# EICKEMEYER® NARKOVET®II NARKOSEGERÄT

## Your Veterinary Anaesthesia Solution

The EICKEMEYER® NarkoVet II is a state-of-the-art anaesthesia machine specifically designed for veterinary medicine. This compact and visually appealing device features a clear and organized structure of all components, ensuring ease of use. With the included mounting plate, an optional O<sub>2</sub> concentrator can be conveniently installed directly on the stable, mobile stand, optimising space and functionality in your practice.

- O<sub>2</sub> Flowmeter (0.1 – 4.0 l/min)
- Oxygen bypass (O<sub>2</sub> flush)
- Isoflurane vaporiser, key filled
- CO<sub>2</sub> absorber lime container with quick-change system
- Infinitely adjustable pressure relief valve
- Pressure gauge to display the system pressure
- External fresh gas outlet for open system
- Easy change of circuits using a toggle switch
- Hanger for hygienic storage of patient tubes
- Holder for anaesthetic gas filter
- Incl. O<sub>2</sub> concentrator tray, ventilator tray (NarkoVet SAV II), patient tubes (coaxial / open), rebreathing bags (0.5 l, 1 l & 2 l) and anaesthetic gas filter with scavenging hose

213130

€ 2300,-

**Wall mount for NarkoVet II** The wall mount allows the NarkoVet II to be mounted on the wall instead of on the mobile stand, saving space.

21313002

€ 110,-

## Tray for NarkoVet II

- For monitoring devices
- Dimensions (cm): 29.5 × 19.5

21313003

€ 45,-

## NarkoVetAnaesthetic Starter Kit

Complete Set, consisting of:

- Safety fill neck for isoflurane
- 3 soda lime, 4,5 kg, with color change
- Breathing bag, 3 l
- 6 plastic breathing masks (size 1 – 6)
- Complete set of EickTube tracheal tubes, 23 pcs. (2,0–10,0 mm)
- Laryngoscope ECONOMY

213131

€ 280,-

## EICKEMEYER® NARKOVET SAV II SMALL ANIMAL VENTILATOR

vetpood.ee

The main cause of serious anaesthetic incidents in veterinary practices is the patient's unnoticed apnoea. Routinely controlled ventilation helps to drastically reduce the risk of anaesthesia and thus ensures the optimal safety of your patients. Ventilation is implemented via a high-performance electronic turbine, which means that no drive gas (e.g. from an external compressor) is required. The settings on the NarkoVet SAV are extremely user-friendly, just set the patient's body weight and the intelligent software automatically adjusts all other ventilation parameters.

- Electronically driven by a high-performance turbine
- Precise ventilation with a minimum tidal volume down to 4 ml
- Once inputting animal weight, smart respiratory parameters can be called up
- Ventilation modes: Volume-controlled ventilation (VCV), pressure-controlled ventilation (PCV) and Positive end-expiratory pressure (PEEP)
- Multiple alarms and clear handling prompts ensure high patient safety
- Clear "at a glance" ventilation parameters thanks to the large 7-inch color display
- Auto system leak test with graphical guidance for quick start
- Ventilation rate: 2 – 60 bpm
- Tidal volume: 4 – 1,500 ml
- Maximum ventilation pressure: 5 – 50 cmH<sub>2</sub>O
- Release pressure -10.0 – -4.0 cmH<sub>2</sub>O
- Patient weight range: 0.4 – 150 kg
- Dimensions (in cm): L 29.1 x W 33.6 x H 46.2
- Weight: approx. 8.5 kg

213020

€ 2754,-

## OXYVET IV OXYGEN CONCENTRATOR

- Saving costs and effort: No oxygen bottle required, lower power consumption
- Simple operation thanks to the clear arrangement of the setting functions and monitoring information
- High patient safety through visual and acoustic alarms
- Noise level: ≤ 55 dbA
- Flow rate continuously adjustable from 0.5 – 5 l/min
- Output of up to 93 % oxygen (± 3 %)
- Dimensions (in cm): L 34 x W 37 x H 67
- Weight: 15.3 kg Incl. Bubble humidifier and O<sub>2</sub> hose
- 1 year warranty

213180

€ 580,-

# EICKEMEYER® NARKOVET PRO ANAESTHETIC UNIT

## Maximum Safety for Your Patients

The main cause of serious anaesthesia incidents in veterinary practices is the patient's unnoticed apnoea. Routinely controlled ventilation helps to drastically minimise this risk, ensuring optimal safety for your patients. The EICKEMEYER® NarkoVet PRO features an integrated ventilator powered by an electronic turbine, eliminating the need for drive gas from an external compressor. To protect your patients and staff, the system performs an automatic leak test at start-up.

## Anaesthesia Machine

- O<sub>2</sub> Flowmeter (0.1 – 4.0 l/min)
- Oxygen bypass (O<sub>2</sub> flush)
- Isoflurane vaporiser, key filled
- CO<sub>2</sub> absorber lime container with quick-change system
- Infinitely adjustable pressure relief valve
- Pressure gauge to display the system pressure
- External fresh gas outlet for open system
- Easy change of circuits using a toggle switch
- Weighing scale for anaesthetic gas filter

## Ventilator

- Electronically controlled, no compressed air source required
- All ventilation parameters on a large, 8" touchscreen
- Patient safety through acoustic and visual alarms
- Automatic calculation of ventilation volume based on weight
- Patients from 0.5 – 150 kg can be ventilated
- Tidal volume from 5 ml, for precise ventilation of tiny patients
- Supported ventilation modes:
  1. Volume-controlled ventilation (VCV)
  2. Volume-supported (VS)
  3. Pressure-controlled ventilation (PCV)
  4. Synchronised intermittent mandatory ventilation – pressure-controlled (SIMV-PC)
  5. Continuous positive airway pressure / pressure-supported ventilation (CPAP/PSV)
  6. Pressure-regulated volume-controlled (PRVC)
- Synchronised intermittent mandatory ventilation – Pressure-regulated volume-controlled (SIMV-PRVC) Pressure-supported ventilation protection (PSVPro)
- Ventilation rate: 4 – 100 bpm
- Tidal volume: 5 – 1,500 ml
- Maximum ventilation pressure: 3 – 50 cmH<sub>2</sub>O
- Trigger pressure -20.0 to -1 cmH<sub>2</sub>O
- Mains and battery operation, battery life min. 2 hours

## Further Specs

- Incl. O<sub>2</sub> concentrator tray and patient tube with rebreathing bag (1 l)
- Dimensions (in cm): L 64 x W 67 x H 140
- Weight: approx. 43 kg
- Sevoflurane option available upon request

213040

€ 4500,-

## EICKEMEYER® NarkoVet PRO + AIR

With second flowmeter for medical air

213041

€ 5100,-

**CO<sub>2</sub> Module for NarkoVet PRO The Smart Safety Upgrade for Veterinary Anaesthesia** The new CO<sub>2</sub> Module for the NarkoVet PRO system enables automated adjustment of ventilation based on the patient's exhaled CO<sub>2</sub> levels. The system continuously analyses CO<sub>2</sub> levels and automatically regulates ventilation parameters accordingly. This not only enhances monitoring precision but also ensures that respiratory support is dynamically adapted to the patient's current physiological condition – improving safety and efficiency during anaesthesia.

213045

€ 1300,-

2130401

## LIFEVET CP CAPNOGRAPH AND PULSE OXIMETER

vetpood.ee

The LifeVet CP handheld Capnograph and Pulse Oximeter measures and displays the expiratory CO<sub>2</sub> concentration as well as the respiratory rate, pulse rate and oxygen saturation in dogs, cats and horses. This compact and portable device is very easy to use with its touchscreen display and intuitive interface.

- High resolution 4.3" touchscreen display
- Side-stream capnography
- EtCO<sub>2</sub> concentration: 0 – 150 mmHg
- Respiratory rate displayed in rpm
- SpO<sub>2</sub> range: 1 – 100 %
- Pulse rate: 25 – 250 bpm
- Audible and visual alarms with adjustable volume
- Long-life lithium battery: up to 18 h operating time
- Dimensions (in cm): W 7.7 x H 14.1 x D 3.6
- Weight: 420 g
- Includes: CO<sub>2</sub> tube, CO<sub>2</sub> fi lter, net adapter, USB cable, clip sensor

321880

€ 990,-

## LIFEVET 10C MULTIPARAMETER MONITORS

The LifeVet 10C monitors are modern, powerful patient monitors that are characterised by their high level of user-friendliness, reliable technology and extensive data storage. Thanks to the large display, the vital functions can also be read easily from a distance. It is operated conveniently via touchscreen. Hot keys also provide quick access to the most important functions.

- Multi-parameter display of respiratory rate, pulse rate, oxygen saturation, blood pressure (NIBP), ECG, temperature and capnography (EtCO<sub>2</sub>) in sidestream mode
- High-resolution 10" LED touchscreen with up to 8 curves
- Freely selectable alarm limits and 360° visible alarm display
- Mains and battery operation up to 4 hours
- Dimensions (in cm): W 27 x H 22 x D 17
- Weight: ≤ 4.0 kg
- Incl. Li-Ion battery, NIBP cable with cuff, ECG cable with clamps, SpO<sub>2</sub> sensor with clips, temperature probe, CO<sub>2</sub> adapter, CO<sub>2</sub> cable and water trap

## INFUSOVET SP SYRINGE DRIVER / PUMP

The EICKEMEYER® InfusoVet SP is a highly accurate and reliable syringe pump. The clearly arranged, colour coded buttons make it particularly easy to use.

- 2.5" backlit LCD display
- Compatible with standard 5, 10, 20, 30, 50 and 60 ml syringes
- Safety when injecting: precise control of flow rate and injection volume
- High patient safety through acoustic alarms
- Quick start function
- With clamp for IV pole

### Technical specifications

- Mains and battery operation, battery life up to 6 hours
- Splash proof (IP34)
- Dimensions (in cm): L 33 x D 12.6 x H 11
- Weight: approx 1.8 kg

402095

€ 590,-

## INFUSOVET IP II INFUSION PUMP

The advanced InfusoVet IP II Infusion Pump combines the latest technology with a user-friendly design to make the administration of fluids and medications more precise and efficient.

- User-friendly thanks to simple programming
- Patient safety thanks to acoustic and visual alarms
- Suitable for blood transfusions
- Stand prevents the infusion line from being disconnected
- Incl. clamp for drip stand
- Side power connection does not protrude into the cage
- Compatible with most pump specific infusion lines. May require calibration.

### Technical specifications

- Flow rate: 0.1 – 2,000 ml/h
- Volume limit: 0.1 – 9,999 ml
- Bolus rate: 0.1 – 2,000 ml/h (auto + manual)
- Occlusion level: 5 levels selectable (150 – 1,125 mmHg)
- Mains and battery operation for up to 4.5 hours
- Splash protection in accordance with IP44
- Dimensions (in cm): W 13 x H 18 x D 12
- Weight: < 1.2 kg

402087

€ 540,-

## EICKWARM AIR WARMING SYSTEM FOR SMALL ANIMALS

vetpood.ee

The EickWarm Air Warming System quietly delivers forced air through optionally available warming mats that are specifically designed to evenly deliver diffused warm air to the patient.

- Safe and effective management of patient body temperature
- Optimal performance through uniform heat distribution
- Extremely powerful and quiet ( $\leq 55$  dB)
- Temperature set points: Ambient air, 32 °C, 35 °C, 38 °C and 43 °C
- Three selectable fan levels (air flow)
- Reliable measurement of the hose outlet temperature
- Multiple alarm options ensure maximum patient safety
- Pole clamp for secure fixation
- Long heat hose (2 m) with flexible fastening clamp
- Compact dimensions (in cm): L 30 x W 37 x H 34
- Weight (including heat hose): 6.5 kg
- Warming mats available separately

648000

€ 690,-

### Trolley for EickWarm Air

## MOECK REUSABLE WARMING MATS

These Reusable Warming Mats are placed under the patient and – thanks to their unique 3D textile structure – ensure optimal heat supply. The mats fit the body's contour perfectly, making temperature control possible in any position and without interruption at the contact points.

- Warm air is distributed evenly under the patient
- Pressure relieving positioning
- Reusable and washable at 60 °C

# EICKEMEYER® OPERATING / TREATMENT TABLES

The EICKEMEYER® X-Base Operating Table is our most popular surgery table. All components are of the highest quality, making this table a great investment in the future of your practice.

- X-Base with 4 individually adjustable feet
- Provides best possible legroom and stability
- Good working posture whether sitting or standing
- X-Aluminium slim lift column with hydraulic or mains operated pump
- Available with stainless steel X-base or heavy square base
- Self-contained, maintenance-free column
- Height adjustable from 72 – 112 cm
- Unidirectional 90° tilt mechanism, one hand control
- Stainless steel top with rounded, anti-drip edges and drain hole
- Two tabletop widths: 50 and 60 cm
- Optional heated tabletop
- Various colour options available

## 602012 / 601555

## EICKEMEYER® SCISSOR TABLE II

vetpood.ee

The EICKEMEYER® Scissor Table II is perfect for raising and transporting larger patients without unnecessary handling and movement. The table is available in 8 different colours and the optional add-ons make this table a real all-rounder for your practice.

### Additional Options

In addition to the stationary table, you can choose one or more of the following table options:

- Ideal for examination, prep, dental treatment and procedures
- Minimum height of 28 cm allows large dogs to walk onto the table
- Maximum height of 105 cm enables more comfortable examination of smaller patients
- All parts made from high-quality German stainless steel
- Smooth, polished tabletop (60 x 130 cm) with rounded corners, anti-drip edges and a drain hole
- Silent electric operation via foot pedal
- Includes Power Supply and Tie Down Cleats

## SCORE® AMAZONE / JUMPER STOOLS

The ever so popular SCORE® treatment stools now come in fresh colours – real eye-catchers for your practice!

- Comfortable, cushioned seat
- Easily washable synthetic leather
- Smooth running double castors
- Aluminium base diameter: 54 cm

Each

€ 399,-

### SCORE® JUMPER / AMAZONE Balance

The uniquely adjustable Balance mechanism from SCORE® ensures that the saddle moves subtly along with your movements. These 'micro' movements of your pelvis ensure that muscle groups and intervertebral discs are not constantly under severe static strain. This prevents pain, helps you maintain your working posture longer and exercises your core muscles. The degree of movement can be set by your own preference and adjusted by rotating the ring. The balance chairs are also available with lumbar support. This ensures optimal back support and a healthy working posture.

## SCORE® ERGO SUPPORT CHAIR

The SCORE® Ergo Support Chair is specially developed for ophthalmologists. It allows an ergonomic sitting position and offers you comfortable support during long periods of seated work.

Special features of the SCORE® Ergo Support chair are its ergonomically shaped armrests. They can be brought close to the body and provide your forearms optimal support. The height adjustment of the armrests allows an upright sitting position when using a microscope or other precision instrument. The Ergo Support helps you to assume a relaxed posture: the neck, shoulders and back are relieved.

- Easy height adjustment, seat and back angle
- SCORE® Ergo Shape seat with rounded corners
- Compact lumbar support can be easily positioned in the lumbar region
- Strong aluminium base with large wheels
- Height adjustment (with foot control): 52 – 71 cm
- Working height: 80 – 90 cm
- Seat dimensions: Ø 40 cm
- Foot cross dimensions: Ø 68 cm

## DR. MACH LED 130 PLUS / 130 F EXAMINATION AND THEATRE LIGHT

The DR. MACH LED 130 has been our best selling LED light over the past years with hundreds of installations across the UK and Europe. Whether in prep, dental or in the operating theatre, the LED 130 supports veterinary professionals with superior technology, invariable reliability and great design.

- Colour rendering index: Ra  $\geq$  95
- Electric dimmer: 50 – 100 %
- Colour temperature: 4,300 kelvin
- Light head diameter: 33 cm
- Number of LEDs: 19
- Power consumption: only 28 W
- Optional sterilisable handle (Item no. 611266)

611737

## EICKTRON EVAC SMOKE EVACUATION SYSTEM

The EickTron EVAC effectively extracts and filters vapours and aerosols generated during electrosurgical procedures. It eliminates unpleasant odours, reduces bacterial and viral contamination, and ensures clear vision. The suction can be controlled automatically or manually with a footswitch. The suction power is individually adjustable.

- Maximum suction power: 1000 L/min
- Maximum suction power with filter: 300 L/min
- Maximum suction force: 250 mbar
- Filter efficiency: 99.999 %
- Dimensions (cm): W 37 x H 14.4 x 31.9
- Weight: 4 kg
- Incl. EickTron EVAC, starter filter (5-hour runtime), suction hose set, handpiece holder, power cable

323160

€ 1095,-

### EickTron EVAC Filter 20

The EVAC Filter 20 with ULPA and activated carbon technology offers reliable filtration of the finest particles and effective reduction of unpleasant odours and bacterial and viral contamination.

- Runtime: 20 hours
- Particle filtration: down to 0.12 micrometers
- Filter technology: ULPA with activated carbon

## EICKVIEW KOMPAKT ENDOSKOP

vetpood.ee

The specially developed EickView Compact Endoscope provides the perfect solution for rhinoscopy, tracheoscopy and vaginoscopy in small animals due to its small diameter (3.8 mm) and integrated working channel.

- Outer diameter Ø 3.8 mm
- Integrated working channel Ø 1.3 mm
- Working length 14 cm
- Viewing angle: 30°
- Two integrated stopcocks

## EICKVIEW PORTABLE LED VIDEO ENDOSCOPES

Due to their extremely compact dimensions, the EickView LED Video Endoscopes are the perfect solution for broncho-, gastro-, rhino-, tracheo, uretero- and vaginoscopy in dogs and cats and for the examination of the upper respiratory tract in horses. The devices work independently, as the powerful LED light source and the high resolution camera of the stand-alone systems are integrated in the distal end of the endoscopes. In addition, the folding 3.5" monitor allows both direct video and image playback as well as storage via SD card. Furthermore the EickView LED Video Endoscopes can be connected to a separate monitor.

- Folding 3.5" monitor for video and picture playback
- Recording and archiving on integrated SD card
- File formats: JPG, AVI
- Integrated powerful LED light source
- Rechargeable Battery with up to 3 hours of operation
- USB port and video out
- Depth of field: 5 – 60 mm
- Direction of view: 0°
- Field of view: 110°

## EICKVIEW 5-IN-1 ENDOSCOPY SYSTEM

### EickView 5-in-1 Endoscopy System

The EickView 5-in-1 endoscopy system is a true all-rounder for veterinary medicine. The easy-to-use, mobile device offers the option to work with both, flexible and rigid endoscopes. This means that all types of endoscopy can be covered with just one device – from diagnosis to surgical procedures.

The EickView 5-in-1 combines a large, 15.6" Full HD display, a powerful LED light source, a connection for flexible endoscopes from the EickView HD series with air and water pump as well as digital data storage via SD Card in one system.

### EickView HD and HD+ Video Endoscopes

The EickView HD and HD+ Video Endoscopes deliver brilliant images for bronchoscopy, gastroscopy and various other applications. The new HD+ Endoscopes are characterised by their reduced outer diameters and enlarged working channels, making them even more variable. Due to the large number of available scope sizes, they are suitable for all applications in small animals and equine.

#### Technical specifications

- Viewing direction: 0°
- Distal end contains 1 CMOS Camera Chip,
- 2 Light Guides, Working Channel,
- Lens Rinsing Nozzle
- Scope of delivery: EickView Video Endoscope,
- Pressure Tester, 2 Cleaning Brushes,
- Cleaning Set, Carrying Case

**EickView 5-in-1 Camera Kit** The EickView 5-in-1 camera with zoom adapter and light guide cable completes the comprehensive package. It allows all standard rigid endoscopes to be connected to the main system.

# EICKVIEW SD ENDOSCOPY SYSTEM

vetpood.ee

## Unlock the future of veterinary care with the EickView SD Endoscopy System!

This state-of-the-art system features a high-quality endoscopy monitor with a large, intuitive touchscreen, seamlessly connecting to three versatile "semi-disposable" endoscopes. This system allows the veterinary practitioner to experience the benefits of flexible endoscopy (Gastroscopy, Bronchoscopy, Rhinoscopy, Ureteroscopy etc.) without the hefty investment of traditional video endoscopes. Each endoscope is equipped with a high-resolution CMOS image sensor and an LED light source, ensuring crystal-clear visuals.

The new EickView 65SD-URS Ureteroscope sets new standards in urology: Thanks to its small outer diameter of just 2.1 mm, the ureter can be visualised even in male dogs – a decisive advantage for minimally invasive diagnostics and treatment. With the EickView SD endoscopy system, you can make precise diagnoses and ensure the best possible care for your veterinary patients.

### EickView SD Endoscopy Monitor

- 15.6" touchscreen with 1,920 x 1,080 Full HD resolution
- Functions: White Balance, Zoom, Freeze, photo (JPG) and video recording (MP4)
- 64 GB storage capacity
- Mains and battery operation, battery life up to 5 hours

## PROFIDENT PLUS FAHRBARE DENTALEINHEIT

The Profi dent PLUS is the result of many years of experience. It offers a wide range of applications for both, general practitioners and dental specialists. It is characterised by its modern design combined with high mobility. The stand is adjustable in height and all handpieces are arranged within easy reach of the operator. When a handpiece is removed from its holder, the Profi dent PLUS automatically supplies air and water to it.

### High Speed Turbine (300,000 rpm)

- Push button burr change for friction grip burrs (FG)
- Variable burr water cooling facility
- With LED illumination

### Low Speed Air Motor (20,000 rpm) with Straight Handpiece

- For long straight shank burrs (HP), diamond discs and prophylaxis heads
- High torque, forward and reverse rotation
- Optional water cooling facility (item no. 174022)

### Built-in Dental Scaler

- Handpiece with LED illumination
- Includes 5 scaling tips

### 3 in 1 Syringe

- Precise finger tip control of water, mist or dry air
- Water connection to connect external dental scaler
- (e. g. item no. 176870)

### Dental Unit Air Compressor

- Powerful, quiet, low maintenance

### Micro Oil Filter

- Helps extend the life of handpieces

## PROFIDENT HMS HANDPIECE MAINTENANCE SYSTEM

vetpood.ee

### Automated Precision for Handpiece Care

The PROFIDENT HMS is a fully automated maintenance system designed for efficient cleaning and servicing of handpieces, contra-angles, and turbines. It actively helps preserve the value of your handpieces, extends their lifespan, and ensures consistently high performance.

With its intelligent connection system, the unit accommodates up to three handpieces simultaneously. The user-friendly three-program cycle (1, 1.5, or 2 minutes) allows for customised maintenance routines tailored to your workflow.

### Technical specifications

- Maintenance capacity: up to 3 handpieces at once
- One E-type connector for low-speed handpieces and contra-angles
- Two mid west connectors for high-speed turbine handpieces
- Operates via the compressed air supply of your dental unit
- Compact dimensions (cm): W 28 × H 38 × D 27
- Weight: 7.5 kg
- Supplied with 1,000 ml maintenance oil

## DENTANOMIC PERIOSTEAL ELEVATOR SET

DENTANOMIC dental instruments are an innovation in the field of dental surgery and significantly simplify tooth extraction. With the interchangeable blades, the instruments can be quickly and easily adapted to the respective surgical situation. In addition, once the blade wears out, the entire instrument no longer needs to be thrown away. The blades are extra hardened and have a special, very sharp grind.

Set consisting of 4 periosteal elevator blades (2, 4, 6 and 8 mm) and sterilization container

175115

€ 399,-

## DENTANOMIC® EQUINE SET

Following their remarkable success in the small animal market, DENTANOMIC® is proud to unveil the Full Equine Set. Developed in collaboration with Dr. Travis Henry (USA), these cutting-edge dental instruments bring DENTANOMIC®'s innovative technology to equine practitioners around the world.

The Set comes with a full range of 14 Equine Luxation Blades (3 & 5 mm in short, medium and long sizes, with straight, left and right contra-angle shapes). DENTANOMIC® Equine blade edges are narrower than the periodontal ligament space, making luxation much easier.

### DENTANOMIC® thin edged Equine blades can be used in:

Molar Extension Bar: Articulated to allow sideways cutting motion and simultaneous rotation to follow tooth contours. An aid for molar extraction.

New Equine Handles: Optimised for a vertical hold and increased grip. An aid for incisor extraction.

### DENTANOMIC® Equine Set Includes:

- 4x Equine Handles (purple, gold, green and blue)
- 1x Equine Handle Tray
- 1x Molar Extension Bar
- 14x Equine Luxation Blades
- 1x Blade Tray

## EICKEMEYER® PAWSITIONER

vetpood.ee

The Pawsitioner is designed to secure patients for surgery and hands-free diagnostic imaging. It eliminates the need for tie-downs and makes it easy to clip and scrub patients in the prep room then transport them to surgery without having to re-position. The Pawsitioner is also ideal for hands-free radiographic positioning, including V-D, left or right lateral, V-D pelvis for OFA evaluation, rostral-caudal skull views and much more without re-positioning the patient for each radiograph. The cradle may also be used to hold patients for laparoscopy, CT, MRI, myelography and ultrasonography.

## ICARETONOVET PRO TONOMETER

The iCare TONOVET Pro tonometer sets new standards in intraocular pressure (IOP) measurement and is aimed at vets who have the highest demands on accuracy and ease of use. The innovative "Quick Measure" function enables faster and easier measurement of the IOP and significantly shortens the examination time, while the more responsive test tip and the optimised test tip control ensure improved handling and even more precise measurements. The 200-degree positioning freedom makes the TONOVET Pro tonometer an indispensable helper even in emergency situations. The ergonomic display is designed to allow the user to instantly read the measured values.

- Improved user-friendliness
- 200-degree positioning freedom (ideal for equine use)
- More responsive test tip
- Better test tip control improves accuracy
- Display facing the user
- Self-calibrating
- Wireless printing via Bluetooth
- Includes: Transport Case, 100 TONOVET Probes, 4x AA batteries

## HEINE OMEGA 600 INDIRECT OPHTHALMOSCOPE

vetpood.ee

**Discover more. With less weight.** Lighter. Brighter. Better. HEINE kept the best and perfected the rest. Highly comfortable, the HEINE OMEGA 600 delivers a new class of technological innovation, along with the new and unique visionBOOST for significantly better diagnostic even in dense cataracts.

- Most precise diagnostic, up to the far retinal periphery
- Up to 20 % better view in media opacities with visionBOOST
- Lightest High-End Indirect Ophthalmoscope worldwide
- Long-lasting investment due to its robust design
- Easy disinfection thanks to smoothSURFACE

### Most precise diagnostic, up to the far retinal periphery

- Significantly better diagnostic due to unique visionBOOST
- Sharpest fundus image due to superior glass optics
- Brightest fundus image with true colour rendering thanks to our unique LEDHQ – now in even more natural colours
- Best 3D imaging due to our unique Stereoscopic Adjustment
- Technology in dilated and undilated pupils

**Includes** OMEGA 600 Indirect Ophthalmoscope (with battery and +2 D eyepiece), E4-USBC power supply with cable, eyepiece 0 D

## OPTOMED AURORA® IQ FUNDUS CAMERA

The portable, patented AURORA® IQ fundus camera is a high-end retinal imaging device for the most demanding of needs. The user-friendly technology and large screen for instant display of high-quality retinal images, even with non-dilated pupils, make this device a must-have for every ophthalmologist. The included ocular surface lens has adjustable illumination levels, color imaging and cobalt blue for fluorescence imaging. Choose between autofocus or manual operation as desired.

- Complete set including anterior module
- Non-mydratic application possible in a darkened room
- Fast image capture with autofocus or manual operation
- Real-time visibility of the retina
- Large screen
- Detailed examination with 50° field of view
- Ocular surface lens for color imaging and cobalt blue for fluorescence imaging
- Adjustable illumination levels
- Transfer to the digital patient file via WLAN and USB
- Low-noise application
- 2-year guarantee (excluding batteries)
- Scope of delivery: AURORA® IQ fundus camera, retinal module, anterior module, 2 batteries, power supply, cleaning cloth, 2 eyecups, charging station, USB cable, client software for image transfer, carrying case

### Technical specifications

- Field of view: 50° (total field of view: 50 x 40)
- Display TFT-LCD: 4", 800 x 480 pixels
- Operating time: approx. 2 hours with continuous use
- Camera dimensions (in mm): W 122 x H 202 x L 98
- Retinal module dimensions (in mm): W 68 x H 74 x L 160
- Anterior module dimensions (in mm): W 71 x H 80 x L 79
- Camera weight: 526 g

## CRYOPEN XPS CRYOSURGERY DEVICE FOR OPHTHALMOLOGY

vetpood.ee

### Cryosurgery in a Nutshell

This powerful, ergonomic cryotherapy pen delivers a fine jet of nitrous oxide under high pressure, allowing you to work with millimeter precision. The CryoPen XPS is our most compact model and is suitable for intensive and versatile use, especially in ophthalmology.

- State-of-the-art microtechnology for controlled gas flow
- Ultra fine and precise
- Easy to load 8g N<sub>2</sub>O cartridges
- Aluminium housing with 2 micro-applicators
- For intensive yet gentle freezing performance
- Used for lesions, adenomas, distichiasis, epulis, eyelid adenomas, meibomian gland dysfunction, sarcoidosis, warts and other types of lesions, as well as benign tumours and carcinomas

## RETEVET™ PORTABLE ERG

The RETeVet™ portable ERG offers an intuitive interface that allows veterinary ophthalmologists and researchers to perform electroretinograms (ERGs) to measure the retinal function of animals.

- Small, portable and battery powered
- Intuitive user interface
- Real-time results
- All flashes electronically controlled
- Easy USB connection to any PC
- Comprehensive reports in PDF formats
- Anaesthesia is optional (based on the patient)

### Technical specifications

- RGB LED technology
- 15 million colour combinations
- Dimensions (in cm): W 10.5 x H 15.5
- Weight: 240 g
- Includes: RETeVet™ Device, Docking Station, 6 Jet Electrodes, 10 Needle Electrodes, Dust Cover, 3-Plug Electrode Lead, USB Cable, Power Adapter.

## EICKLOXX SMALL OSTEOSYNTHESIS SYSTEM

The EickLoxx Small is a polyaxial locking kit for dogs and cats up to 15 kg.

The system distinguishes itself through the polyaxial placement of the custom-fit screws and combines the advantages of a locking plate system with polyaxial screw placement in  $\pm 15^\circ$  longitudinal and transverse pivoting.

Compared to conventional osteosynthesis systems, the use of locking systems (internal fixation) such as the EickLoxx Small facilitates faster healing of fractures and improved implant strength. It is for this reason that the removal of plates and screws is rarely indicated.

The biologically advantageous titanium plates are available in three sizes and can be cut to the desired length and bent in three planes. Specially designed tools are included to perform this. Titanium also reduces artefacts in post-operative imaging.

EickLoxx Small is a modular system. All implants and instruments are made in Germany using only the highest quality materials.

**185500**

€ 4950,-

## EICKLOXX SMALL CONTOUR OSTEOSYNTHESIS SYSTEM

The EickLoxx Small Contour plate set includes various anatomically preformed osteosynthesis plates for the treatment of fractures of the distal radius and femur, ilium, acetabulum and for arthrodesis of the carpus and tarsus. It complements the cut-to-size plates of the EickLoxx Small osteosynthesis system and is therefore also designed for the treatment of cats and dogs up to 15 kg. The instruments from the EickLoxx Small osteosynthesis system are used in a similar way.

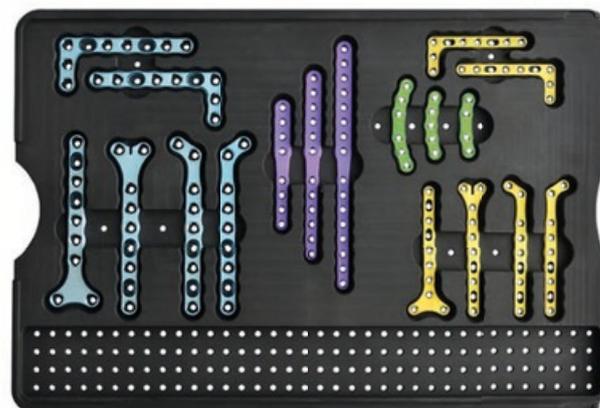

The titanium plates of the EickLoxx Small Contour plate set are available in two plate thicknesses: The 2.2 mm plates (yellow, green and magenta) can be locked polyaxially with the 1.7 mm and 2.3 mm screws and the 3.0 mm plates (light blue) optionally with the 2.7 mm, 3.5 mm and 4.0 mm screws of the EickLoxx series.

Despite contouring, the panels can be bent as required using the cabinet iron and / or the panel bending pliers with rollers and shortened using the cutting pliers.

The sieve tray with the EickLoxx Small Contour plates fits into the container Art. No. 185555 on the two sieve trays of the EickLoxx Small system.

## BONE ANCHOR SET

vetpood.ee

### Highest pullout strength for precise, safe ligament and tendon reconstruction

The Bone Anchor Set is an innovative, screw-thread-based anchor system for veterinary ligament and tendon reconstruction in small animals. It impresses with maximum stability, precise placement, and a sophisticated design for safe application, specifically adapted to different animal sizes, from cats to large dog breeds.

- High pullout strength: Significantly exceeds traditional hook anchors and other anchor systems
- Titanium material: Ensures high biocompatibility and infection resistance
- Self-drilling & self-tapping: Easy handling after initial perforation with a KIRSCHNER wire
- Versatile screw sizes: Diameters from 1.3 mm to 2.8 mm, available in various lengths
- Double-head drilling: Allows the insertion of multiple sutures through the same anchor head – pre- or intraoperatively using the threading aid
- Rounded head design: Minimizes the risk of foreign body reactions – in contrast to conventional, classic screw heads with washers
- Ideal for collateral ligament replacement in: carpus, tarsus, elbow, knee

The complete set contains all the necessary components for immediate use – including various anchor screw sizes and a threading aid.

## ORTHOVET PRO BATTERY POWERED DRILL SYSTEM

The OrthoVet PRO is a modular, battery driven drill system designed for small animal osteosynthesis. The modular system consists of a handpiece and four attachments, which can be changed intraoperatively in just a few seconds with a keyless quick coupling.

The handpiece, the Quick Release Chuck and the Jacobs Chuck are fully cannulated. The Oscillating Saw has a fivefold adjustable, variable fixation of the saw blade and allows the surgeon an optimised view of the surgical field. The AO Quick Coupling completes the system and makes the OrthoVet PRO a real all-rounder. The handpiece and attachments can be autoclaved.

- Infinitely variable speed: 0 – 1,200 rpm
- Oscillation mode: 0 – 16,000 ocs/min
- Weight (includes Battery): 933 g
- Includes: Handpiece, Jacobs Chuck, AO Chuck, Quick Release Chuck, Oscillating Saw, Saw Blades, 2 Li-ion Batteries, Charger and Transport Case

195000

€ 2900,-

## DRAGONFLY CORDLESS DRILL SYSTEM

**Compact Power for Surgical Versatility** DRAGONFLY is a modular, battery-powered drill system with four quick-release attachments for screwing, milling, drilling, and cutting. The slim handpiece features an intuitive one-handed locking mechanism. The AO attachment, quick-release chuck, and Jacobs chuck are cannulated and compatible with drill bits up to 4.0 mm. Attachments operate with variable speed, in forward/reverse and oscillation modes – up to 1,350 rpm. The system includes an oscillating saw reaching 14,000 osc/min. Handpiece and attachments are autoclavable. The central drive unit – with Li-ion battery and control electronics – is not autoclavable, but ensures long runtime and durability. DRAGONFLY delivers the performance of traditional pneumatic or wired systems – engineered and manufactured in Germany.

### Technical specifications

- Continuously adjustable speed: 0 – 1,350 rpm
- Oscillation cutting operation: 0 – 14,000 osc/min
- Battery type: Li-Ion
- Scope of delivery: DRAGONFLY handpiece including 4 attachments (AO attachment, keyless chuck for KIRSCHNER drill wires / STEINMANN nails, Jacobs drill chuck, oscillating saw), 4 saw blades with STRYKER attachment, drive unit, sterile funnel, charger and transport case

## HEINE DIAGNOSTIC SET

Absolute precision is the basic requirement to ensure the creation of a high-quality product. At HEINE this principle applies to the entire production process.

Complete set, consisting of:

### NT 300 Double Charger (302550)

- Automatic charging process and overcharge protection
- Includes two NT 3.5 V Battery Handles including batteries (2x 302535)
- With short-circuit protection and a continuous ceramic brightness control

### BETA 200 LED Ophthalmoscope (300137)

The HEINE BETA 200 LED Ophthalmoscope offers a bright, clear view with durable LEDHQ technology and precise dimming, ideal for reliable mobile diagnostics.

### G100 LED Slit Illumination Head (300036)

The HEINE G100 VET LED features 1.6x magnification and precise, dimmable LED HQ lighting in a robust all-metal housing, ensuring optimal visibility and reliable diagnostics.

Replacement lamp can be ordered through item no. 300038.

### Otoscope Specula

- High quality chrome plated metal construction, which is easy to clean, disinfect and sterilise
- Metal Speculum, 4x 57 mm (300357)
- Metal Speculum, 6x 65 mm (300365)
- Metal Speculum, 7x 90 mm (300390)

## EICKVIEW OTO DIGITAL VIDEO OTOSCOPE

vetpood.ee

The EickView OTO is a compact, high-performance video otoscope designed for everyday use in veterinary clinics. With its HD camera, smart WiFi connectivity, and user-friendly interface, it allows for quick and precise examinations of the ear and other small body areas – wired or wireless. The EickView OTO is designed for routine ear examinations, pre- and post-operative evaluations, as well as dermatological applications.

### Technical specifications

- HD camera: 3.9 mm lens, 6 LEDs, and 78° wide-angle view
- Magnification: 1–1.5x
- Focal Range: 10–50 mm
- Display: 1.85" IPS LCD
- Resolution: 720 x 720 px
- Built-in Storage: 8 GB
- Light adjustment: 3 levels (bright / medium / dim)
- Connection: USB-C
- Connectivity: Wireless (Android / iOS) or wired via USB-C
- Included in the Set: EickView OTO, Portable carry case, USB data & charging cable, Tongue depressor, Skin observation sleeve, Silicone ear protection sheath, Silicone sheath with 2.0 mm working channel, Biopsy forceps (1.8 mm x 280 mm)

## FREEZPEN 16G

### Freezpen – Cryosurgery made simple

Freezpen combines leading-edge microtechnology and ergonomic design to make precision cryosurgery easier, more precise and more accessible than ever.

- Simple, stress-free removal of skin lesions and small tumours without anaesthesia
- Simply treat lesions and tumours on the body, legs, mouth, nose, ears or in the eye area

### Technical specifications

- Treatment temperature: -89 °C / -128 °F
- Pressure: 50 – 55 bar
- Incl. 3 autoclavable applicators:
  - Blue: Ø 1 – 3 mm (230 – 270 seconds flow time)
  - White: Ø 2 – 6 mm (145 – 180 seconds flow time)
  - Green: Ø 4 – 8 mm (110 – 130 seconds flow time)
- Incl. 6x 16 g N<sub>2</sub>O cartridges

# EOLIS AIR MANAGER

## Clean Air for Healthy Animals and People

**What is the air quality in your practice?** Air quality is often overlooked in veterinary clinics – yet it plays a crucial role in the health of patients, staff, and visitors. Whether during surgery, treatment, or routine cleaning, invisible pollutants can enter the air and pose serious health risks, potentially affecting the overall performance of your clinic. The EOLIS Air Manager provides powerful air purification, creating a safe and hygienic environment for both animals and humans.

### Typical Airborne Contaminants in Veterinary Clinics

- VOCs from anaesthetic gases, cleaning agents, and disinfectants (e.g. isoflurane, formaldehyde)
- Pathogenic microorganisms such as bacteria, viruses, and mould spores (e.g. parvovirus, calicivirus)
- Fine and ultrafine particles from surgical procedures (e.g. electrocautery, laser)
- Odours and allergens that settle on textiles and surfaces

### Solutions with the EOLIS Air Manager

- Multi-stage filtration system: biocidal pre-filter, HEPA specialist filter, activated carbon, UV-C, and oxidation
- Deep-clean mode with active oxygen for intensive air purification in just 60 minutes
- Removes VOCs, viruses, bacteria, spores, fine dust, allergens, and odours
- Continuous air quality monitoring with real-time performance adjustment
- Ideal for treatment rooms, operating theatres, waiting areas, and staff zones
- Freestanding unit; optional wall mount or trolley available
- Made in France with a 3-year warranty

### EOLIS Air Manager 600S

- Max. coverage area (in m<sup>2</sup>): 60
- Dimensions (in cm): H 50,5 x W 38,5 x D 23
- Power consumption (min/max in W): 13 / 65
- Max. airflow (m<sup>3</sup>/h): 350
- Noise level (min/max in dB): 18 ~ 52

## EICKEMEYER ICU – Precision Meets Efficiency

The new EICKEMEYER® ICU is a compact, high-end solution for advanced intensive care in veterinary practices, clinics, and ECC clinics. Two independently controlled levels enable simultaneous treatment of up to four patients – maximising capacity without increasing footprint.

Each level operates autonomously, offering precise regulation of Oxygen, CO<sub>2</sub>, Temperature, and Humidity. A digital monitoring system with smart alerts ensures maximum safety. The stainless-steel housing and integrated Ion-Based Sterilisation guarantee top-level hygiene and whisper-quiet operation – ideal for sensitive patients.

### Key Benefits

- 3D Climate Control Uniform temperature distribution creates a stable microclimate throughout the chamber.
- Real-Time O<sub>2</sub>/CO<sub>2</sub> Sensor Technology Automated gas regulation for safe, targeted therapy - compatible with central gas supply or optional oxygen concentrator.
- Negative Ion Air Purification Removes up to 98% of airborne particles, reduces pathogens and odours, promotes calm and supports immune function.
- UV Quartz Sterilisation 254 nm UV technology for effective disinfection – minimises cross-contamination.
- Therapeutic Lighting System Warm light for calming, white light for vital sign monitoring, and blue light to support cognitive function and reduce inflammation.

Whether for post-operative care, continuous oxygen therapy, or thermal management for neonates, the EICKEMEYER® ICU combines precision, hygiene, and comfort in one intelligent system. A smart investment that strengthens any modern veterinary practice.

### Technical specifications

- Touchscreen interface with real-time data
- Temperature control range: 15–38 °C
- Oxygen concentration: 21–60%
- CO<sub>2</sub> monitoring with integrated filtration
- Automatic humidity regulation
- Dimensions (cm): W 125 × D 66 × H 182
- Weight: approx. 236 kg
- Available from January 2026
