LIFEVET PT PULSE OXIMETER WITH TEMPERATURE MEASUREMENT

The portable LifeVet PT can measure and display the functional oxygen saturation of arterial haemoglobin (SpO₂), pulse rate and body temperature in real time in dogs, cats, and horses. All important parameter information can be easily read on the large LCD display.

- Small, handy and sturdy
- Immediately ready for use – no calibration necessary
- Display of oxygen saturation from 35 to 100 %
- Display of the pulse rate from 25 to 400 beats per minute (bpm)
- Display of body temperature from 18 to 45 °C
- Alarm limits (optical & acoustic) individually adjustable
- 2.8" TFT LCD colour display with battery level indicator
- Can be connected to a computer via USB
- Test results can be stored for up to 360 hours
- Dimensions (in cm): H 14.2 x W 7.8 x D 2.8
- Weight: 250 g (device only)
- Incl. SpO₂ sensor with two sensor clips (large & small), temperature probe, universal charger, USB cable, Li-Ion battery, protective silicone case and holder for tabletop use

321860

€ 290,-

LIFEVET CP CAPNOGRAPH AND PULSE OXIMETER

The LifeVet CP handheld Capnograph and Pulse Oximeter measures and displays the expiratory CO₂ concentration as well as the respiratory rate, pulse rate and oxygen saturation in dogs, cats and horses. This compact and portable device is very easy to use with its touchscreen display and intuitive interface.

- High resolution 4.3" touchscreen display
- Side-stream capnography
- EtCO₂ concentration: 0 – 150 mmHg
- Respiratory rate displayed in rpm
- SpO₂ range: 1 – 100 %
- Pulse rate: 25 – 250 bpm
- Audible and visual alarms with adjustable volume
- Long-life lithium battery: up to 18 h operating time
- Dimensions (in cm): W 7.7 x H 14.1 x D 3.6
- Weight: 420 g
- Includes: CO₂ tube, CO₂ filter, net adapter, USB cable, clip sensor

321880

€ 1100,-

LIFEVET 10M MULTIPARAMETER MONITOR

The LifeVet 10M is a fast, accurate and comfortable patient monitor that is characterised by its high ease of use and reliable technology. Its innovative technology is the ideal basis for obtaining detailed data and enabling first-class visualisations. Thanks to the large display, the vital functions can also be easily read from a distance. It is operated conveniently via touchscreen. Hot keys also provide quick access to the most important functions. The low power consumption and powerful battery make this monitor an extremely efficient solution.

- Multi-parameter display of respiratory rate, pulse rate, oxygen saturation, blood pressure (NIBP), ECG and temperature
- High-resolution 10.4" LED touchscreen with up to 7 curves
- Freely selectable alarm limits
- Mains and battery operation up to 4 hours
- Dimensions (in cm): W 32 x H 22 x D 16
- Weight: approx 3.5 kg
- Incl. Li-Ion battery, NIBP cable with cuff, ECG cable with clamps, SpO₂ sensor with clips and temperature probe

321915

€ 1050,-

LIFEVET 10C MULTIPARAMETER MONITORS

The LifeVet 10C monitors are modern, powerful patient monitors that are characterised by their high level of user-friendliness, reliable technology and extensive data storage. Thanks to the large display, the vital functions can also be read easily from a distance. It is operated conveniently via touchscreen. Hot keys also provide quick access to the most important functions.

- Multi-parameter display of respiratory rate, pulse rate, oxygen saturation, blood pressure (NIBP), ECG, temperature and capnography (EtCO₂) in sidestream mode
- High-resolution 10" LED touchscreen with up to 8 curves
- Freely selectable alarm limits and 360° visible alarm display
- Mains and battery operation up to 4 hours
- Dimensions (in cm): W 27 x H 22 x D 17
- Weight: ≤ 4.0 kg
- Incl. Li-Ion battery, NIBP cable with cuff, ECG cable with clamps, SpO₂ sensor with clips, temperature probe, CO₂ adapter, CO₂ cable and water trap

EICKEMEYER® NARKOVET LIGHT ANAESTHETIC UNIT

The EICKEMEYER® NarkoVet LIGHT is a cost-effective mobile anaesthetic machine, using quality parts like the MSS Vaporiser. It includes breathing circuits and an anaesthetic gas fi lter.

- High accuracy Rotameter (0.1 – 5.0 l/min)
- EICKEMEYER® Isoflurane Vaporiser TEC 3
- Oxygen bypass (O₂ fl ush)
- Patient exit: Ø outside: 22 mm / Ø inside: 15 mm
- Ayre's T-Piece breathing circuit for patients under 7 kg
- Semi disposable Circle Circuit for patients over 7 kg including patient hose with Y-piece, 2.0 l rebreathing bag and APL pressure relief valve
- EickSorber anesthetic gas fi lter with holder and exhaust pipe
- Storage tray and hook for additional rebreathing bags
- Stable base with 5 castors (Ø 54 cm)
- Dimensions (in cm): H 142 x W 67 x D 54
- Weight: 14.5 kg

213071

€ 1705,-

OxyVet IV Oxygen Concentrator

- Saving costs and effort: No oxygen bottle required, lower power consumption Simple operation thanks to the clear
- arrangement of the setting functions and monitoring information
- High patient safety through visual and acoustic alarms
- Noise level: ≤ 55 dbA
- Flow rate continuously adjustable from 0.5 – 5 l/min Output of up to 93 % oxygen (± 3 %)
- Dimensions (in cm): L 34 x W 37 x H 67
Weight: 15.3 kg Incl. Bubble humidifier and O₂ hose

213180

€ 660,-

Starter Kit for NarkoVet LIGHT

This set provides the necessary accessories to perform anaesthesia on dogs and cats.

Complete Set, consisting of:

- Isoflurane Safety Key Filler
- Soda Lime Anaesthesia, 5 l, with colour indicator
- 2 Rebreathing Bags (1 and 3 l)
- 6 Anaesthesia Masks (size 1 – 6)
- EickTube Tracheal Tube Set with 23 tubes (2.0 – 10.0 mm)
- Laryngoscope – Basic

Your Veterinary Anaesthesia Solution

The EICKEMEYER® NarkoVet II is a state-of-the-art anaesthesia machine specifically designed for veterinary medicine. This compact and visually appealing device features a clear and organized structure of all components, ensuring ease of use. With the included mounting plate, an optional O₂ concentrator can be conveniently installed directly on the stable, mobile stand, optimising space and functionality in your practice.

- O₂ Flowmeter (0.1 – 4.0 l/min)
- Oxygen bypass (O₂ flush)
- Isoflurane vaporiser, key filled
- CO₂ absorber lime container with quick-change system
- Infinitely adjustable pressure relief valve
- Pressure gauge to display the system pressure
- External fresh gas outlet for open system
- Easy change of circuits using a toggle switch
- Hanger for hygienic storage of patient tubes
- Holder for anaesthetic gas filter
- Incl. O₂ concentrator tray, ventilator tray (NarkoVet SAV II), patient tubes (coaxial / open), rebreathing bags (0.5 l, 1 l & 2 l) and anaesthetic gas filter with scavenging hose

213130

€ 2300,-

OxyVet III Oxygen Concentrator (5 l) An oxygen concentrator draws in room air, separates the oxygen from other gases in the environment and delivers the oxygen at high concentrations.

- Flowrate: 0.5 to 5 l/min
- Oxygen concentration: 93 % ± 3 %
- Sound level: 40 dbA (50 Hz)
- Electrical requirements: 230 V / 50 Hz
- Power consumption: approx 290 watt @ 2 l/min and approx. 312 watt at 5 l/min
- Dimensions (in cm): L 34 x W 30.4 x H 62
- Weight: 16.3 kg

EICKEMEYER® NARKOVET PRO ANAESTHETIC UNIT

Maximum Safety for Your Patients with the EICKEMEYER® NarkoVet PRO

The main cause of serious anaesthesia incidents in veterinary practices is the patient's unnoticed apnoea. Routinely controlled ventilation helps to drastically minimise this risk, ensuring optimal safety for your patients. The EICKEMEYER® NarkoVet PRO features an integrated ventilator powered by an electronic turbine, eliminating the need for drive gas from an external compressor. To protect your patients and staff, the system performs an automatic leak test at start-up.

Anaesthesia Machine

- O₂ Flowmeter (0.1 – 4.0 l/min)
- Oxygen bypass (O₂ flush)
- Isoflurane vaporiser, key filled
- CO₂ absorber lime container with quick-change system
- Infinitely adjustable pressure relief valve
- Pressure gauge to display the system pressure
- External fresh gas outlet for open system
- Easy change of circuits using a toggle switch
- Holder for anaesthetic gas filter

Ventilator

- Electronically controlled, no compressed air source required
- All ventilation parameters on a large, 8" touchscreen
- Patient safety through acoustic and visual alarms
- Automatic calculation of ventilation volume based on weight
- Patients from 0.5 – 150 kg can be ventilated
- Tidal volume from 5 ml, for precise ventilation of the smallest patients

Supported ventilation modes:

Volume-controlled ventilation (VCV)

Volume-supported (VS)

Pressure-controlled ventilation (PCV)

Synchronised intermittent mandatory ventilation – pressure-

controlled (SIMV-PC)

Continuous positive airway pressure / pressure-supported ventilation (CPAP/PSV)

Pressure-regulated volume-controlled (PRVC) Synchronised intermittent mandatory ventilation – Pressure-regulated volume-controlled (SIMV-PRVC)

Pressure-supported ventilation protection (PSVPro) Ventilation rate: 4 - 100 bpm

- Tidal volume: 5 - 1,500 ml
- Maximum ventilation pressure: 3 - 50 cmH₂O
- Trigger pressure -20.0 to -1 cmH₂O
- Mains and battery operation, battery life min. 2 hours

Further Specs

- Incl. O₂ concentrator tray, patient tubes (coaxial / open), rebreathing bag (0.5, 1 & 2 l) and anaesthetic gas filter with scavenging hose
- Dimensions (in cm): L 64 x W 67 x H 140
- Weight: approx. 43 kg

INFUSOVET SP SYRINGE DRIVER / PUMP

The EICKEMEYER® InfusoVet SP is a highly accurate and reliable syringe pump. The clearly arranged, colour coded buttons make it particularly easy to use.

- 2.5" backlit LCD display
- Compatible with standard 5, 10, 20, 30, 50 and 60 ml syringes
- Safety when injecting: precise control of flow rate and injection volume
- High patient safety through acoustic alarms
- Quick start function
- With clamp for IV pole

Technical specifications

- Mains and battery operation, battery life up to 6 hours
- Splash proof (IP34)
- Dimensions (in cm): L 33 x D 12.6 x H 11
- Weight: approx 1.8 kg

INFUSOVET IP INFUSION PUMP

The EICKEMEYER® InfusoVet IP is a programmable infusion pump that combines safety, performance and reliability. The pump is easy to use and the infusion sets are easy to insert.

- 2.5" backlit LCD display
- User-friendly through simple programming
- High level of patient safety thanks to acoustic and visual alarms (in the event of air bubbles, constipation, empty battery, end of infusion)
- Also suitable for blood transfusions
- With clamp for IV pole
- For EICKEMEYER® infusion lines (item no. 402071)

Technical specifications

- Flow rate: 0.1 – 1,500 ml/h
- Volume limit: 1 – 9,999 ml
- Bolus rate: 0.2 – 600 ml/h (manual)
- Occlusion level: 3 levels selectable (150 – 900 mmHg)
- Mains and battery operation, battery life up to 4 hours
- Splash water protection according to IP34
- Dimensions (in cm): W 15 x H 25 x D 9
- Weight: < 1.45 kg

X-BASE OPERATING TABLE

The EICKEMEYER® X-Base Operating Table is our most popular surgery table. All components are of the highest quality, making this table a great investment in the future of your practice.

- X-Base with 4 individually adjustable feet
- Provides best possible legroom and stability
- Good working posture whether sitting or standing
- Slim lift column made of aluminium, pump hydraulic or mains operated
- Self-contained, maintenance-free lift column
- Height adjustable from 72 – 112 cm
- Unidirectional 90° tilt mechanism, one hand control
- Stainless steel top with rounded, anti-drip edges and drain hole
- Tabletop available in two different sizes (50 x 130 cm or 60 x 130 cm)
- Optional heated tabletop
- Various colour options available

DR. MACH LED 300DF THEATRE LIGHTS

vetpood.ee

The latest addition to the range of the quality manufacturer DR. MACH impresses with the highest light intensity at an extremely attractive price. The light beams of the three LED clusters can be bundled using the sterilisable handle and, depending on the size of the wound area, also focused.

- 160,000 lux at 1 m working distance
- Focusable light field: 17 – 27 cm
- Colour rendering index: Ra \geq 95
- Height adjustment: 118 cm
- Working area: 70 – 140 cm
- Number of LEDs: 36
- Lifespan of the LEDs: 60,000 hours
- Electronic brightness control on the luminaire body
- Including power supply

DR. MACH LED 6MC (BASIC) THEATRE LIGHTS

The ergonomic design of the Dr. Mach LED 6MC stands for maximum handling, minimal heat generation and optimal functionality. A highlight of the new light is the so-called cascade system. Different types of lenses ensure vertical focusing of the depth of light. This means that as the depth of the operating field increases, the light no longer needs to be readjusted manually.

- 140,000 lux at 1 m working distance
- Focusable light field: 18 – 30 cm at 1 m working distance
- Colour rendering index: Ra \geq 98
- Number of LEDs: 69
- Lifespan of the LEDs: 60,000 h
- Electronic brightness control on the light head

MAGIC 500 PLUS PORTABLE ULTRASOUND UNIT

The MAGIC 500 PLUS sets a new standard of mobility for pregnancy testing in the field. With only 1.1 kg and an integrated rechargeable battery, it ensures maximum comfort and user friendliness.

Features

- Long service life: due to the long battery life of the battery supplied, unforeseen extended scanning sessions are not a problem
- Efficient workflow: Performing measurements on stored images ensures an efficient examination process
- Via a WiFi connection images and videos can be transmitted wirelessly to external devices (PC, laptop, tablet, smartphone) as well as monitors
- Higher diagnostic reliability with Cine Memory (256 frames)
- Individually adjustable ultrasound image
- Protection by splash-proof venting and membrane keypad
- Mounting rings and straps for easy hanging around the neck

Areas Of application

- Pregnancy examinations in cattle and horses
- Adjustment aids for optimal work
- Standard measurements and vet pregnancy calculation
- Anti-reflective ultrasound image individually adjustable
- Measurements below 1 mm possible (fat layer thickness measurement)
- Back fat and loin thickness calculation

Technical specifications

- 15 cm LED Monitor
- Black-and-white system
- Images and video clips can be saved on the device
- Incl. a switchable, changeable transducer 6.5 MHz, linear rectal, frequency switching of: 4.5 / 5.5 / 6.5 / 7.5 MHz
- Incl. a glove for the left hand (right glove can be reordered)
- Incl. Carrying case
- Integrated battery with up to 5 hours runtime
- Dimensions (in cm): W 16 x H 16 x D 7
- Weight: 1.1 kg

MAGIC 6000 PLUS PORTABLE ULTRASOUND UNIT

A new dimension in image quality

The MAGIC 6000 PLUS not only opens a new dimension of image quality in small animal abdominal sonography, the device can also be used in equine gynaecology and orthopaedics. With a powerful cine mode, you can always keep an overview even with restless patients under difficult conditions.

- High-resolution 15" display, tiltable
- Cine mode with memory function (5 sec.)
- PW and Power Doppler (PDI) with "Auto Trace"
- Optional Colour Doppler Upgrade (30374001)
- iStation™, iClear™, iZoom™, iBeam™, iTouch™ & iScape
- Various application-specific measurements for abdomen and gynaecology including pregnancy calculation
- Second probe connection for quick probe swap

EICKEMEYER® PAWSITIONER

vetpood.ee

The Pawsitioner is designed to secure patients for surgery and hands-free diagnostic imaging. It eliminates the need for tie-downs and makes it easy to clip and scrub patients in the prep room then transport them to surgery without having to re-position. The Pawsitioner is also ideal for hands-free radiographic positioning, including V-D, left or right lateral, V-D pelvis for OFA evaluation, rostral-caudal skull views and much more without re-positioning the patient for each radiograph. The cradle may also be used to hold patients for laparoscopy, CT, MRI, myelography and ultrasonography.

PROFIDENT PLUS DENTAL UNIT

vetpood.ee

The Profi dent PLUS is the result of many years of experience. It offers a wide range of applications for both, general practitioners and dental specialists. It is characterised by its modern design combined with high mobility. The stand is adjustable in height and all handpieces are arranged within easy reach of the operator. When a handpiece is removed from its holder, the Profi dent PLUS automatically supplies air and water to it.

High Speed Turbine (300,000 rpm)

Push button burr change for friction grip burrs (FG)
Variable burr water cooling facility
With LED illumination

Low Speed Air Motor (20,000 rpm) with Straight Handpiece

For long straight shank burrs (HP), diamond discs and prophylaxis heads
High torque, forward and reverse rotation
Optional water cooling facility (item no. 174022)

Built-in Dental Scaler

Handpiece with LED illumination
Includes 5 scaling tips

3 in 1 Syringe

Precise finger tip control of water, mist or dry air
Water connection to connect external dental scaler (e. g. item no. 176870)

Dental Unit Air Compressor

Powerful (340 watt)
Quiet, 40 dB (A) (as a fan)
Low maintenance

Micro Oil Filter

Reduces the oil content in the compressed air down to 0.01 %
Helps extend the life of handpieces

COCOON SPRAY DENTAL UNIT

Its compact and robust design makes this unit ideal for the majority of all routine veterinary dental procedures.

The dental scaler is a state-of-the-art Piezo system, it offers superb efficiency to remove even the most stubborn tartar with ease.

Water cooled drilling means you can run faster speeds without the risk of thermal tissue damage.

- Infinitely variable power control
- Self-regulated frequency: 27 to 32 kHz
- Driver type: piezoelectric
- Oscillation form: linear
- For straight and angled dental handpieces
- With water cooling
- High torque to ensure maximum precision
- Self-regulated speed up to 40,000 rpm
- Handpieces not included

DENTANOMIC DENTAL INSTRUMENTS

Easier, safer & faster dental surgery

DENTANOMIC instruments are premium surgical tools with superb tempered and hardened modular blades making dental extraction in dogs and cats easier, safer and faster.

- Blades are made from top quality, hardened stainless steel and cut much better than conventional instruments
- Unique modular design allows easy blade replacement when blades are blunt or damaged
- Ergonomic handle design promotes safe palm grip, only minimal finger force is required to stabilize the cutting edge
- Standard handles are perfectly balanced and sized for surgeons with hands up to 7.5 glove size

DENTANOMIC PERIOSTEAL ELEVATOR SET

DENTANOMIC dental instruments are an innovation in the field of dental surgery and significantly simplify tooth extraction. With the interchangeable blades, the instruments can be quickly and easily adapted to the respective surgical situation. In addition, once the blade wears out, the entire instrument no longer needs to be thrown away. The blades are extra hardened and have a special, very sharp grind.

Set consisting of 4 periosteal elevator blades (2, 4, 6 and 8 mm) and sterilization container

EICKWARM H₂O HEATING SYSTEM FOR SMALL ANIMALS

Prevent Intraoperative Hypothermia with the EickWarm H2O Patient Heating System

Intraoperative hypothermia is one of the most common anaesthesia complications in small animal medicine. Effective perioperative heat management is crucial for reducing this risk and ensuring patient safety.

The EickWarm H2O Patient Heating System provides safe and effective heat therapy with precise temperature control for small animals. By circulating demineralized water through a leak-proof heating mat, the system delivers conductive temperature therapy to prevent heat loss and hypothermia during surgery and recovery. The compact device operates quietly, ensuring a calm environment for both patients and staff. The efficient heating element quickly brings the warming mat to the desired temperature, providing immediate warmth. Additionally, by adding pre-cooled water, the device can be used to cool patients, offering versatile temperature management.

648020

- Safe and effective control of the patient's body temperature
- Continuous temperature adjustment from 10 °C to 45 °C
- For use with demineralised water
- Digital temperature and water level display
- Three different timer modes
- Locking valves prevent the device from leaking when changing mats
- Includes two warming mats (L 55 x W 55 and L 55 x W 100 cm)
- Compact dimensions (in cm): L 19 x W 19 x H 17
- Weight: 1.2 kg

REUSABLE WARMING MATS

vetpood.ee

These reusable Warming Mats are placed under the patient and – thanks to their unique 3D textile structure – ensure optimal heat supply. The mats fit the body's contour perfectly, making temperature control possible in any position and without interruption at the contact points.

- Warm air is distributed evenly under the patient
- Pressure relieving positioning
- Free operating field
- Reusable and washable at 60 °C
- Compatible with most air warming devices
- Made in Germany
-

Small, 50 x 60 cm

EICKWARM AIR WARMING SYSTEM FOR SMALL ANIMALS

Intraoperative hypothermia is one of the most common anaesthesia complications in small animal medicine. Effective perioperative heat management is crucial for reducing this risk and ensuring patient safety. The new EickWarm Air Warming System quietly delivers forced air through optionally available warming mats that are specifically designed to evenly deliver diffused warm air to the patient.

- Safe and effective management of patient body temperature
- Optimal performance through uniform heat distribution
- Extremely powerful and quiet (≤55 dB)
- Only 60 seconds to warm up
- Temperature set points: Ambient air, 32 °C, 35 °C, 38 °C and 43 °C
- Three selectable fan levels (air flow)
- Reliable measurement of the hose outlet temperature using sensors
- Multiple alarm options ensure maximum patient safety
- Pole clamp for secure fixation
- Long heat hose (2 m) with flexible fastening clamp
- Compact dimensions (in cm): L 30 x W 37 x H 34
- Weight (including heat hose): 6.5 kg
- Warming mats available separately

€ 850,-

UUS

EICKLOXX MICRO OSTEOSYNTHESIS SYSTEM

The EickLoxx Micro osteosynthesis system was specially developed for the treatment of fractures in very small dogs and cats.

The angle-stable screws have a diameter of 1.2 mm.

In addition, various 1.0 mm thick plates are available in different configurations.

This opens up the following indication areas, especially for dogs and cats weighing less than 3 kg as well as puppies: radius/ulna fractures, metatarsal fractures, jaw, pelvic and scapula fractures, in addition to arthrodesis and much more.

The EickLoxx Micro osteosynthesis system joins the existing EickLoxx osteosynthesis system for dogs and cats and supplements this in the increasingly important lowest weight category.

197400

€ 2200,-

EICKLOXX SMALL CONTOUR OSTEOSYNTHESIS SYSTEM

The EickLoxx Small Contour plate set includes various anatomically preformed osteosynthesis plates for the treatment of fractures of the distal radius and femur, ilium, acetabulum and for arthrodesis of the carpus and tarsus. It complements the cut-to-size plates of the EickLoxx Small osteosynthesis system and is therefore also designed for the treatment of cats and dogs up to 15 kg. The instruments from the EickLoxx Small osteosynthesis system are used in a similar way.

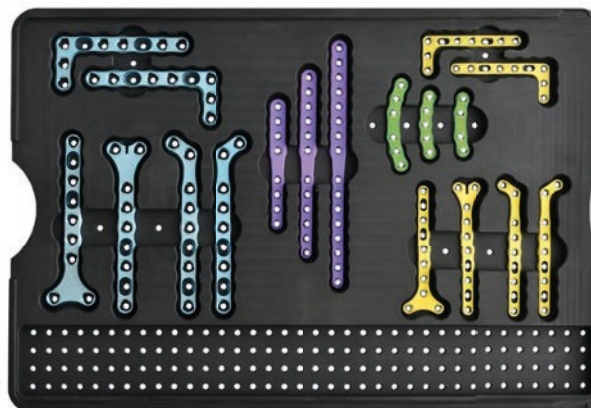

The titanium plates of the EickLoxx Small Contour plate set are available in two plate thicknesses: The 2.2 mm plates (yellow, green and magenta) can be locked polyaxially with the 1.7 mm and 2.3 mm screws and the 3.0 mm plates (light blue) optionally with the 2.7 mm, 3.5 mm and 4.0 mm screws of the EickLoxx series.

Despite contouring, the panels can be bent as required using the cabinet iron and / or the panel bending pliers with rollers and shortened using the cutting pliers.

The sieve tray with the EickLoxx Small Contour plates fits into the container Art. No. 185555 on the two sieve trays of the EickLoxx Small system.

197900

€ 1495,-

EICKLOXX SMALL OSTEOSYNTHESIS SYSTEM

The EickLoxx Small is a polyaxial locking kit for dogs and cats up to 15 kg.

The system distinguishes itself through the polyaxial placement of the custom-fit screws and combines the advantages of a locking plate system with polyaxial screw placement in $\pm 15^\circ$ longitudinal and transverse pivoting.

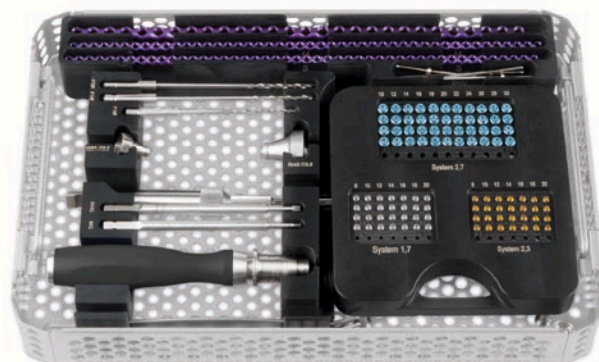

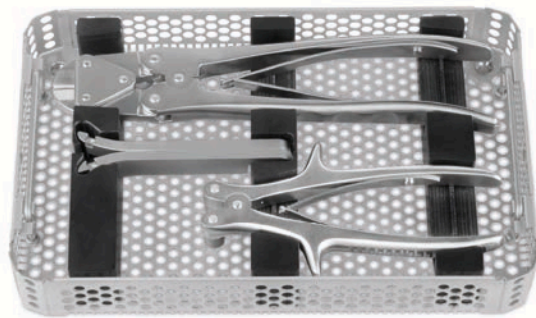

Compared to conventional osteosynthesis systems, the use of locking systems (internal fixation) such as the EickLoxx Small facilitates faster healing of fractures and improved implant strength. It is for this reason that the removal of plates and screws is rarely indicated.

The biologically advantageous titanium plates are available in three sizes and can be cut to the desired length and bent in three planes. Specially designed tools are included to perform this. Titanium also reduces artefacts in post-operative imaging.

EickLoxx Small is a modular system. All implants and instruments are made in Germany using only the highest quality materials.

185500

€ 4250,-

EICKLOXX LARGE OSTEOSYNTHESIS SYSTEM

The universal polyaxial osteosynthesis system for small animals

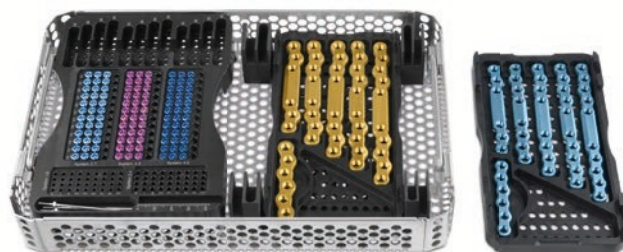

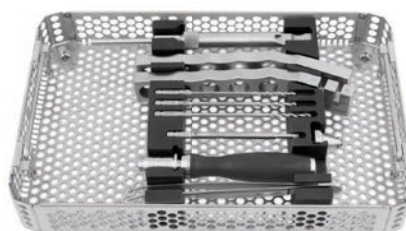

The newly developed EickLoxx Large is a polyaxial locking system for dogs with a weight of approx. 15 to 45 kg.

Just like the EickLoxx Small, the system is characterised by a polyaxial placement of the precisely shaped screws and therefore combines the advantages of locking systems and the possibility of placing screws at an angle of up to $\pm 15^\circ$. Like the EickLoxx Small, the EickLoxx Large offers the advantage of rapid fracture healing with improved implant strength. It is for this reason that the removal of plates and screws is rarely indicated.

The biologically advantageous titanium S-shaped plates are available in eight different sizes. Thanks to special tools, the plates can be bent on all three planes. The long 12- and 14-hole plates as well as the long 34 to 40 mm screws (\varnothing 2.7 / 3.5 / 4.0) are not included in the basic set and can be added if required. Both plates can be integrated into the implant tray. There is space in the implant tray for the long plates and capacity for the module for the long screws in the instrument tray.

187730

€ 3950,-

The ideal tool for small animal osteosynthesis

The OrthoVet PRO is a modular, battery driven drill system designed for small animal osteosynthesis. The modular system consists of a handpiece and four attachments, which can be changed intraoperatively in just a few seconds with a keyless quick coupling.

The handpiece, the quick release AO Chuck and the Jacobs Chuck are cannulated. Thus, cannulated screws or drills can also be tracked over long guide wires in stages, without the guide wire having to be shortened. The oscillating saw has a fivefold adjustable, variable fixation of the saw blade and allows the surgeon an optimised view of the surgical field. The AO quick coupling completes the system and makes the OrthoVet PRO a real all-rounder.

The handpiece and attachments can be sterilised / autoclaved. The Li-Ion Battery is not autoclavable and is inserted into the handpiece by means of special holder. Continuous operation is possible in clockwise and counterclockwise motion, as well as in oscillation with the saw attachment.

- 4 attachments: Jacobs Drill Chuck, Quick Release AO Chuck, Quick Release Chuck for KIRSCHNER wires, Oscillating Saw with Saw Blades
- Fully Cannulated Handpiece
- Autoclavable
- Includes 2 Li-Ion Batteries with Charger and Transport Case

Technical specifications

- Infinitely variable speed: 0 – 1,200 rpm
- Oscillation mode: 0 – 16,000 ocs/min
- Battery type: Li-Ion
- Battery charging time: 180 min
- Weight (includes Battery): 933 g

195000

€ 2900,-

DRAGONFLY CORDLESS DRILL

The powerful and intuitively operated motor system for small animal osteosynthesis

The DRAGONFLY is a modular cordless drill system with 4 attachments for screwing, milling, drilling and cutting as required. Thanks to the quick coupling, the attachments can be changed intraoperatively. The handpiece itself impresses with its narrow handle design and an intuitive one-handed mechanism.

The AO attachment is cannulated, same as is the keyless chuck for KIRSCHNER drilled wires / STEINMANN nails and the Jacobs drill chuck. Both are equipped with an adjustable clamping range of up to 4.0 mm. These 3 attachments can be operated stepless in left / right rotation and also in oscillation mode at speeds from 0 – 1,350 rpm.

The DRAGONFLY is completed by attachment no. 4: the oscillating saw. It is equipped with a power of 0 – 14,000 osc/min and allows the saw blade to be used in 4 different positions. Handpiece and attachments can be autoclaved. The core, however, is the removable, non-autoclavable drive unit: This includes the control unit, the battery, the electronics and the motor control electronics and, together with the Li-Ion technology, guarantees a long service life and service life. Thus, the DRAGONFLY offers you a performance that you previously only knew from compressed air or cable-electric systems. All components are designed and manufactured in Germany.

Technical specifications

- Infinitely variable speed: 0 – 1,350 rpm
- Oscillation cutting mode: 0 – 14,000 osc/min
- Battery type: Li-Ion
- Scope of delivery: DRAGONFLY handpiece incl. 4 attachments
- (AO attachment, keyless chuck for KIRSCHNER bone wires / STEINMANN nails, Jacobs drill chuck, oscillating saw), 4 saw blades with STRYKER attachment, drive unit, sterile funnel, charger and carrying case

ICARE® TONOVET PLUS TONOMETER

vetpood.ee

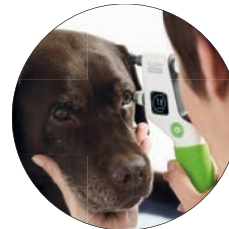

The Icare® TONOVET Plus is easy to use. It features an advanced user interface with a clear, large display. Red / green positioning lights help to find the correct angle and aim at the middle of the cornea. The automatic measuring sequence lets you choose between taking single readings or taking all 6 measurements with one press of the button.

Stand for TONOVET and TONOVET Plus

Table and wall mountable

1736008

€ 96,-

Application

- Quick, painless and accurate procedure
- Easy to use and requires no calibration
- Assisting positioning lights
- Large and easy to read colour display
- Dimensions (in mm): L 215 x W 24 – 29 x D 35 – 95
- Weight: 230 g (incl. batteries)
- Includes: Transport Case, 100 Probes, 4x AA batteries

ICARE® TONOVET PRO TONOMETER

The iCare TONOVET Pro tonometer sets new standards in intraocular pressure (IOP) measurement and is aimed at vets who have the highest demands on accuracy and ease of use. The innovative "Quick Measure" function enables faster and easier measurement of the IOP and significantly shortens the examination time, while the more responsive test tip and the optimised test tip control ensure improved handling and even more precise measurements. The 200-degree positioning freedom makes the TONOVET Pro tonometer an indispensable helper even in emergency situations. The ergonomic display is designed to allow the user to instantly read the measured values.

Application

- Improved user-friendliness
- 200-degree positioning freedom (ideal for equine use)
- More responsive test tip
- Better test tip control improves accuracy
- Display facing the user
- Self-calibrating
- Wireless printing via Bluetooth
- Includes: Transport Case, 100 TONOVET Probes, 4x AA batteries

KOWA SL-19 PORTABLE SLIT LAMP

Now more ergonomic and even lighter!

With its rounded shape and curved handle design, the new KOWA SL-19 Slit Lamp is even more ergonomic. Furthermore, the weight of the hand-held unit has been significantly reduced.

- New LED backlight that can be used simultaneously with the slit light
- New LED blue light illumination for fluorescence observation
- Light intensity can be adjusted with one hand
- Infinitely adjustable slit length (1.5 – 12 mm)
- Longer operating time: up to 6 hours at maximum intensity
- Available in 5 colors: white, black, blue, green and pink

Technical specifications

- Magnification: 10x and 16x
- Working distance: about 80 mm at 16x magnification, about 100 mm at 10x magnification
- Effective field of view: Ø 10 mm at 16x magnification, Ø 15 mm at 10x magnification
- Slit width: Ø 0.1, Ø 0.2, Ø 0.8 mm
- Spot size: Ø 1, Ø 5, Ø 12 mm (slit length continuously adjustable from 1.5 – 12 mm)
- Light intensity: 200 – 20,000 lux (continuously adjustable)
- Power supply: 3x AA batteries (DC 4.8 – 6.4 V)
- Dimensions (in mm): W 197 x D 107 x H 238
- Weight (without batteries): only 620 g

KOWA SL-19 PLUS PORTABLE SLIT LAMP

The latest development from KOWA, the hand-held slit lamp SL-19 plus, impresses with its well-known ergonomic shape and light weight with an integrated, high-resolution camera. With a simple hand movement, videos can be recorded during the examination, which are automatically transmitted to an iPad (not included) via WiFi. Using special application software, these videos can be analysed and further processed on the iPad. High-resolution still images can also be extracted from the videos, which can be individually selected, saved and forwarded.

Technical specifications

- Magnification: 10x
- Working distance: approx. 100 mm
- Effective field of view: Ø 15 mm at 10x magnification
- Camera field of view: approx. 27 to 15 mm
- Effective pixel count: approx. 2 megapixels
- A camera indicator shows the operating status of the camera
- Operating time: approx. 8.5 hours if the device is switched off and disconnected from the iPad after each use, approx. 3.5 hours at full power without disconnecting from the iPad
- Dimensions (in mm): D 197 x W 107 x H 255
- Weight (without batteries): 730 g

Contact bandage lenses act as a protective shield on the cornea. They permit corneal repair and improve patient comfort by preventing contact between damaged cornea and eyelids.

- High definition optics offers a clear and sharp view
- Excellent stabilization
- Comfortable contact lens wear for up to 30 days and nights
- Ensures an optimal supply of oxygen to the cornea and makes eyes look clear
- Packaging: 6 lenses per box

173540

€ 30,-

ALGERBRUSH II

The AlgerBrush II is a battery powered, handheld, low torque motorised burr. It has been designed to remove foreign bodies from the cornea or sclera of patients.

The burr in this rotary instrument is used as a “brush” rather than a drill and the foreign bodies are thus “brushed” from the eye leaving a smooth surface, which in turn heals much faster than with other instruments that could be used for this purpose.

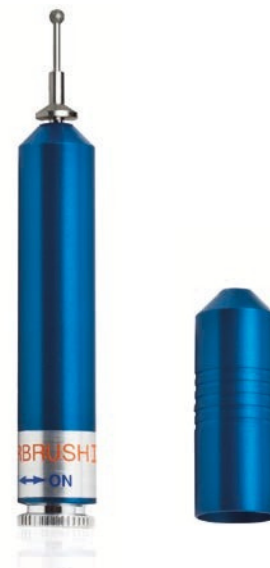

According to the paper “Veterinary Ophthalmology” ([2013] 16, 2, [83 – 88]), it has been successfully used to treat spontaneous corneal epithelial defects (SCCEDs) in dogs in combination with a bandage contact lens.

Includes

- 3.5 mm round, medium grit diamond burr
- Chuck

HEINE OMEGA 600 INDIRECT OPHTHALMOSCOPE

Discover more. With less weight.

Lighter. Brighter. Better. HEINE kept the best and perfected the rest. Highly comfortable, the HEINE OMEGA 600 delivers a new class of technological innovation, along with the new and unique visionBOOST for significantly better diagnostic even in dense cataracts.

- Most precise diagnostic, up to the far retinal periphery
- Up to 20 % better view in media opacities with visionBOOST
- Lightest High-End Indirect Ophthalmoscope worldwide
- Long-lasting investment due to its robust design
- Easy disinfection thanks to smoothSURFACE

Most precise diagnostic, up to the far retinal periphery

- Significantly better diagnostic due to unique visionBOOST
- Sharpest fundus image due to superior glass optics
- Brightest fundus image with true colour rendering thanks to our unique LEDHQ – now in even more natural colours
- Best 3D imaging due to our unique Stereoscopic Adjustment
- Technology in dilated and undilated pupils

Includes

OMEGA 600 Indirect Ophthalmoscope (with battery and +2 D eyepiece), E4-USBC power supply with cable, eyepiece 0 D

HEINE DIAGNOSTIC SET

Absolute precision is the basic requirement to ensure the creation of a high-quality product. At HEINE this principle applies to the entire production process.

Complete set, consisting of:

NT 300 Double Charger (302550)

- Automatic charging process and overcharge protection
- Includes two NT 3.5 V Battery Handles including batteries (2x 302535)
- With short-circuit protection and a continuous ceramic
- brightness control

BETA 200 LED Ophthalmoscope (300137)

The HEINE BETA 200 LED Ophthalmoscope offers a bright, clear view with durable LEDHQ technology and precise dimming, ideal for reliable mobile diagnostics.

G100 LED Slit Illumination Head (300036)

The HEINE G100 VET LED features 1.6x magnification and precise, dimmable LED HQ lighting in a robust all-metal housing, ensuring optimal visibility and reliable diagnostics.

Replacement lamp can be ordered through item no. 300038.

Otoscope Specula

- High quality chrome plated metal construction, which is easy to clean, disinfect and sterilise
- Metal Speculum, 4x 57 mm (300357)
- Metal Speculum, 6x 65 mm (300365)
- Metal Speculum, 7x 90 mm (300390)

HEINE LED LOUPELIGHT 2 WITH 2.5X BINOCULAR LOUPES

vetpood.ee

Brighter. Lighter. Improved functionality.

LED in HQ – the new standard in LED lighting delivers homogeneity and bright light with natural colour rendering for a precise diagnosis. The combination of light and magnification provides optimal results.

HEINE LED LoupeLight 2

- Illumination: 55,000 lux
- Colour temperature: 4,000 Kelvin
- Adjustable viewing angle ensures a coaxial, shadow-free image
- Replaceable connecting cable, 1.6 m
- Including HEINE mPack mini and USB plug-in power supply
- Operating time ~ 9 hours, at full power ~ 4 hours

EICKVIEW COMPACT ENDOSCOPE SET

The specially developed EickView Compact Endoscope provides the perfect solution for rhinoscopy, tracheoscopy and vaginoscopy in small animals due to its small diameter (3.8 mm) and integrated working channel.

Highly mobile

Homogeneous and minimally invasive distal end

Integrated working channel Ø 1.3 mm

Outer diameter Ø 3.8 mm

Working length 14 cm

Viewing angle: 30°

Opening angle 90° (wide-angle)

Foreign body forceps Ø 1 mm, L 25 cm

Attachable LED Light source

Long battery life and spare battery with an operating time of 4 hours each

3 Adjustable light levels

Stopcocks: two integrated stopcocks allow steady insufflation and irrigation

Connection: STORZ, WOLF or ACMI connectors

Eyepiece: DIN ocular allows the connection of all standard

C-mount cameras

Set includes: EickView Compact Endoscope incl. fitted

otoscopy protection aid, portable LED light source incl.

charger, foreign body forceps, spare battery, 2 cleaning brushes,

padded carrying case

Endoscopy Biopsy Forceps

- For taking biopsies
