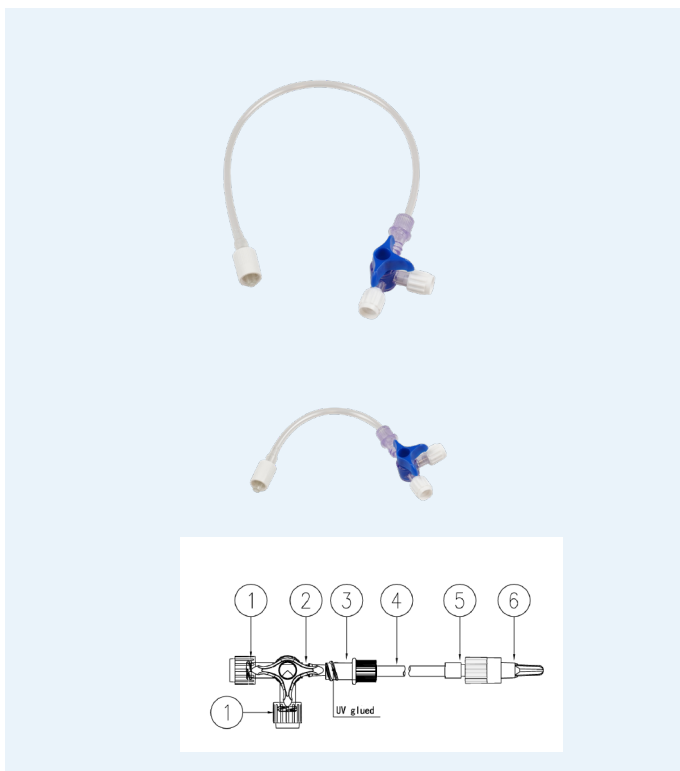

Our safety needle free valve works with negative pressure, which means that it is possible to use the syringe without a needle.

1. Safety Needle free Valve
2. Protection cap

Features

- Sterile/Single use
- Latex and DEHP-free
- Box of 100/pk

Cat. No	Name	MOQ
654055	FioniaVet Safety Valve with Protection Cap, Sterile, 100/pk	1

FioniaVet 3-Way Stopcock Extension Set 10, 25 cm

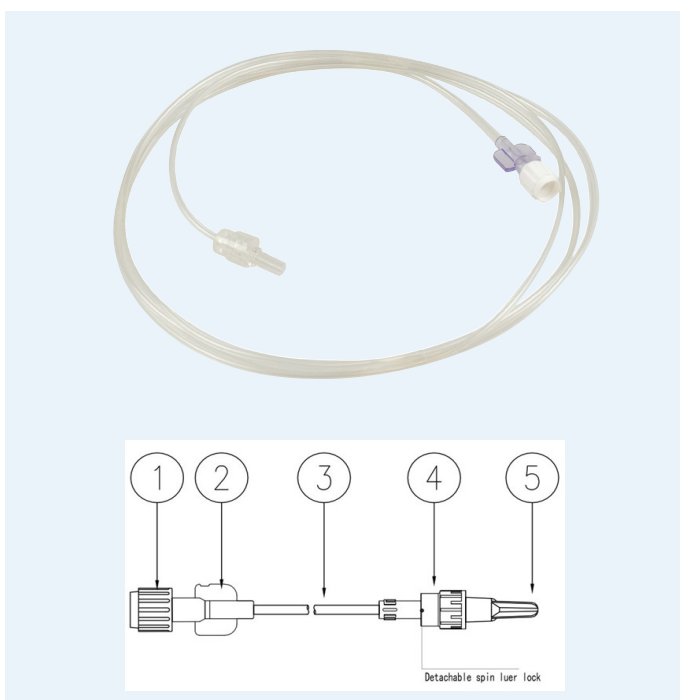

FioniaVet's 3-way stopcock system is specifically designed to simplify the handling of IV catheters in veterinary care. Its 45° click mechanism allows for easy operation and seamless switching between different fluids or medications, eliminating the need to frequently disconnect or reposition the catheter, thereby enhancing both efficiency and patient safety.

1. Cap
2. 3-way stopcock
3. Female Luer Lock
4. Tubing
5. Rotating Male Luer Lock
6. Cap

Features:

- 45° click
- Lipid resistant
- Sterile/Single use
- Latex- and DEHP free
- Box of 50/pk

Cat. No	Name	MOQ
654041	FioniaVet 3-Way Stopcock Extension Set, 10 cm, Rotating Luer Lock, Sterile, 50/pk	1
654042	FioniaVet 3-Way Stopcock Extension Set, 25 cm, Rotating Luer Lock, Sterile, 50/pk	1

FioniaVet Syringe Pump Extension Line Microbore, 150 cm, Sterile

Micro Bore tubing as extension line when using a syringe pump. By using the extension line, it is possible to place the syringe pump further away from the patient during surgery or replacement without the risk of detachment.

1. Cap
2. Female Luer Lock
3. 150 cm micro bore tubing
4. Detachable Male Spin Luer Lock
5. Cap

Features

- Lipid resistant
- Pressure 4 bar
- Sterile/Single use
- Latex- and DEHP free
- Bag of 50/pk

Cat. No	Name	MOQ
654056	FioniaVet Syringe Pump Extension Line, Microbore Bore, 150 cm, Sterile, 50/pk	6

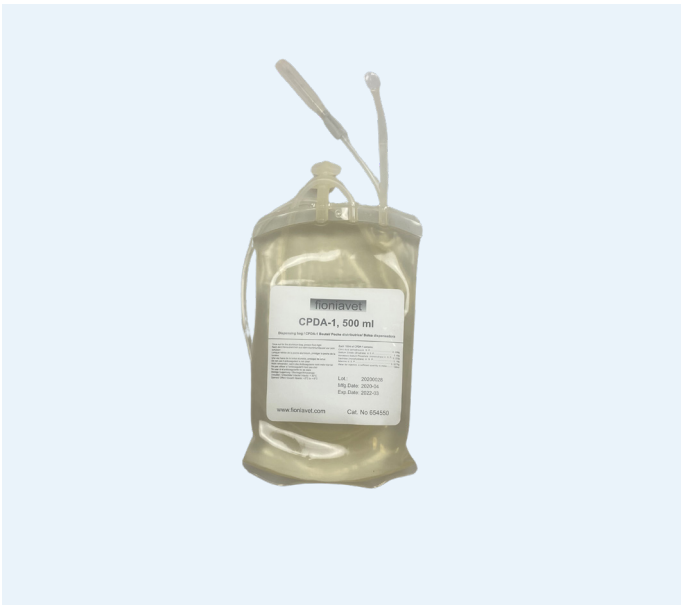

Hemo Nate Blood Filter

This device features a blood filter and is connected between a syringe and a needle, when a quick blood transfusion is performed with a syringe, for example in feline medicine.

Features:

- 18 microns stainless steel filter
- Fits any Luer syringe and Luer Lock needle
- Remove small volumes debris
- Allows viable blood to pass through
- Syringe not included
- Packed individually sterile in a peel pack and a bag
- 5/pk

Cat. No	Name	MOQ
522H	Hemo Nate Blood Filter for Syringe , Sterile, 5/pk	1

FioniaVet Anticoagulant CPDA-1, 500 ml

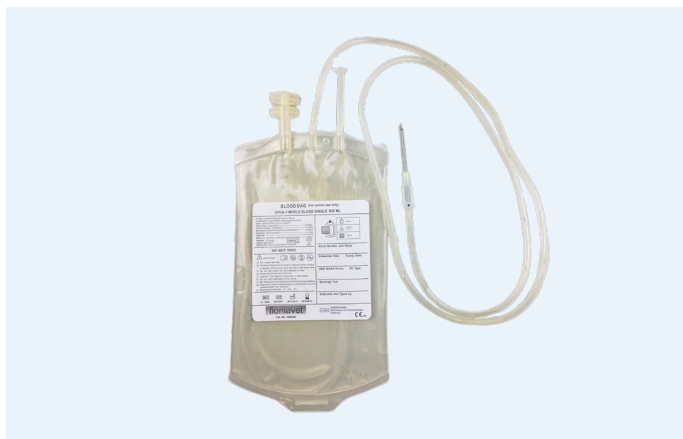

FioniaVet Dispensing bag of anticoagulant CPDA-1 solution.

Features:

100 ml CPDA-1 contains:

- Citric Acid: 0.299 g
- Sodium Citrate: 2.63 g
- Monobasic Sodium Phosphate: 0.222 g
- Dextrose: 3.19 g
- Adenine: 0.0275 g
- Water to obtain 100 ml
- Single packed, sterile
- 16 G welded needle
- Each bag packed in an aluminum bag for protection against light

Cat. No	Name	MOQ
654550	FioniaVet Anticoagulant CPDA-1, 500 ml bag, 1/pk	16

FioniaVet Blood Bags, CPDA-1, 250 and 500 ml

FioniaVet dispensing bags with CPDA-1 anticoagulant CPDA-1 solution.

Features:

- 2 sizes 250 and 500 ml
- Contains CPDA-1: 35 ml in 250 ml, 70 ml in 500 ml bag
- 16 G welded needle
- Single packed, sterile
- 5 bags in an alluminium pouch for protection against light

Cat. No	Name	MOQ
654510	FioniaVet Blood bag, 250ml, CPDA-1, 5/pk	20
654500	FioniaVet Blood bag, 500 ml, CPDA-1, 5/pk	20

FioniaVet Vial Spike

FioniaVet Vial Spike is intended for multiple withdrawals of fluids from vials.

Reduces the risk of contamination of the medicine and eliminates the risk of needlestick injuries during the process.

Features:

- Practical swan cap
- Fitted with 5 µm fluid filter and 0.1 µm air filter
- PVC, DEHP and latex free
- Single packed sterile

Cat. No	Name	MOQ
654045	FioniaVet Vial Spike, sterile, 15/pk	6

FioniaVet Blood Transfusion Set

Set with 18G x 1½” needle, roller clamp and drip chamber.

Features:

- 150 cm tubing
- 200 micron blood filter
- Non-vented spike
- Latex bulb for injection
- Luer Lock
- Single packed and sterile

Cat. No	Name	MOQ
654080	FioniaVet Blood Transfusion Set, 18G x 1½”, 150 cm, Sterile, 25/pk	6

Dry Blood Collection Bags, with 12G Needle

These dry blood collection bag are convenient for blood component therapy as plasma/RBC separation. Own choice of anticoagulant can be used in an easy procedure. Two spike ports with donor tubing with Y- injection port.

Features:

- Collapsible bag with 12G needle
- Dual port for administration of blood to patient
- Spike ports with donor tubing with “Y”- injection port for addition of coagulant
- Luer attachment to donor animal
- Instruction of use included
- Sterile
- 2 sizes: 1 L individually packed with 5 in a pouch and 4 L 1/pk

Cat. No	Name	MOQ
0520DF	Dry Blood Collection Bag 1 L, 12 G Needle, 5/pk	1
0520F	Dry Blood Collection Bag, 4 L, 12G Needle, Sterile, 1/pk	1

FioniaVet Bovine IV Infusion Set

FioniaVet disposable IV Infusion set for giving dairy cows bottles of Calcium (or other IV fluids) e.g. milk fever treatment.

Features:

- Air vented with a c-clamp
- Spike for penetrating bottle rubber
- Male Luer Lock
- ID: 5 mm and OD: 7 mm
- Length 150 cm
- Single packed and sterile
- 10/pk

Cat. No	Name	MOQ
92911	FioniaVet Bovine IV Infusion Set, 150 cm, Sterile, 10/pk	24

FioniaVet Bovine Infusion Set

This FioniaVet bovine Infusion set is reusable.

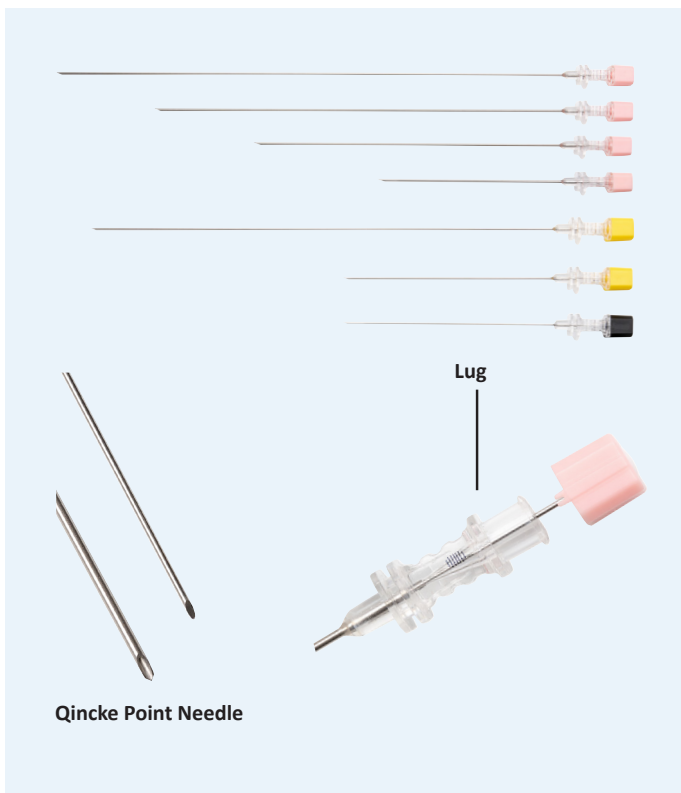

Features:

- 120 cm, outer diameter 9 mm
- Rubber latex material
- Ventilated bottle adapter
- Luer slip, 16Gx 1.5", copperhead needle included
- Packed in a box.
- 1/pk

Cat. No	Name	MOQ
92920	FioniaVet Reusable Bovine Infusion Set, 120 cm w/needle, 1/pk	50

FioniaVet Spinal Needles

Quincke-type Bevel.

Spinal needles are intended for insertion in the subarachnoid space for spinal anesthesia or lumbar puncture.

Features

- Quincke-type bevel
- Transparent hub with ergonomic design
- A lug on the hub indicates the orientation of the bevel
- Color-coded hub for the diameter of the needle
- Needle with a metallic introducer to limit bending / kinking
- 10/pk

Cat. No	Name	MOQ
15112	FioniaVet Spinal Needle, 0.7 x 38 mm, 22G x 2½", Black Hub, Sterile, 10/pk	1

FioniaVet Rebreathing Bags Neoprene, Green with Loop

Neoprene is very resistant to cuts, tears, abrasion, flexing and twisting and have high tensile strength. This make the material very useful in rebreathing bags, where the bag is expanded numerous times during use. At the same time, it's very durable during handling and cleaning procedures. As the material is so thin and flexible it is very suitable for anesthetic procedure of small animals.

The loop makes it easier to hang the bag during storage and after cleaning.

22 mm standard and soft connector makes it easy to connect to system.

Features:

- Latex free material
- 22 mm connector
- Non-sterile
- Volume printed on bag
- Bag of 5/pk

Cat. No	Name	MOQ
904410	FioniaVet Rebreathing Bag, 0.25 L, Neoprene, Green with Loop, 5/pk	1

904414	FioniaVet Rebreathing Bag, 1.0 L, Neoprene, Green with Loop, 5/pk	1

FioniaVet Anesthesia Gas Filter Cannister, 800 g

Inhalation of waste anesthetic gases can be a potential risk to the staff during surgeries, but using anesthetic filters connected to the scavenger hose will increase the safety and provide a cleaner air in the operating room. The cannister contains activated carbon which absorb anesthetic waste gases through positive pressure from the exhalation of the patient and/or the gas delivery system. The activated carbon gets saturated at a certain mass of gases and must therefore be changed when the weight is 1000 g to ensure the purpose of the product. Please follow the below Warning, Instruction and Disposal advice before use.

Warning

- Must be exchanged when the total weight reaches 1000 g.
- Use chart on side of filter for continuously check after each use.
- Does not absorb Nitrous Oxide.
- Do not use with flammable gases.
- Do not expose to excess heat or fire.

Instructions

Use upright placed on a flat surface or better in holder on the anesthesia unit and ensure free flow around the cut-outs at the bottom of the filter.

Connect the filter canister to the anesthesia unit and use.

Disposal

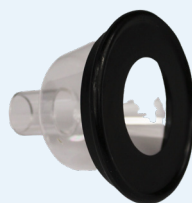

Seal the filter canister in a plastic bag and discard according to local regulation.

Features

- 22 mm connector
- 1/pk

Cat. No	Name	MOQ
90810	FioniaVet Anesthesia Gas Filter Cannister, 800 g, 1/pk	10

Without Neck strap

Silicone Endotracheal Tubes with Cuff. Equine

Silicone endotracheal tubes are softer and more biocompatible than PVC and rubber. Once at temperature of the trachea, the tube gets more flexible, and the inflated cuff will fit to the open space of the trachea.

Features:

- Lateral murphy eye at distal tip, minimize risk of airway tissue damage
- Radiolucent
- Connector included , inner Ø 50 mm
- Silicone material benefits:
 - Patient comfort. Silicone is a soft material that conforms to body contours
 - Reusability. Silicone resists deterioration better than PVC
 - Transparency. Possible to see blood and mucous if they develop
 - Low pressure/high volume cuff
- Universal fitting allows connection to most large animal anesthesia machines and ventilators.
- Non sterile-Sterilization: Only cold sterilization

FioniaVet Silicone Endotracheal Tubes with Cuf

Silicone endotracheal tubes are softer and more biocompatible than PVC or rubber alternatives. Once warmed to the temperature of the trachea, the tube becomes more flexible, and the inflated cuff conforms naturally to the tracheal space for an optimal fit.

Features:

- Lateral Murphy Eye
- Radiolucent: Enables visibility under X-ray.
- Included connector
- Enhanced comfort as silicone is a soft material that adapts to body contours.
- Resistant to deterioration, offering greater durability than PVC.
- Transparent: Allows visibility of blood or mucus for monitoring.
- High Volume/Low Pressure Cuff: Reduces the risk of tracheal injury while maintaining an effective seal.
- Sterile. Can be re-autoclaved at 121°C.
- Available Sizes: From 3 mm to 14 mm.

FioniaVet Silicone Endotracheal Tubes - Reinforced

Silicone endotracheal tubes reinforced with inner metal spiral. Silicone is more biocompatible than PVC, rubber and softens in contact with the tissue. As they are softer, introduction of the tube would require more time to introduce.

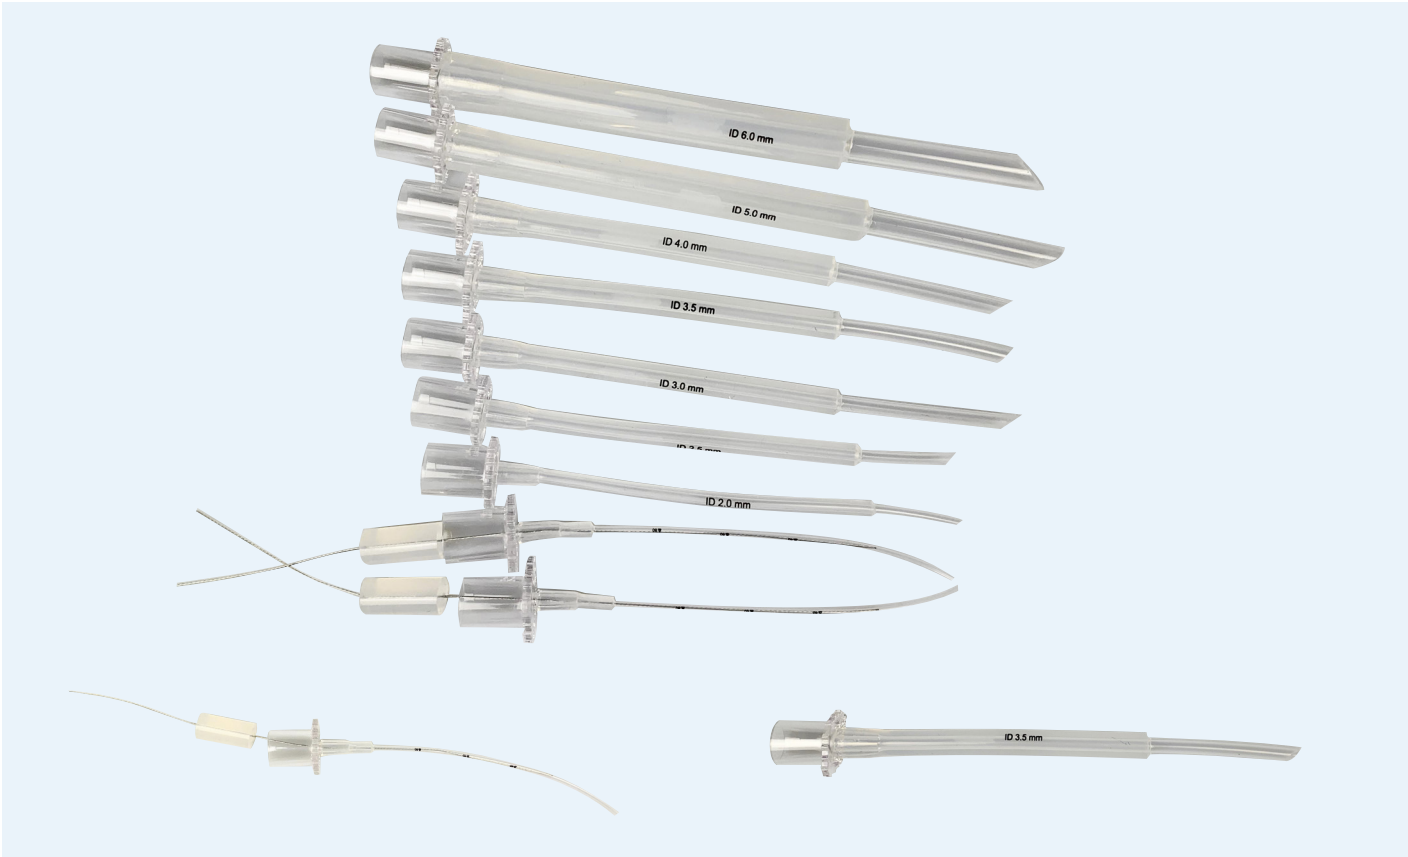

Features:

- Reinforcement benefits:
 - Easier introduction, resistance to kinking
 - Supports correct positioning, easier control by X-Ray
- High-volume Low-pressure cuff (except on 2.5 mm)
- Latex free
- Graduation to monitor positioning.
- 15 mm connector included
- Sterile
- Sizes: 2.5 mm without cuff, 3 to 9.5 mm with cuff
- Stylet (optional): Allows to form the tube with the right angle for intubation

Cat. No	FioniaVet Silicone ET Tube, Reinforced- Inner Ø - Length	MOQ
1325	2.5 mm, 16 cm, without cuff, Sterile, 1/pk	10

FioniaVet Silicone Endotracheal Tubes

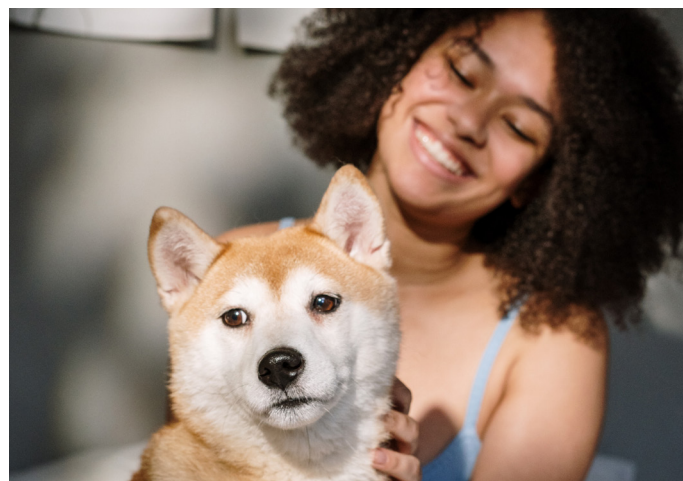

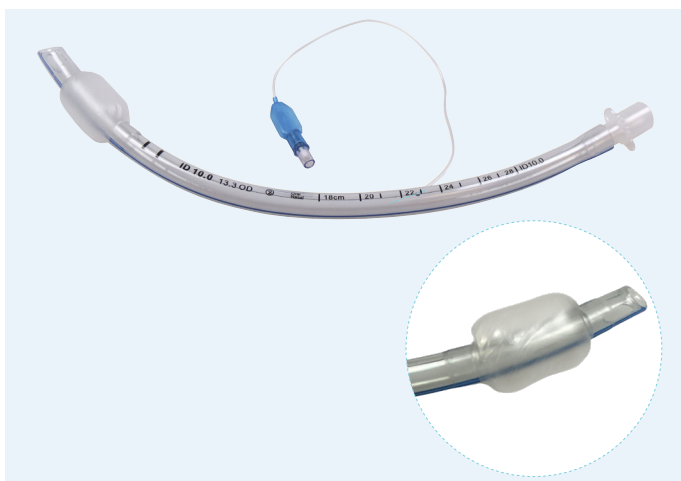

Avian / Exotics

Silicone endotracheal tubes specially designed for avian and exotics patients. Silicone is more biocompatible than PVC, rubber and softens in contact with the tissue. Once at temperature of the trachea the tube gets more flexible.

Features:

- Non-cuffed tubes
- Lower profile of the distal end for proper placement
- Larger proximal end for proper sealing
- Complete range of sizes from 1 to 6 mm
- 1 and 1.5 mm with stylet for easier introduction
- 15 mm connector included
- Packed individually, 1/pk

FioniaVet PVC Endotracheal Tubes

PVC endotracheal tubes with cuff and connector, including veterinary specific sizes 11, 12 and 13 mm.

Features:

- PVC material , medical grade
- Softens at body temperature reducing post- operative irritation
- High-volume / Low-pressure cuff
- Anatomically shaped with rounded Murphy eyes at the tip
- Single packed sterile, 1/pk

FioniaVet PVC Endotracheal Tubes, Straight

Specialized Veterinary PVC Endotracheal Tubes – Developed by FioniaVet

FioniaVet has designed a range of PVC endotracheal tubes specifically for intubating large breed dogs. These tubes are engineered to accommodate the unique anatomical structure of larger dogs, with a focus on minimizing trauma to the trachea (windpipe). Unlike human endotracheal tubes, which are curved, these veterinary tubes are straight, reducing the risk of tracheal injury during intubation. This design also helps to lessen the impact on the trachea in the event of tube rotation while repositioning the dog on the operating table.

Each tube is equipped with a cylindrical High-Volume Low-Pressure (HVLP) cuff, further reducing pressure on the trachea and minimizing the risk of complications during prolonged intubation.

Available in lengths ranging from 40 cm to 48 cm, the tubes can be shortened by up to 10 cm to reduce dead space, optimizing respiratory efficiency as needed for individual patients.

Features:

- Veterinary specific size and shape
- Medical grade PVC material
- Softens at body temperature reducing post- operative irritation
- High-volume / Low-pressure cuff
- Straight with rounded Murphy eye at the tip
- Single packed sterile, 1/pk

Cat. No	Name	Inner Ø mm	Length cm	MOQ

FioniaVet PVC Endotracheal Tube

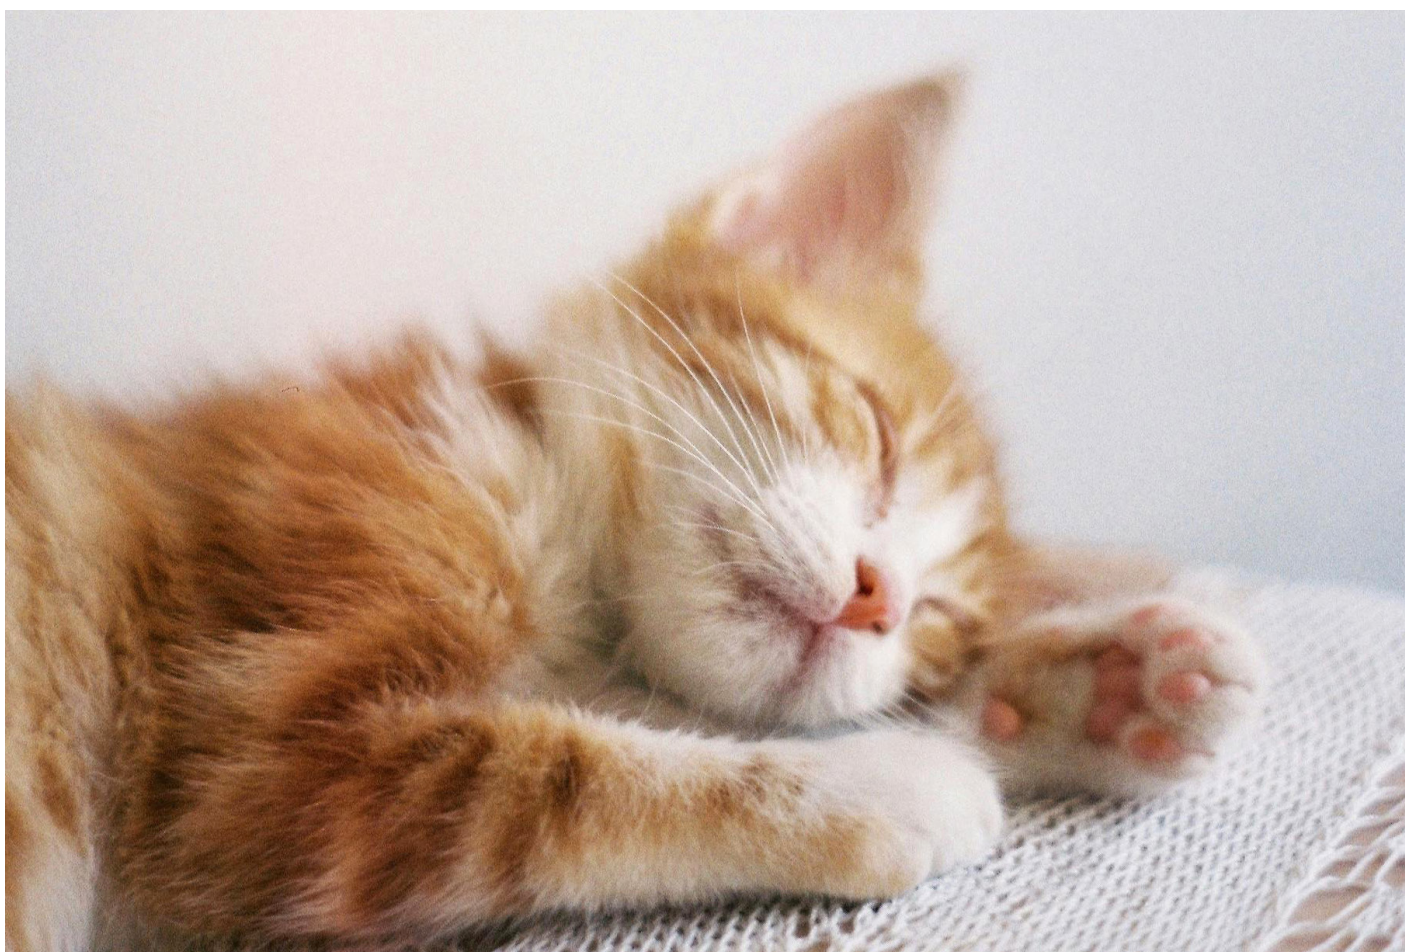

Without Cuff

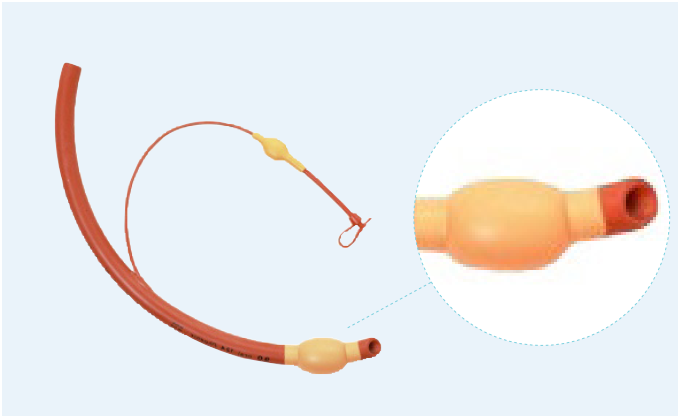

Features:

Single use PVC endotracheal tube, without cuff.

- Soft medical grade PVC tube, transparent, non-toxic
- X-Ray opaque
- Anatomically shaped with rounded Murphy eyes at the tip
- Sterile/Single use
- Latex and DEHP-free
- 6 sizes: 2- 4.5 mm
- Box of 10/pk

Cat. No	Name- Inner Ø- Length	Inner Ø	Length	MOQ

FioniaVet ET-tube Rack Horizontal or Vertical Stainless steel

To support the cleaning and reuse of endotracheal tubes, FioniaVet offers two practical storage solutions designed for easy organization and quick accessibility. Both the vertical and horizontal holders are ideal for drying tubes after cleaning, ensuring they remain hygienic and ready for use. Each holder accommodates up to 16 tubes of various sizes, providing a space-efficient way to keep your clinic organized. Constructed from durable stainless steel, the holders are easy to clean and disinfect, maintaining the highest standards of hygiene.

Features:

- Available in both horizontal and vertical models
- Easily mountable for convenience in any clinic setting
- Holds up to 16 endotracheal tubes
- Stainless steel

Cat. No	Name	MOQ
1510	FioniaVet ET-Tube Rack, Horizontal, Stainless Steel, 1/pk	5
1515	FioniaVet ET-Tube Rack, Vertical, Stainless Steel 1/pk	4

ET Tube/Mask Securing Device

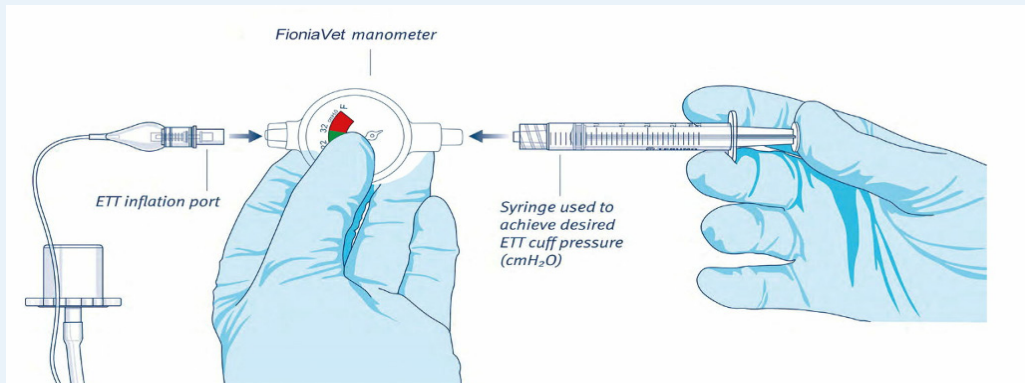

Simple, economic way to secure and maintain endotracheal tubes and anesthesia masks on the patient.

The thin but strong plastic tubing has two sliding clasps, one to maintain tension around the ET tube or mask, the second to tighten around the patient's muzzle. It also works extremely well with challenging brachycephalic breeds.

Features:

- Light weight, simple to apply
- Reusable and durable
- Can hang in induction area ready for use
- Inexpensive
- One size fits all
- Not autoclavable, clean with warm soapy water or mild disinfectant

Cat. No	Name	MOQ
1510	FioniaVet ET-Tube Rack, Vertical, Stainless Steel	5
1515	FioniaVet ET-Tube Rack, Vertical, Stainless Steel	4
1202F	ET Tube Securing Device, 3 /pk	5

FioniaVet Manometer For ET Tube Cuffs

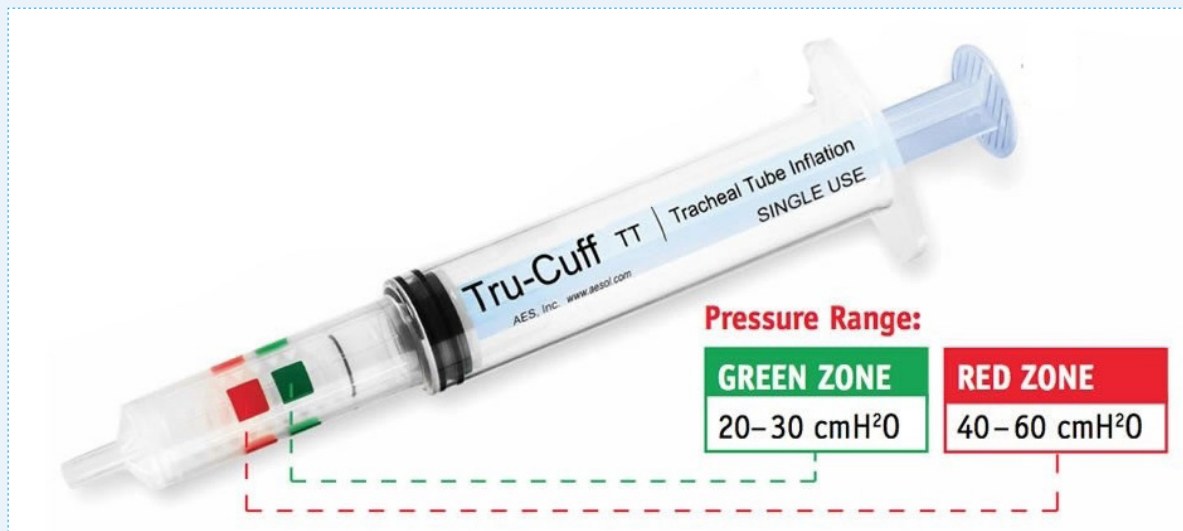

The FioniaVet Manometer is used for controlled inflation of the cuffs of PVC endotracheal tubes, as well as FioniaVet's reinforced silicone endotracheal tubes.

Over inflation of cuffs is an overlooked challenge in veterinary anesthesia, especially for cats. Most of the time, using a traditional syringe, cuffs are overinflated as the assessment of inflation is the result of the operator's feeling / sense.

Features:

- Mechanical manometer
- Avoid under/over inflation of the cuff and consequent airway damages and postoperative complications as airway edema, and respiratory insufficiency
- Allow to reach the recommended cuff pressure when installing the tube, improves patient safety
- Allow control of the pressure during intubation
- Very simple operation: Green: OK, Red: Over inflated
- Individually packed in a box, 6/pk

Cat. No	Name	MOQ
1200	FioniaVet Manometer for ET Tube Cuff, 6/pk	1

Tru-Cuff Inflating Syringe For PVC ET tubes

The Tru-Cuff syringe is used for controlling the pressure in the inflated cuff of endotracheal tubes. Over inflation of cuffs has for a long time been an overlooked challenge in anesthesia, especially for cats. Most of the time, when using a traditional syringe, cuffs are overinflated as the assessment of inflation is the result of the feeling/sense of the operator.

Features:

- Avoid under/over inflation of the cuff and consequent airway damages
- Allow to reach the recommended cuff pressure improves patient safety
- Very simple operation: Green: OK, Red: Over inflated
- 3/pk

Cat. No	Name	MOQ
1404	Tru-Cuff Inflating Syringe, 3/pk	1

FioniaVet HME-Filter

FioniaVet HME (Heat and Moisture Exchange) Filters ensure safety and comfort during veterinary anesthesia and critical care by capturing moisture from exhaled air and re-delivering it during inhalation, simulating the natural humidification process.

- Optimal Moisture Retention: Prevents airway dryness, reducing the risk of mucus plugging, irritation, and infection.
- Effective Filtration: Blocks 99.99% of bacteria and viruses for superior infection control.
- Versatile Design: Compatible with systems for animals of all sizes, from cats to large dogs.
- Lightweight and Compact: Minimizes dead space and prevents respiratory fatigue.

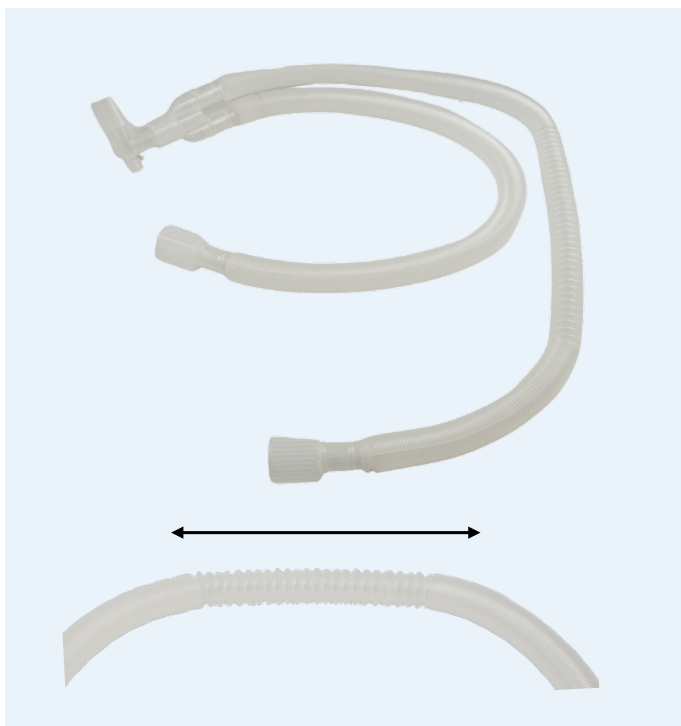

Applications

- Maintains airway health during anesthesia.
- Essential for ICU settings requiring prolonged respiratory support.
- Sterile
- 10/pk

Cat. No	Recommended Tidal Volume (ml)	Dimensions (mm)	Weight (g)	Dead Space (internal volume ml)	Moisture Output (mgH2O/lair)	Resistance (cm H2O)	Bacterial/viral efficiency (%)

904542	FioniaVet HME-filter, Rec. Tidal volume 150-1500 ml, Sterile, 10/pk	1

FioniaVet Extendable Anesthesia Y-Patient Circuit, Small Animal

The FioniaVet extendable Y-circuit is designed to deliver anesthetic gases with minimal resistance. Its special highly extendable tubing allows adjustable length and flexible positioning, accommodating various sizes of patients while ensuring consistent airflow. The circuit supports efficient ventilation and patient stability during anesthesia. As the material is ultra lightweight and extendable it also saves up space in storage. Available in two sizes- for-/ + 10 kg, though individual evaluations are always necessary.

Features:

- Hose size <10 kg, ID/OD 15 mm/21.3 mm
- Hose size >10 kg, ID/OD 22 mm/25.8 mm
- Extentable tubing allows flexible length adjustment
- Lightweight
- Latex- and DEHP free

4 Anesthesia

Cat. No	Name	MOQ
904510	FioniaVet Extendable Y-Circuit, Small Animal <10 kg, 2 m, 10/pk	1
954512	FioniaVet Extendable Y-Circuit, Small Animal >10 kg, 2 m, 10/pk	1

FioniaVet Corrugated Anesthesia Patient Y-Circuit, Small Animal

The FioniaVet corrugated anesthesia circuit is a very flexible tubing with ridges. The ridges prevent the tubing from kinking and collapsing, maintaining consistent internal diameter with efficient airflow and ventilation. The corrugated circuit is designed to minimize the amount of dead space helping to prevent the re-breathing of carbon dioxide and promoting better gas exchange. The corrugated tubing is lightweight which improves handling for healthcare professionals and increases patient comfort. Available in two sizes- for-/ + 10 kg, though individual evaluations are always necessary.

Features:

- Hose size <10 kg, ID/OD 15 mm/17.8 mm
- Hose size >10 kg, ID/OD 22 mm/25.8 mm
- Corrugated flexible tubing
- Lightweight design
- Latex- and DEHP-free

Cat. No	Name	MOQ
904516	FioniaVet Corrugated Y-Circuit, Small Animal <10 kg, 2 m, 10/pk	1
904518	FioniaVet Corrugated Y-Circuit, Small Animal >10 kg, 2 m, 10/pk	1

FioniaVet Smoothbore Anesthesia Y-Patient Circuit, Small Animal

The FioniaVet smoothbore circuit features specially designed tubing with a smooth inner surface that reduces turbulence, allowing anesthetic gases to flow more efficiently with minimal resistance. This design also minimizes the buildup of water from condensation and prevents particles or debris from adhering to the surface, reducing the risk of blockages and ensuring continuous gas flow, which enhances patient safety.

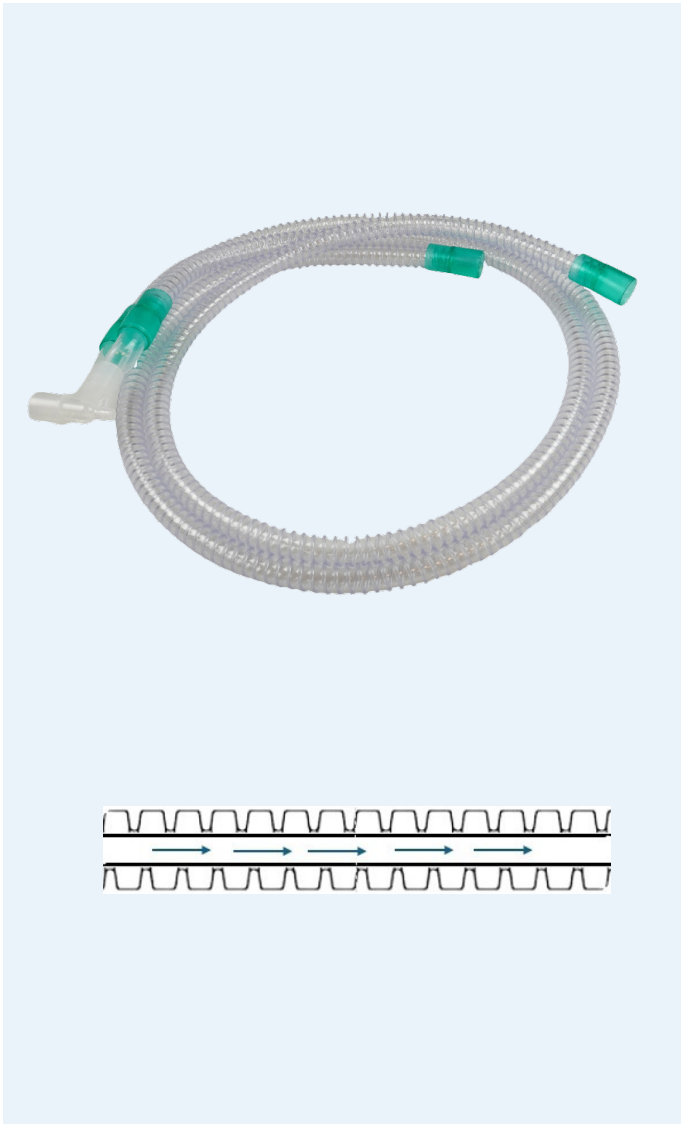

The smooth inner surface is also easier to clean and less prone to accumulating contaminants, reducing the risk of infection and improving overall system hygiene. Additionally, the tubing has a reinforced outer layer, making it highly resistant to wear and tear, ensuring durability through repeated use.

Soft, flexible green connectors provide secure, kink-free attachment to both the unit and the patient, ensuring safe and reliable operation.

Available in two sizes- for +/- 10 kg, though individual evaluations are always necessary.

Features:

- Hose size <10 kg, ID/OD 14.8 mm/19.5 mm
- Hose size >10 kg, ID/OD 19.2 mm/23.5 mm
- Smooth inner surface with minimal resistance and optimal flow
- Reduced water buildup
- Easy to clean
- Latex- and DEHP free
- 10/pk

Cat. No	Name	MOQ
904520	FioniaVet Smoothbore Y-Circuit, Small Animal <10 kg, 2 m, 10/pk	1
904522	FioniaVet Smoothbore Y-Circuit, Small Animal >10 kg, 2 m, 10/pk	1

FioniaVet Coaxial Anesthesia T-Patient Circuit, Small Animal

The coaxial circuit is compact, easy to handle, and highly efficient in conserving heat and moisture. The exhaled gases in the outer tube help warm the incoming gases in the inner tube helping to maintain the patient's body temperature during prolonged procedures. The coaxial design also minimizes dead space compared to other systems, which reduces the amount of re-breathed air and limits the buildup of carbon dioxide, enhancing gas exchange and ventilation efficiency. Made from lightweight and flexible material, the circuit is easy to adjust during surgery without adding extra weight or tension to the patient's airway.

Features:

- Outer hose, ID/OD 25 mm/31 mm
- Inner hose, ID/OD 14.1 mm/19.5 mm
- Efficient heat and moisture conservation
- Reduces dead space
- Lightweight
- Latex- and DEHP-free

Cat. No	Name	MOQ
904532	FioniaVet Coaxial T-Circuit, Small Animal <10 kg, 2 m, 10/pk	1

FioniaVet Anesthesia Scavenging Hose, Small Animal

The FioniaVet scavenging hose is designed to work in conjunction with the FioniaVet Anesthesia Gas Filter Canister (Cat. No. 90810) to safely remove waste anesthetic gases exhaled by the patient or that escape from the anesthesia circuit during medical procedures. If not properly managed, these waste gases can accumulate in the operating room, posing health risks to both medical personnel and patients. The scavenging system effectively vents these gases away from the working environment. The scavenging hose is available in a 10-meter roll, featuring segments of 50 cm that can be easily cut to the desired length.

Features:

- Help preventing waste anesthetic gases during procedures
- ID/OD 22 mm/25.8 mm
- Segments of 50 cm to cut
- Lightweight
- Latex- and DEHP-free

Cat. No	Name	MOQ
904534	FioniaVet Scavenging Hose, 22 mm, 50 cm segment, 10 m	1

FioniaVet Connectors for ET tubes

Economic plastic connectors for endotracheal tubes.

Features:

- 18 pcs of 15 mm standard connectors, sizes: 2 to 11 mm
- Lined up in transparent dispenser
- Packed in a transparent plastic box
- Not autoclavable
- Available as a complete kit, or single size

Cat. No	Name	MOQ
90600	FioniaVet Kit of 18 Connectors for ET tubes	1

AUTOCLAVABLE

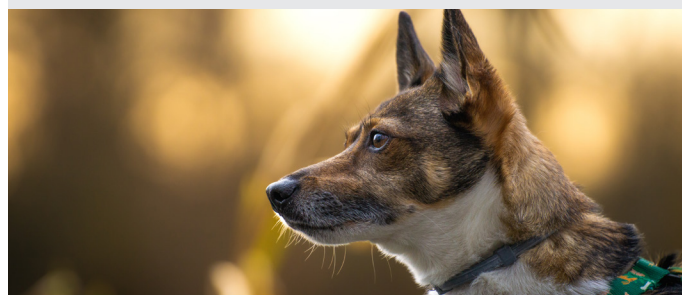

Multi-use Surgical Skin Stapler 35W

Multi-use fully autoclavable handle and cartridge refill. Skin staplers are becoming more and more popular in veterinary surgery as an alternative to sutures. Disposable staplers can only be used once, and 7-8 staples are used in an average surgery. The handle, cartridge and remaining staples must be disposed and are an environmental burden.

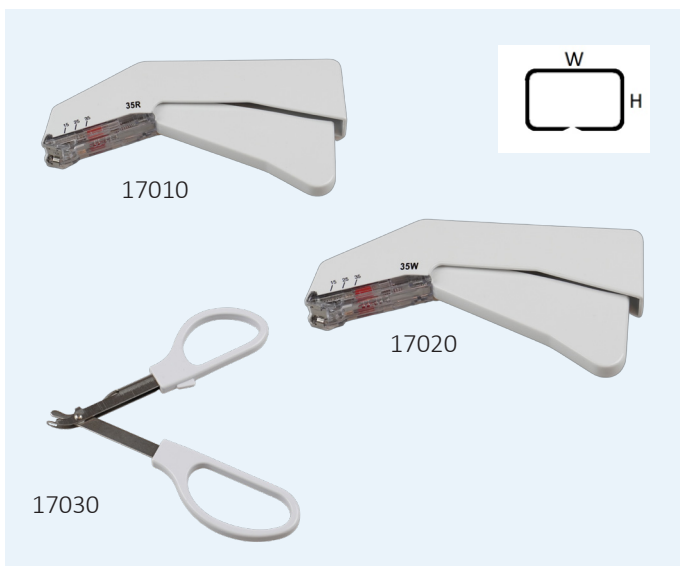

Once autoclaved, this multiuse stapler and the staples can be reused, thus all 35 staples in the cartridge are used during several surgeries.

Features:

- Fixed angled head allows easy visualization during closure
- Simple to reload cartridges, for best results autoclave handle and cartridge separately, 10 minutes at 132°C
- View of remaining staples because of clear bottom
- Light weight but durable with comfortable ergonomic grip
- Handle measures: L 16.5 cm, W 7.6 cm, H 1.3 cm
- Cartridge measures: L 60 mm, W 25 mm, H 5 mm
- Staples are 316 L surgical stainless steel
- Skin Staple measures: H 4 mm, W 6.5 mm
- Reduced environmental burden compared to single use staplers
- Autoclaving instructions available

Cat. No	Name	MOQ
1501h	Multi-use Skin Stapler 35 W, incl. 35 staples, Sterile, 1/pk	1
1501f	Multi-use Refill Cartridge with 35 staples, 4 x 6.5 mm, Sterile, 5/pk	1

FioniaVet Skin Staplers

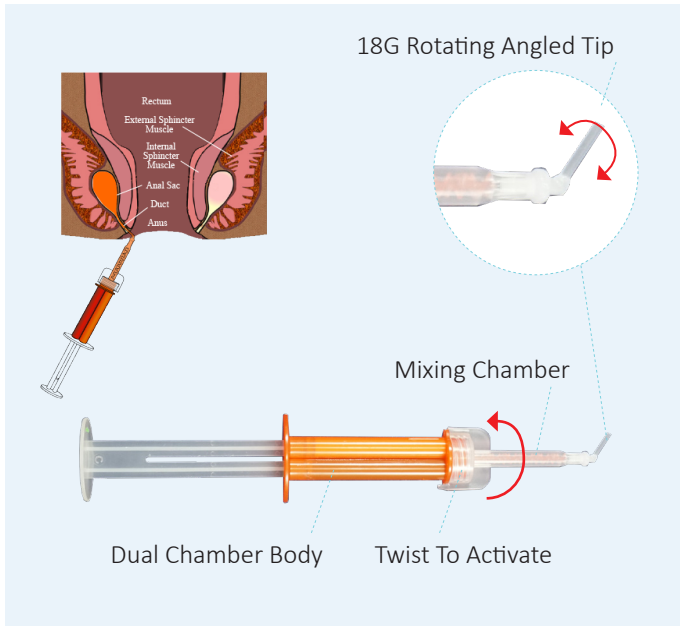

FioniaVet single-use skin staplers are available in sizes W and R.

They are used for quick and safe closure of small cuts and surgical wounds.

Features:

- Capacity :35 staples
- Size Regular R 6.0 x H 4.0 mm (closed staple)
Wire diameter 0.63 mm
- Size Wide W 7.0 x H 4.5 mm (closed staple)
Wire diameter 0.63 mm
- Single packed, sterile
- 10/pk

FioniaVet Incise Drape with Iodine

FioniaVet Incise Drape with iodine helps to create a barrier against bacteria in the wound itself, migration from the wound edges, and around the incision site during the surgery.

The film is transparent, polyurethane, anti-static and non-reflective, which gives clear visibility in the incision area. It is semi-permeable and liquid- and bacteria-proof and is permeable to gases and moisture evaporation leaving, the skin in good condition during the surgery.

The drape securely adheres to the skin, keeping the film in place, even when fluid is used during surgery, and prevents the use of hooks.

The film is comfortable, flexible, and elastic and is suitable to use even in difficult areas of the body and enabling movement in e.g. limbs during surgery.

Features:

- Comfortable and flexible
- Adheres to the edge of the wound
- Non-reflective surface
Liquid-and bacteria-proof
- Latex-free and hypoallergenic
- 3 cm liner in each side for easier application
- Recommended for all kinds of surgeries

Cat. No	Name	MOQ
289102	FioniaVet Incise Drape with Iodine, 15 x 26 cm (15 x 20 cm adhesive area), Sterile, 10/pk	1
289104	FioniaVet Incise Drape with Iodine, 30 x 26 cm, (30 x 20 cm adhesive area), Sterile, 10/pk	1

Avian/Exotic Adhesive Drape

The Drape is a versatile drape used for smaller animals like birds and exotic animals, as well as for cats and small dogs. The material is a very strong impervious transparent plastic material, that keeps the animal dry while allowing for continuous visualization and monitoring during surgery. The adhesive part is 12.5 x 12.5 cm and is placed over the surgical site after removing the white paper. The size of the incision hole is 5 x 4 cm

Features:

- Clear strong plastic material
- Individually wrapped
- Sterile

Cat. No	Name	MOQ
259XS	Avian Exotic Adhesive Drape, 61 x 61 cm, hole 5 x 4 cm, 5/pk	1

FioniaVet Surgical Pack Wraps

Titanium Plates

With Extension

FioniaVet Titanium Plates are designed for application in various veterinary surgical procedures that involve securing a suture in a delicate surface, excluding joints. Their primary utilization is found in equine upper respiratory surgery, in these scenarios, these plates function as a method to firmly affix a prosthesis to either the thyroid cartilage in the “Laryngeal Tie Forward procedure” or the cricoid cartilage in the “Tie Back procedure”.

Kitty Kollar®

Protective collar for esophagostomy tubing

This patented fabric collar is designed to protect the feeding tubes (i.e. FioniaVet Cat. No 562020) when used in an esophagostomy. The collar is adjustable and secured by quality Velcro and features a hole for the feeding tube. The feeding tube can then be fixed to the collar by a second Velcro. Included are 6 cotton pads with a hole, are provided to place between the collar and the skin and absorb exudates and protect the wound from external contamination.

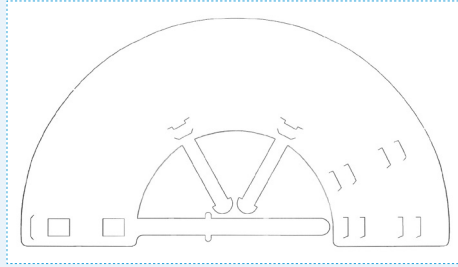

This user-friendly collar is designed to be installed at the clinic and for the owner to change the pads at home in the natural environment of the pet. The owner does not need training to change the bandage or to go to the clinic.

Features:

- May also be used in tracheotomy
- Machine washable (cold) collars without shrinking, hang dry
- Ease of application and removal
- Lowered risk of tube removal by animal
- Decreased risk of wound trauma
- Can leave in place for radiographs, MRI, chemotherapy and other procedures
- Aesthetical and comfortable solution, orders are delivered as a mix of different colors

Vet-LITE™ Casting Bandage

Vet-LITE™ is intended for construction of all common orthopedic casts and splints. Can be re-heated and re-shaped numerous times for the same animal, which saves time, money and reduce waste.

The casting bandage is made of an open structure cotton base impregnated with a non-toxic polymer, which makes it completely safe for patient and practitioner to apply and to wear, even if the animal should lick or chew the bandage. Vet-LITE™ is extremely strong, which reduce the number of layers applied and is therefore also a lightweight bandage. Vet-LITE™ is ready for full load bearing after 30 min. Instruction for use included in all packages.

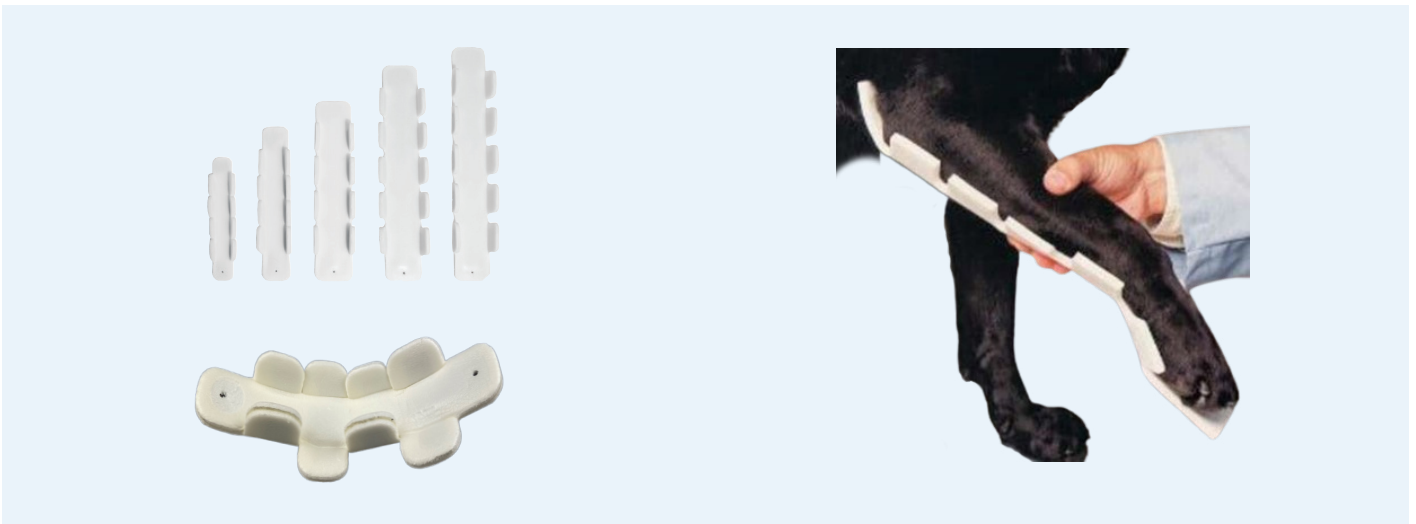

Features and benefits:

- Biodegradable. Can be composted after use
- Non-toxic to patient and practitioner
- Latex free
- Open structure gives excellent ventilation, which reduces risk of skin irritation.
- X-ray transparent
- Practical dispenser box 10/pk

Cat. No	Name	MOQ

FioniaVet Wound Drainage System

FioniaVet Closed Wound Drainage System is an active suction drain consisting of:

- Flat, perforated, flexible 25 cm silicone drain
- 80 cm silicone tube
- 100 ml compressible reservoir
- 15 cm trocar for installation of the drain

Benefits of active suction wound drainage system :

- Use of suction for active removal of exudates and reduction of dead space
- Exudate collection in a closed system
- Lower risk of ascending infection, because of the long 80 cm silicone tube
- Cleaner to manage
- Skin protection
- Easier qualitative and quantitative assessment of exudates
- Sterile single packed, 10/pk

Cat. No	Name	MOQ
608020	FioniaVet Closed Wound Drainage System, 100 ml bulb, 7 mm drain, Sterile, 10/pk	1

Wound Drainage System- Procedure

Procedure description:

- Make an incision
- The trocar is used to lead the tube in long wound, i.e. abdominal
- Without trocar, introduce the distal perforated end of the drain (silicone) and push it into the wound
- Once introduced, stitch the plain transparent drain in situ
- Connect the plain transparent drain to the bulb
- Squeeze the air out of the bulb
- Put the cap on the top of the bulb, thus creating vacuum. The bulb will then aspirate the exudates of the wound
- Control the bulb on a regular basis, according to size of the wound and the degree of exudation
- The quantity of exudates can be read on the graduation of the bulb
- Registering the volume of exudates before emptying the bulb, allow you to monitor the wound drainage and healing in a simple and cost-effective way
- To drain, remove the cap and the drain from the top of the bulb
- Every time you drain, make a record of the volume of exudates in the bulb

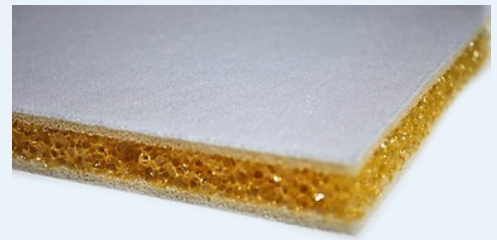

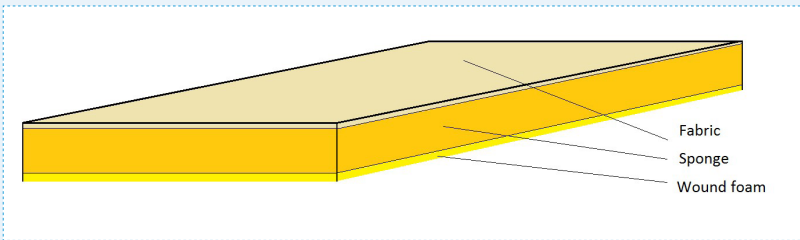

FioniaVet Penrose Latex Drains

Penrose drains used for a variety of applications.

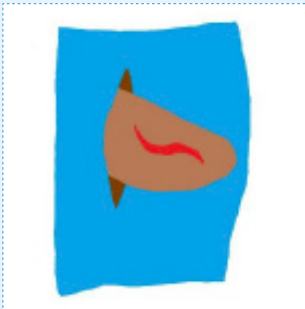

Features:

- Pure latex
- Length 40 cm
- Diameter: 3.0 mm, 6.25 mm, 10 mm, 15 mm

FioniaVet EquiDress Poultrice Dressing

EquiDress is a veterinary multilayer, high absorbent poultrice dressing that can be applied in 3 ways:

- Dry dressing: On an open wound to stop bleeding, protect from further infection, draw out exudates and speed the healing.
- Cold wet dressing: For cooling and keeping a moist environment.
- Warm wet dressing: For stimulating blood flow and hydrate tissue.

EquiDress can also be used post-exercise to prevent “leg filling” / edema and support tendons and ligaments.

Features:

- Chemical-free dressing, no boric acid that might interact with others care products as hydrogel or medical honey.
- Contains 6 g Tragacanth, a natural gum preventing the dressing adhering to the wound.
- 1st layer: nonwoven
- 2nd layer: long fiber natural medical grade absorbent cotton
- 3rd layer: thick nonwoven
- 4th layer: thin impermeable plastic film

Cat. No	Name	MOQ
451150	FioniaVet EquiDress Poultrice Dressing, 10/pk	1

FioniaVet Polster Bandage with Adhesive

FioniaVet Polster Bandage is a very soft and elastic bandage with excellent stability, so the foam does not collapse even during longer period of compression from a bandage or splint. The bandage has a strong adhesive on one side with paper line throughout the roll for easier application. Adheres to skin and fur. Do not apply directly on wounds. The adhesive does not leave any residue. The foam is very porous, which increase ventilation to the skin, and the elasticity makes it possible to bandage in difficult-to-bandage areas of the body like hocks and hooves or to use when fixating e.g. wound dressings and monitor pads.

Features:

- Soft and elastic
- Latex-free
- Does not collapse under compression
- Adhesion on one side
- Does not leave any residue
- Easy to apply, even in tricky body areas

Cat. No	Name	MOQ
420406	FioniaVet Polster Bandage, 14 cm x 200 x 0.5 cm. 1/pk	1
420404	FioniaVet Polster Bandage, 9 cm x 2 m x 5 mm 1/pk	6

FioniaVet EquiGam

Highly absorbent padding

Highly absorbent cushioned padding designed for leg support, protection, insulation, and wound care. This highly absorbent padding is ideal for protection, insulation, and absorbency. It is a high-quality gauze-covered medical absorbent cotton wool for wound protection and management. The medical grade bleached absorbent cotton wool features fibers 2-2.5 cm in length, covered with gauze threads at a density of 18 x 26 per inch².

Features:

- Provides support and protection for fetlocks, hocks and tendons and joints
- Commonly used in a Robert Jones bandage
- Excellent heat insulation, keeping tendons and muscles warm
- Ideal for wound padding
- Offers superior protection for wounds, whether dry, discharging, or infected
- 3 sizes: 15 cm, 30 cm and 45 cm
- 10/pk

90590	Aerosol Chamber for Metered dose inhaler, S/M, 5/pk	1
90592	Aerosol Chamber for Metered dose inhaler, M/L, 5/pk	1

Obstipation Foley Catheter

With Extension

Severe constipation or obstipation in small animals is a challenging presentation. Fecal material dries into hard balls. Megacolon in cats can be a repetitive situation.

A standard treatment approach is various types of enemas or digital manipulation. Care must be taken not to traumatize or injure the distal colon.

The Walcott Obstipation Foley Catheter was designed specifically to be inserted rectally with lubrication. The balloon is inflated after placement beyond the first fecal ball. Additional enema or lubricant can be infused after inserted. 8 small lateral eyes before balloon and 6 lateral eyes past the balloon give a wide range of infusion. The small, firm semi-rigid catheter can be used to massage out fecal material slowly then repeated until all fecal material is safely removed.

Features:

- Smooth bullet distal tip
- Special extension tip can add an additional 12cm if deemed is necessary
- Female Luer Lock proximal fitting
- Balloon can be inflated to 6 ml
- Length: 40 cm + 12 cm extension
- Inner diameter 32 mm, outer diameter 5 mm
- 5/pk

Cat. No	Name	Fr	Inner Ø	Outer Ø	MOQ
1615F	Obstipation Foley Catheter, 39 cm with 12 cm Extension Line, Sterile, 5/pk	15	3.1 mm	5 mm	1

FioniaVet Enema Syringe, Higginson

With Bulb, 70 cm

Higginson enema syringe and in-line bulb used for colonic irrigation.

One-way valve so the water is not sucked back up into the tube. Bulb capacity: 55 ml.

To help eliminate obstructions do gentle pumping allowing the solution to transfer into a cavity.

Features:

- Length 70 cm including syringe
- Bulb capacity 55 ml
- Non-return valve
- Can be connected to a rectal catheter
- Latex
- Non-sterile
- Bag of 5/pk

Cat. No	Name	MOQ

- 10/pk

Cat. No	Name	MOQ
612015	FioniaVet Dog Insemination Catheters, Sterile, 10/pk	50

Ear Speculum Cleaning Device

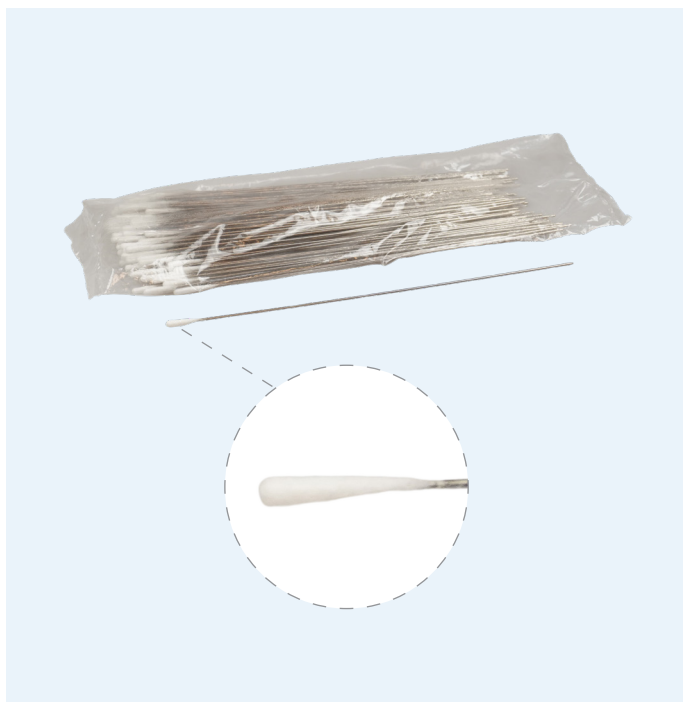

Any ear examined with an otoscope result in a contaminated ear cone speculum. Wax or sebum tend to cling readily to the ear speculum. This can transfer bacteria, i.e., Pseudomonas, yeast, mites, and other microbes to the next patient. The speculum needs to be cleaned or disinfected between patients.

The device uses specially designed cleaning brushes in a disinfectant solution to accomplish this job. It should be readily available in every exam room or anywhere an otoscope is used. Weekly cleaning is recommended and suggest attaching a piece of tape with last cleaning date to base of the device. Brushes should be replaced after showing signs of heavy wear. Warranty: Limited one year warranty against defects in manufacturing or materials from date of purchase, 3 months on brush components.

Features:

- Simple and quick way to clean almost all speculums
- Compatible with most disinfectants
- Height 13.5 cm, diameter: 3 cm, weight: 140 g
- Packed in a plastic display
- 1/pk
- Kit of brushes available as spare part, 1/pk

Cat. No	Name	MOQ
1184	Ear Speculum Cleaning Device, 1/pk	1
1184D1	Brushes for Ear Speculum Cleaning Device, 1/pk	5

Stainless-Steel Cotton Buds 15 cm

Head 2.2-2.7 mm

Shape. Bend. Reach.

Our stainless-steel cotton buds are designed to bend and hold their shape, giving you precise access to small or hard-to-reach cavities like ear canals, nasal passages, and delicate wound care. Perfect for veterinary procedures that demand flexibility and control.

Features:

- Malleable Design: Easily bends to fit tight or awkward spaces.
- Precision Access: Ideal for ear canals, nasal passages, and delicate wound care.
- Durable & Hygienic: High-quality stainless steel ensures reliability and easy sterilization.
- Safe for all Patients: Latex- and DEHP-free.
- 100/pk

FioniaVet

FioniaVet is the brand name of the Danish company Bjepto ApS and was established in 2010.

The company is owned and run by Mr. Torben Bjerning and Dr. Martin Eberhardt.

Torben Bjerning has 20+ years experience with international sales of veterinary and medical consumables and disposable items.

Dr Martin Eberhardt graduated as a veterinary surgeon and has 20 + years experience from mixed veterinary practice followed by a leading position in international product development of consumables for the veterinary industry.

We manufacture and supply veterinary specific consumables to the Danish veterinary practices and the international distributors in more than 50 countries.
